## **APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q24-Q29):**

### **NEW QUESTION # 24**

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Regular review of contractual compliance
- B. Maintain contact with legal authorities
- C. Return assets to their legal owners
- D. Regular review of compliance

**Answer: D**

### Explanation:

## Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

## NEW QUESTION # 25

Which statement describes the Classification of information control in Annex A of ISO/IEC 27001?

- A. Ensures that all information assets are labelled with their classification
- B. Ensures that information is classified based on confidentiality, integrity and availability
- C. Ensures that security perimeters are used to protect assets
- D. Ensures the rules to control physical and logical access apply to assets

**Answer: B**

### Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.12 (Classification of information) states:

"Information should be classified according to the information security needs of the organization based on confidentiality, integrity and availability." This aligns directly with option B. Option A (labelling) is a separate control (Annex A.5.13). Option C (security

perimeters) is under physical controls (Annex A.7.1). Option D (access control rule

**NEW QUESTION #26**

## NEW QUESTION # 26

- A. Risk acceptance criteria
- **B. Determined levels of risk**
- C. Risk treatment control options
- D. Prioritized risks for treatment

### Answer B

### Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

\*assess the potential consequences that would result if the risks identified were to materialize;"

\* "assess the realistic likelihood of the occurrence of the risks identified";

\* "1 to 1 to 1 to 1 to 1 to 1"

\* 'determine the levels of risk.' This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is P: Determized levels of risk.

### NEW QUESTION # 27

What is the definition of the term 'integrity' according to ISO/IEC 27000?

- A. The property of being accessible and usable
- B. The property of availability and confidentiality

- C. The property that information is NOT made available inappropriately
- D. The property of accuracy and completeness

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.35:

"Integrity is the property of accuracy and completeness."

This is one of the three core principles of information security (CIA triad):

- \* Confidentiality: ensuring information is not made available to unauthorized persons (related to option B).
- \* Integrity: ensuring data is accurate, complete, and unaltered except by authorized means.
- \* Availability: ensuring information is accessible and usable when required (related to option A).

Option D incorrectly mixes availability and confidentiality. The precise ISO definition is accuracy and completeness, which matches option C.

Thus, the correct verified answer is C.

**NEW QUESTION # 28**

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The dependencies between activities performed by the organization
- B. The lessons learned from the information security experiences of other organizations
- C. The regular activities necessary to maintain and improve the ISMS
- D. The level of quality to which the ISMS must adhere

**Answer: A**

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

**NEW QUESTION # 29**

.....

Customizable ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice tests (desktop and web-based) of RealExamFree are made to ensure excellent practice of applicants.
