SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 2	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q36-Q41):

NEW QUESTION # 36

What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?:

- A.
- **B.**
- C.
- D.

Answer: B

NEW QUESTION # 37

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- **A. Enable Require value before publish**
- B. Configure a validity condition
- C. Configure a visibility condition
- D. Enable Required

Answer: A

Explanation:

SAP Ariba provides a specific property in the Advanced tab called "Require value before publish", which ensures that a field must be populated prior to the contract workspace being published. Enabling this option on the Supplier field enforces this mandatory behavior during the publish action. The standard "Required" checkbox only enforces field completion in the UI during data entry but does not prevent publishing if the field is empty. Visibility conditions control whether the field is displayed, not whether it is required at publish. Validity conditions enforce value correctness but not presence at publish time. This feature enhances data completeness at critical lifecycle points.

NEW QUESTION # 38

A Migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates that it Failed. What actions do you take to make the failed template(s) available in production?
