Latest C-SEC-2405 Test Questions are verified and tested several times by our colleagues to ensure the high pass rate of our C-SEC-2405 study guide.

SAP Certified Associate - Security Administrator Sample Questions (Q77-Q82):

NEW QUESTION # 77

Under which of the following conditions can you merge authorizations for the same object during role maintenance? Note: There are 2 correct answers to this question.

- A. The activation status of a manual authorization must match the status of the changed authorizations.
- B. The activation status and the maintenance status of the authorizations must match.
- C. The maintenance status of the changed authorizations must match the status of a manual authorization.
- D. The activation status and the maintenance status of the authorizations must NOT match.

Answer: A,B

Explanation:

During role maintenance in SAP systems, merging authorizations for the same object is possible under specific conditions to streamline role management. The activation status of a manual authorization must match the status of the changed authorizations, ensuring consistency in how authorizations are applied within the role. Additionally, both the activation status and the maintenance status of the authorizations must align, meaning that the authorizations being merged should be in the same state (e.g., active or inactive) and maintenance phase (e.g., standard or changed). These conditions prevent conflicts and ensure that merged authorizations function correctly within the role, maintaining security and compliance. Mismatches in status or non-alignment of maintenance states can lead to errors or unintended access restrictions.

NEW QUESTION # 78

Which application in SAP S/4HANA Cloud Public Edition allows you to upload employee information independent of the customers' HR system?

- A. Identity and Access Management app
- B. Maintain Business User app
- C. Manage Workforce app
- D. Display Technical Users app

Answer: C

NEW QUESTION # 79

Which code does the authority-check return when a user does NOT have any authorizations for the authorization object checked?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 80

What are some of the rules for SAP-developed roles in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- A. Authorization defaults define role authorizations.
- B. Manual role authorizations are supported in custom catalogs.
- C. Role maintenance reads applications from a catalog.
- D. Catalogs are assigned to role menus.
- E. Role maintenance reads applications from role menus.

Answer: A,C,D

NEW QUESTION # 81

What does SAP recommend you do when you transport a custom leading business role in SAP S/4HANA Cloud Public Edition?

- A. Add all derived business roles as dependencies to the Software Collection.
- B. Add the pre-delivered business role that was used as a template to create the custom leading business role to the Software Collection.
- C. Add all other leading business roles from the same Line of Business as dependencies to the Software Collection.

Answer: B

Explanation:

When transporting a custom leading business role in SAP S/4HANA Cloud Public Edition:

* Include the Template Role (C):

* SAP recommends adding the pre-delivered business role (template) to the software collection.

This ensures that all dependencies and baseline configurations are included during the transport.

* Maintain Consistency:

* Adding the template role ensures that the custom role remains functional across environments and avoids issues related to missing dependencies.
