SAP Certified Associate - Security Administrator Sample Questions (Q57-Q62):

NEW QUESTION # 57

In S/4HANA on-premise, which of the following combinations is required to grant a business user access to data from a Core Data Services (CDS) view using the standard ABAP authorization concept and authorization object S_RS_AUTH?

- A. A CDS role with access conditions based on authorization object S_RS_AUTH, a PFCG role with authorization for object S_RS_AUTH and assignment of the PFCG role, the CDS role to the business user.
- **B. A CDS role with access conditions based on authorization object S_RS_AUTH, a PFCG role containing the CDS role and access conditions based upon authorization object S_RS_AUTH, assignment of the PFCG role to the business user.**
- C. A CDS role with access conditions based on authorization object S_RS_AUTH, a PFCG role containing the CDS role and access conditions based upon authorization object S_RS_AUTH, assignment of the PFCG role and the CDS role to the business user.
- D. A CDS role with access conditions based on authorization object S_RS_AUTH, a PFCG role with authorization for object S_RS_AUTH, assignment of the PFCG role to the business user.

Answer: B

Explanation:

To grant a business user access to data from a Core Data Services (CDS) view in SAP S/4HANA on-premise using the standard ABAP authorization concept and S_RS_AUTH, the correct combination includes a CDS role with access conditions based on S_RS_AUTH, a PFCG role containing the CDS role and access conditions based on S_RS_AUTH, and assignment of the PFCG role to the business user. The CDS role defines data access restrictions at the CDS view level, using S_RS_AUTH to enforce specific conditions, such as filtering data by organizational units. The PFCG role incorporates this CDS role and includes S_RS_AUTH authorizations, ensuring that the user's permissions align with both the CDS view's restrictions and ABAP authorization checks. Assigning only the PFCG role to the user simplifies administration, as the CDS role is embedded within it. Options A and C incorrectly suggest assigning the CDS role directly to the user, which is not standard practice, and option D omits the CDS role's integration into the PFCG role. This combination ensures secure and efficient access to CDS view data.

NEW QUESTION # 58

Which access categories are available to maintain restrictions in SAP S/4HANA Cloud Public Edition? Note:

There are 3 correct answers to this question.

- A. Read (read access)
- **B. Read, Value Help (read access)**
- **C. Value Help (value help access)**
- D. Write, Read (write access)
- **E. Write, Read, Value Help (write access)**

Answer: B,C,E

Explanation:

In SAP S/4HANA Cloud Public Edition, access restrictions are maintained using specific access categories to control user permissions granularly. The available categories include "Read, Value Help (read access)," which allows users to view data and access value help functionalities; "Value Help (value help access)," which restricts access to only value help features; and "Write, Read, Value Help (write access)," which grants permissions for creating, modifying, reading, and using value help. These categories enable precise control over user access to data and functionalities, ensuring compliance with security policies. The options "Read (read access)" and "Write, Read (write access)" are not standard access categories in this context, as they do not fully align with the system's predefined restriction types.

NEW QUESTION # 59

Your developer has created a new custom transaction for your SAP S/4HANA on-premise system and has provided you a list of the authorizations needed to execute the new ABAP program. "What must you do to ensure that each required authorization is automatically created every time this new custom transaction is added to a PFCG role?

- A. Maintain each authorization in transaction SU24 and set the Default Status to "Yes".
- **B. Maintain each authorization object in transaction SU24 and set the Default Status to "Yes".**
- C. Maintain each authorization in transaction SU22 and set the Check Indicator value to "Check".
- D. Maintain each authorization object in transaction SU22 and set the Default Status to "Yes".

Answer: B

NEW QUESTION # 60

Which archiving objects are relevant for archiving change documents for user master records? Note: There are 2 correct answers to this question.

- A. US_PROF
- B. US_AUTH
- C. US_USER
- D. US_PASS

Answer: B,C

NEW QUESTION # 61

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Spaces
- B. Launchpad roles
- C. Catalogs
- D. Role collections

Answer: B

Explanation:

In the SAP Launchpad service in SAP Business Technology Platform (BTP), users can be assigned Launchpad roles directly. These roles define the permissions and functionalities available to the user within the Launchpad.

SAP Security References:

- * SAP Launchpad Service User Guide
- * SAP BTP Role Management Documentation

NEW QUESTION # 62

.....

At the time when people are hesitating about that which kind of C-SEC-2405 study material should be chosen in order to prepare for the important exam I would like to recommend the C-SEC-2405 training materials compiled by our company for you to complete the task. We have put substantial amount of money and effort into upgrading the quality of our C-SEC-2405 Preparation material. There are so many advantages of our C-SEC-2405 actual exam, such as free demo available, multiple choices, and practice test available to name but a few.
