

Study CCAS Reference, Detailed CCAS Study Dumps

If you study on our CCAS study engine, your preparation time of the CCAS exam will be greatly shortened. Firstly, the important knowledge has been picked out by our professional experts. You just need to spend about twenty to thirty hours before taking the Real CCAS Exam. Also, our workers have made many efforts on the design of the system. You will never feel bored when you study on our CCAS preparation materials. You will find learning can also be a pleasant process.

ACAMS CCAS Exam Syllabus Topics:

Topic	Details
Topic 1	• Cryptoasset and Blockchain: This domain targets Blockchain Analysts and Crypto Risk Managers. It focuses on understanding cryptoasset technologies, blockchain fundamentals, and their operational characteristics. Candidates learn about cryptoasset transaction flows, wallets, exchanges, smart contracts, and the challenges these present to financial crime prevention.
Topic 2	• Risk Management Programs for Cryptoasset and Blockchain: This section measures expertise of Compliance Managers and Risk Officers in developing and implementing risk management frameworks specifically for the crypto sector. It includes procedures for assessing crypto-related financial crime risks, designing controls, monitoring compliance, and adapting to emerging threats within the cryptoasset ecosystem.
Topic 3	• AML Foundations for Cryptoasset and Blockchain: This section of the exam measures skills of Anti-Money Laundering (AML) Officers and Crypto Compliance Specialists. It covers foundational knowledge of AML principles tailored to the cryptoasset and blockchain environment, introducing the regulatory landscape, typologies of financial crime, and the evolving risks associated with cryptoassets.

Online ACAMS CCAS Practice Test Engine Designed by Experts to Help You Pass with Flying Colors

CCAS training materials have now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the CCAS exam, and got their own dream industry certificates. CCAS exam questions have an extensive coverage of test subjects and have a large volume of test questions, and an online update program. CCAS Study Material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction.

ACAMS Certified Cryptoasset Anti-Financial Crime Specialist Examination Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which type of blockchain is jointly operated by multiple pre-approved organizations?

- A. Public
- B. Private
- **C. Consortium**
- D. Hybrid

Answer: C

Explanation:

Consortium blockchains are semi-private networks where governance is shared among authorized participants, offering a balance between decentralization and access control.

NEW QUESTION # 32

Which blockchain features built-in privacy measures to prevent tracing and conceal ownership and flow of illicit funds?

- A. Polygon
- B. Ethereum
- C. Cardano
- **D. Monero**

Answer: D

Explanation:

Monero is a privacy-focused blockchain designed with built-in features like ring signatures, stealth addresses, and confidential transactions to obfuscate sender, receiver, and transaction amounts, making tracing difficult.

Cardano, Polygon, and Ethereum are not designed primarily with these privacy features and have publicly traceable ledgers, although privacy solutions may be layered on.

NEW QUESTION # 33

Which is the most important consideration when assessing compromise risks when creating a decentralized finance protocol or smart contract?

- A. Government regulation
- B. Security token standard
- **C. Code uniqueness**
- D. Dual authentication protocols

Answer: C

Explanation:

Code uniqueness is critical because reuse or replication of vulnerable code exposes protocols to known exploits. Unique, well-audited, and secure code minimizes compromise risk in decentralized finance (DeFi) and smart contracts.

Security standards (A), authentication (B), and regulation (C) are important but secondary to the fundamental security of the code itself.

NEW QUESTION # 34

Under DIFC AML rules, which governance body must approve the firm's business-wide risk assessment?

- A. Chief Technology Officer
- B. Internal audit team
- **C. Board of Directors**
- D. Compliance department

Answer: C

Explanation:

DFSA AML Module requires the Board to approve and oversee the firm's business-wide risk assessment, ensuring accountability at the highest governance level.

NEW QUESTION # 35

A firm using blockchain analytics finds an address that sent funds through multiple hops before reaching a darknet market wallet. This is an example of:

- A. Indirect exposure
- B. Direct exposure
- C. Mixing
- D. Transaction batching

Answer: A

Explanation:

Indirect exposure occurs when funds pass through one or more intermediary wallets before reaching a known illicit destination. This requires enhanced monitoring to capture risks that are not directly linked but are part of the transaction chain.

NEW QUESTION # 36

• • • • •

If you don't pass the Selling Certified Cryptoasset Anti-Financial Crime Specialist Examination (CCAS) exam, Exams-boost will refund the money.
