1Z0-1042-24 – Oracle Cloud Infrastructure 2024 Application Integration Professional (Set – 01)

1. Which is **NOT** an advantage of using Oracle Integration Cloud (OIC) for creating application integrations?

- a. Prebuilt integrations
- b. Auto-association of Oracle SaaS applications
- c. **User choice of IDE for development**
- d. Public/Private Cloud portability
- e. Data mapping recommendations

**Correct Answer: C**

2. Oracle Integration Cloud (OIC) Service is available in two editions, **Standard** and **Enterprise**. Which two OIC **Enterprise** Edition capabilities are **ALSO** available in OIC **Standard** Edition?

- a. **File Server**
- b. **Visual Builder**
- c. Integration Insight
- d. B2B Trading Partner Agreements
- e. Enterprise Application adapters (such as EBS, JDE, SAP and Siebel)
- f. Process Applications

**Correct Answer: A, B**

3. You are tasked with creating an Oracle Integration Cloud (OIC) integration flow that supports a B2B document exchange. When configuring the **B2B** action there are several capabilities as well as limitations. Which statement is **NOT** valid concerning OIC B2B capabilities?

- a. **It is mandatory to perform validations on EDI documents for inbound translations; however, for outbound translations it is optional.**
- b. A previously created Trading Partner Agreement is optional when configuring the inbound or outbound translation.
- c. You can customize standard Electronic Data Interchange (EDI) documents by adding new schema constructs or by editing existing constructs.

**Correct Answer: A**

4. As an integration developer, you are creating an integration in Oracle Integration Cloud (OIC) to transform a payload with multiple orders. You need to configure for-each action to loop through each order and process them individually. How do you correctly configure for the for-each action to loop through each order and process them individually? a. Select the Parallel Processing option and set the number of threads to the number of orders. b. Select the Group By option and group the orders by the order number. c. **Select the Repeating**

Obtaining an IT certification shows you are an ambitious individual who is always looking to improve your skill set. Most companies think highly of this character. Our 1z0-1042-24 exam original questions will help you clear exam certainly in a short time. You don't need to worry about how difficulty the exams are. Itcertkey release the best high-quality 1z0-1042-24 Exam original questions to help you most candidates pass exams and achieve their goal surely.

The dynamic society prods us to make better. Our services on our Oracle 1z0-1042-24 exam questions are also dependable in after-sales part with employees full of favor and genial attitude towards job. So our services around the Oracle 1z0-1042-24 Training Materials are perfect considering the needs of exam candidates all-out.

## Exam Oracle 1z0-1042-24 Forum, 1z0-1042-24 Verified Answers

In order to be able to better grasp the proposition thesis direction, the Oracle Cloud Infrastructure 2024 Application Integration Professional study question focus on proposition which one recent theory and published, in all kinds of academic report even if update to find effective thesis points, according to the proposition of preferences and habits, ponder proposition style of topic selection, to update our 1z0-1042-24 Exam Question, to facilitate users of online learning, better fit time development hot spot.

## Oracle 1z0-1042-24 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                       |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.</li></ul> |
| Topic 2 | <ul style="list-style-type: none"><li>Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.</li></ul>                       |
| Topic 3 | <ul style="list-style-type: none"><li>Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.</li></ul>                                          |
| Topic 4 | <ul style="list-style-type: none"><li>Using OIC Connections &amp; Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.</li></ul>                                           |
| Topic 5 | <ul style="list-style-type: none"><li>Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.</li></ul>                                                                                                                                                    |

## Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q94-Q99):

### NEW QUESTION # 94

Oracle Integration Cloud (OIC) integrations can be exported so that later they can be imported into another OIC instance environment. Which statement is NOT true about the import and export of OIC integrations?

- A. Integrations must be exported as a package if you want to import them into another OIC environment.
- B. Imported integrations can be reconfigured to use different connection resources by using the OIC REST API.
- C. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment.
- D. Exported integrations include all their dependent connection resource information except URLs and credentials.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation:

OIC supports exporting and importing integrations for migration or backup:

\* Option A: True-activation requires all dependent connections (e.g., adapters) to exist in the target environment; otherwise, manual configuration is needed.

\* Option B: True-exported integrations (IAR files) include connection metadata but exclude sensitive data like URLs and credentials for security.

\* Option D: True-the OIC REST API allows post-import reconfiguration of connections.

### NEW QUESTION # 95

As an Oracle Integration Cloud (OIC) specialist, you are tasked with implementing a scheduled integration between two enterprise applications. The client requires that the integration be run every weekday at 3:00 PM to synchronize data between the systems. Which advanced scheduling configuration expression will you use?

- A. "FREQ=WEEKLY;BYDAY=MO,TU,WE,TH,FR;BYHOUR=15"
- B. "FREQ=DAILY;BYDAY!=SA,SU;BYHOUR=15"
- C. "FREQ=DAILY;BYDAY=MO-FR;BYHOUR=15"
- D. "FREQ=WEEKLY;BYDAY=MO-FR;BYHOUR=15"

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

iCal syntax for weekdays at 3 PM:

\* C:True-FREQ=DAILY;BYDAY=MO-FR;BYHOUR=15 runs Mon-Fri at 15:00.

\* A:False-!=SA,SU is invalid syntax.

#### NEW QUESTION # 96

You will be creating and configuring a Connection resource using an Oracle Integration (OIC) File Adapter.

Which set of operations are supported in the Invoke role when leveraging access via a Connectivity agent?

- A. Read, write, list
- B. Read, write, list, move
- C. Read, write, list, move, download
- D. Read, write
- E. Read, write, list, move, download, delete

**Answer: E**

Explanation:

Comprehensive and Detailed Explanation:

File Adapter with Agent:

\* C:True-full set of operations.

#### NEW QUESTION # 97

You are developing an integration in Oracle Integration (OIC) to integrate two systems and wish to use an OIC Lookup. The goal is to transform customer status codes between the two systems. Which set of steps are essential for correctly utilizing the Lookup?

- A. Design a custom script to perform the transformation, and then use the Lookup function within a Map action to reference the script and transform the customer status codes.
- B. Create a connection between the two systems, then use a SQL query to access the Lookup table directly, and map the customer status codes.
- C. Create a Lookup table with the mappings of customer status codes, and then use the Lookup function within a Map action to reference the table and perform the transformation.
- D. Define a Lookup table containing the customer status code mappings, and then use the Invokeaction to call a web service for the transformation.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

Lookup Usage:

\* D:True-create table, use lookupValue in mapper.

#### NEW QUESTION # 98

In Oracle Integration (OIC), you are designing an integration flow that processes customer orders. You need to enforce a specific validation rule that if an order contains more than 10 items, it must be rejected with an appropriate error message. Which is a valid approach for leveraging the Throw New Fault action in your integration to achieve this requirement?

- A. Add the Throw New Fault action as the first activity in the main flow defining the error message, then configuring the Skip condition to be if the count is not greater than 10.
- B. Implement the validation rule using a For-each action, and then use the Throw New Fault action within the first iteration if the count is greater than 10.
- C. Create a scope, add the Throw New Fault action using an If-then branch to check the order item count, then throw the fault if the count is greater than 10.
- D. Create a separate integration flow to handle the error message, and then call it using the Throw New Fault action if the order item count is greater than 10.

**Answer: C**

Explanation:

### Comprehensive and Detailed Explanation:

### Validation with Fault:

\* B:True-Scope with conditional Throw is precise.

### NEW QUESTION # 99
