PMI Cognitive Project Management in AI CPMAI v7 - Training & Certification Exam Sample Questions (Q92-Q97):

NEW QUESTION # 92
Major factors for the project you are currently working on are around the training time, cost, and complexity of training your models. Which algorithm is not the best choice given these constraints?

- A. Support Vector Machines (SVM)
- B. Naive Bayes
- C. Gaussian Mixture
- D. Neural Networks

Answer: D

Explanation:
Neural Networks-especially deep architectures-typically require extensive computational resources, longer training times, and higher infrastructure costs compared to simpler methods. In contrast, algorithms like Naive Bayes train very quickly on large datasets, and Gaussian Mixture Models or SVMs have more moderate training complexity and infrastructure demands. Therefore, given strict constraints on training time, cost, and complexity, Neural Networks are the least suitable choice.

NEW QUESTION # 93
Your team is using a neural network algorithm to generate a Machine Learning Model. What specific artifacts need to be included? (Select all that apply.)

- A. Bias-variance tradeoff
- B. Hyperparameter settings
- C. The algorithm code
- D. Supporting training data

Answer: B,C,D

Explanation:
Algorithm selection/code must be documented under the Select Modeling Technique task, where teams
"document the actual algorithm/modeling technique to be used" .
Supporting training data pipelines are a core artifact of Phase III: Data Cleansing, which mandates "create a reusable data pipeline to collect, ingest, and prepare data for training purposes" .
Hyperparameter settings are captured in the Hyperparameter Optimization task, where teams "list the final, optimized settings" used for model building .
The bias-variance tradeoff is a conceptual consideration during evaluation but is not a discrete artifact to include in the project deliverables.
==========

NEW QUESTION # 94
Your team is working on a new facial recognition application. Since this technology has the potential to be mis-used you think it's important to set guidelines for the proper use of this application and you want to make sure the AI system is built for some positive purpose. What area of Trustworthy AI does this best fall under?

- A. Responsible AI
- B. Transparent AI
- C. Governed AI
- D. Explainable AI

Answer: A

Explanation:

Under Domain VI: Trustworthy AI in the CPMAI Exam Content Outline, Responsible AI covers establishing policies, guidelines, and governance that ensure AI solutions are developed for positive, ethical use and prevent misuse. Defining proper-use guidelines and embedding ethical intent into facial recognition directly align with Responsible AI practices .

NEW QUESTION # 95

You are establishing the data requirements for the project. Which of the following tasks is the least likely to impact data requirements?

- A. The volume of the data you collect
- B. The quality of the data you collect
- C. The location/source of your data collection
- D. The makeup of your data team

Answer: D

Explanation:
In Phase II: Data Understanding, CPMAI's Generic Task Groups focus on:
Collecting initial data (identifying sources and volumes) and describing data (location/source) .
Verifying data quality to ensure completeness and correctness .
Team composition (the makeup of your data team) is addressed earlier under Phase I: Assess Situation, not during the Data Understanding phase where data requirements (quality, volume, source) are determined.

NEW QUESTION # 96

During which phase of an AI project should you consider Trustworthy AI considerations?

- A. Phase VI: Model Operationalization
- B. Every Phase of the AI project
- C. Phase II: Data Understanding
- D. Phase I: Business Understanding

Answer: B

Explanation:
CPMAI's Domain VI: Trustworthy AI is designed to span the entire project lifecycle, embedding ethics, transparency, fairness, privacy, and security checks into every phase-from Business Understanding through Operationalization-so that trustworthy practices are not an afterthought but a continuous, integrated activity .
