Crack the SAP C_S4CPR_2502 Exam with Flying Colors. The SAP C_S4CPR_2502 certification is a unique way to level up your knowledge and skills. With the Understanding SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement C_S4CPR_2502 credential, you become eligible to get high-paying jobs in the constantly advancing tech sector. Success in the SAP C_S4CPR_2502 examination also boosts your skills to land promotions within your current organization. Are you looking for a simple and quick way to crack the Understanding C_S4CPR_2502 examination? If you are, then rely on C_S4CPR_2502 Dumps.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which functions are available with the SAP Business Accelerator Hub? Note: There are 2 correct answers to this question.

- A. Test APIs
- B. Transfer APIs
- C. Create APIs
- D. Search APIs

Answer: A,D

NEW QUESTION # 16

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Change approval thresholds.
- B. Add blocking reasons for billing.
- C. Add new sales organizations.
- D. Modify building blocks.
- E. Create new scope items.

Answer: A,B,C

Explanation:

In the Product-Specific Configuration Phase of SAP Central Business Configuration, you can perform activities that are specific to configuring the system for your business needs. These activities include setting up organizational structures, defining business processes, and customizing configurations. Below are the three correct answers:

- * Add blocking reasons for billing (Option A): Blocking reasons for billing can be configured during the Product-Specific Configuration Phase. This allows organizations to define conditions under which billing documents are blocked for processing. The SAP S/4HANA Cloud Billing Guide confirms this capability.
- * Change approval thresholds (Option C): Approval thresholds for workflows, such as purchase requisitions or invoices, can be adjusted during this phase. This ensures that the system aligns with the organization's governance and compliance requirements. The SAP Workflow Configuration Guide documents this functionality.
- * Add new sales organizations (Option D): Sales organizations can be added during the Product-Specific Configuration Phase to support the organizational structure required for sales and distribution processes. The SAP Organizational Structure Guide confirms this activity.
- * B. Create new scope items: Scope items are predefined by SAP and cannot be created during the Product-Specific Configuration Phase. Instead, they are selected during the scoping phase.
- * E. Modify building blocks: Building blocks are part of the SAP Best Practices content and cannot be modified directly. Customizations are achieved through configuration settings.
- * SAP S/4HANA Cloud Billing Guide: Explains how to configure blocking reasons for billing.
<https://help.sap.com>
- * SAP Workflow Configuration Guide: Provides details on configuring approval thresholds.

* SAP Organizational Structure Guide: Describes how to add sales organizations during the configuration phase.

Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 17

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the business role template.
- B. Check the space and page(s) assigned to the role.
- C. Check the Role Maintenance app.
- D. Check the restrictions for the role.
- E. Check the business catalogues assigned to the role.

Answer: B,D,E

Explanation:

If an SAP Fiori app is not displaying on the SAP Fiori Launchpad despite the user having the correct business role, the issue could stem from several configuration areas. Here's how to troubleshoot:

- * Check the business catalogues assigned to the role (A): Business catalogues group apps into logical sets. Ensure that the business role assigned to the user includes the catalogue containing the missing app.
- * Check the restrictions for the role (B): Restrictions such as organizational assignments or field-level constraints might prevent the app from being visible. Verify that no such restrictions are applied to the role.
- * Check the space and page(s) assigned to the role (C): Spaces and pages define the layout of the SAP Fiori Launchpad. Ensure that the app is assigned to the correct space and page within the role configuration.
- * Check the Role Maintenance app (D): While the Role Maintenance app is useful for managing roles, it does not directly address visibility issues related to spaces, pages, or catalogues.
- * Check the business role template (E): Business role templates serve as a starting point for creating roles but do not directly impact app visibility once the role is assigned.

SAP S/4HANA Cloud Public Edition Documentation: Troubleshooting App Visibility

NEW QUESTION # 18

You need to create purchasing groups in your SAP S/4HANA Cloud Public Edition system that are relevant to your company.

Which of the following assignments for purchasing groups is required?

- A. Purchasing group is not assigned to any organizational unit in the company structure
- B. You must assign the purchasing group to the responsible purchasing organization
- C. You must assign the purchasing group to the plant
- D. You must assign the purchasing group to the company code

Answer: A

NEW QUESTION # 19

Where are the manual test cases created for customer User Acceptance Testing?

- A. Test Automation Tool
- B. SAP Signavio Process Navigator
- C. SAP Solution Manager
- D. SAP Cloud ALM

Answer: D

Explanation:

Manual test cases for customer User Acceptance Testing (UAT) are created in SAP Cloud ALM (Application Lifecycle Management), which is a cloud-based tool designed to support testing and quality assurance processes. Below is an explanation of the correct answer:

- * SAP Cloud ALM (A): SAP Cloud ALM provides a centralized platform for managing test cases, test plans, and execution results. It enables customers to create, organize, and execute manual test cases during UAT to ensure that business processes meet

requirements.

* SAP Signavio Process Navigator (B): SAP Signavio Process Navigator is used for process modeling and documentation, not for creating or executing test cases.

* SAP Solution Manager (C): While SAP Solution Manager supports testing, it is primarily used for on-premise systems and is not the recommended tool for SAP S/4HANA Cloud Public Edition.

* Test Automation Tool (D): Test automation tools focus on automated testing rather than manual test case creation for UAT.
