## Microsoft Power Platform Functional Consultant Sample Questions (Q242-Q247):

### NEW QUESTION # 242

You are designing an app for a bank.

You must create entities for the app and configure relationships between entities:

Entity	Requirements
LoanApplicant	This entity represents a person who is applying for a loan. The entity must contain an attribute named Email. This attribute must provide look-up for the name of the applicant.
Loan	This entity represents a loan application. Loan applicants may apply for one loan per application. Loan applicants may have more than one active application.
Property	This entity represents the property that the applicant intends to purchase.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct requirements. Each relationship type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Relationship types	Requirement	Relationship type
1 : N	The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.	<input type="text"/>
N : N	Loan applicants can apply for one type of loan per application. Applicants can have more than one application.	<input type="text"/>
N : 1	Loans must be applied for for a single property.	<input type="text"/>

Answer:

Explanation:

Relationship types	Requirement	Relationship type
1 : N	The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.	N : 1
N : N	Loan applicants can apply for one type of loan per application. Applicants can have more than one application.	N : N
N : 1	Loans must be applied for for a single property.	N : 1

Explanation

Text Description automatically generated

## Requirement

## Relationship type

The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.

N : 1

Loan applicants can apply for one type of loan per application. Applicants can have more than one application.

N : N

Loans must be applied for for a single property.

N : 1

Box 1: N:1

You add a lookup column with a many-to-one relationship.

Box 2: N:N

Box 3: N:1

### NEW QUESTION # 243

You have a Power Apps portal app that supports a sales community and a service community in the same environment. The only language configured in the environment is English. The company wants to add support for two more languages.

The solution must meet the following requirements:

- \* Languages must be for both sales and service functions.
- \* The company logo and colors must be used and apply to all screens.
- \* Communities must be separate with different URLs and access lists.

You need to configure the solution.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Languages	<div>▼</div> <div>Create two portals, one for each community. Create three portals, one for each language. Create one portal and import translations. Create six portals, one for each combination of language and community.</div>
Company logo and colors	<div>▼</div> <div>Add themes. Add web resources. Add a portal header and footer</div>

Answer:

Explanation:

Requirement	Configuration
Languages	<div> <div></div> <div> Create two portals, one for each community.  Create three portals, one for each language.  Create one portal and import translations.  Create six portals, one for each combination of language and community. </div> </div>
Company logo and colors	<div> <div></div> <div> Add themes.  Add web resources.  Add a portal header and footer </div> </div>

Explanation

Box 1: Create two portals, one for each community

Power Apps portal app languages

Box 2: Add themes

You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system. For example, you can create your personal product branding by adding a company logo and providing table-specific coloring. A theme can be created by using the Themes area, without requiring a developer to write code. You can create, clone, change, or delete themes that are used in your environment.

#### NEW QUESTION # 244

A company uses a canvas app to manage production resources in a specific region. Employees must be at company locations to use the app.

Due to a sudden requirement for employees to work remotely, employees no longer commute to a specific location to conduct their work and cannot access the canvas app.

You must reconfigure the app to ensure that employees only access the app from a limited number of locations.

You need to restrict access to the app.

Which components should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Component
Ensure that employees can only access the app from a specific region	<div> <div></div> <div> Canvas app settings  Power Platform admin center  Azure Active Directory  Office 365 admin center </div> </div>
Specify the locations where a user can access the app	<div> <div></div> <div> Security role  Conditional Access policy  Local Security policy  Compliance policy </div> </div>

Answer:

Explanation:

Requirement	Component
Ensure that employees can only access the app from a specific region	<div>▼</div> <ul style="list-style-type: none"> <li>Canvas app settings</li> <li>Power Platform admin center</li> <li>Azure Active Directory</li> <li>Office 365 admin center</li> </ul>
Specify the locations where a user can access the app	<div>▼</div> <ul style="list-style-type: none"> <li>Security role</li> <li>Conditional Access policy</li> <li>Local Security policy</li> <li>Compliance policy</li> </ul>

Explanation

Graphical user interface, text, application, email Description automatically generated

## NEW QUESTION # 245

The app needs to store temporary data

\* Each screen must maintain a separate copy of data and pass the data to another screen.

\* The app must be able to update separate rows of a table independently.

You need to configure variables for the data.

Which variable types should you use? To answer, drag the appropriate variable types to the correct requirements. Each variable type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Variable types	Requirement	Variable type
Collection	Screens maintain separate data and pass the data to another screen.	Global variable
Global variable	Update separate rows of a table independently.	Context variable
Context variable		

Answer:

Explanation:

Variable types	Requirement	Variable type
Collection	Screens maintain separate data and pass the data to another screen.	Global variable
Global variable	Update separate rows of a table independently.	Context variable
Context variable		

Explanation

Graphical user interface, text, application Description automatically generated with medium confidence

Variable types	Requirement	Variable type
Collection	Screens maintain separate data and pass the data to another screen.	Global variable
Global variable	Update separate rows of a table independently.	Context variable
Context variable		

### NEW QUESTION # 246

A company is creating a canvas app and a model-driven app to manage their customer accounts.

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.

You need to configure the scope for the business rules.

Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Scopes	Answer Area						
<div>All forms</div>	<table><thead><tr><th>Business rule</th><th>Scope</th></tr></thead><tbody><tr><td>Business Type column setting for customer size</td><td><div></div></td></tr><tr><td>Account rating re-evaluation</td><td><div></div></td></tr></tbody></table>	Business rule	Scope	Business Type column setting for customer size	<div></div>	Account rating re-evaluation	<div></div>
Business rule	Scope						
Business Type column setting for customer size	<div></div>						
Account rating re-evaluation	<div></div>						

Answer:

Explanation:

Scopes	Answer Area						
<div>All forms</div>	<table><thead><tr><th>Business rule</th><th>Scope</th></tr></thead><tbody><tr><td>Business Type column setting for customer size</td><td><div>Table</div></td></tr><tr><td>Account rating re-evaluation</td><td><div>Specific form</div></td></tr></tbody></table>	Business rule	Scope	Business Type column setting for customer size	<div>Table</div>	Account rating re-evaluation	<div>Specific form</div>
Business rule	Scope						
Business Type column setting for customer size	<div>Table</div>						
Account rating re-evaluation	<div>Specific form</div>
