PRINCE2 Agile Foundation exam is a multiple-choice exam that consists of 50 questions. PRINCE2-Agile-Foundation exam is designed to test the candidate's knowledge and understanding of the PRINCE2 and Agile methodologies. PRINCE2-Agile-Foundation Exam Duration is 60 minutes, and the pass mark is 55%. PRINCE2-Agile-Foundation exam is available in various languages, including English, German, Dutch, and Spanish.

## PRINCE2 Agile Foundation Sample Questions (Q50-Q55):

### NEW QUESTION # 50

What is typically added to a user story as the understanding of the requirement evolves?

- A. Effort actually expended
- B. Definition of 'ready'
- C. Acceptance criteria
- D. An epic

**Answer: C**

### NEW QUESTION # 51

What term is used to describe boards that display what work needs to be completed for people working on a project?

- A. Glad! Sad! Mad!
- B. Work in progress limit
- C. Information radiator
- D. Highlight report

**Answer: D**

Explanation:

### NEW QUESTION # 52

What should be included when transitioning from a project to business as usual to ensure continual improvement?

- A. Agreeing applicable Service Level Agreements (SLAs)
- B. Providing access to Kanban or team boards
- C. Establishing regular feedback loops
- D. Defining Key Performance Indicators (KPIs)

**Answer: C**

Explanation:

When transitioning from project delivery into business as usual (BAU), establishing regular feedback loops is crucial to ensure continual improvement. Feedback loops enable ongoing monitoring, learning, and adaptation of both products and processes post-transition. They provide mechanisms for capturing user experiences, operational issues, and evolving requirements that inform future iterations and enhancements.

Feedback loops can take many forms, such as user surveys, retrospectives, operational reviews, or service desk reports. Their regularity and structure ensure that BAU teams remain aligned with customer needs and organizational goals while adapting to changes effectively. This approach fosters a culture of continuous learning and agility even after the formal project has closed. Providing access to Kanban or team boards (A) supports transparency and workflow management but is more tactical and internal to teams rather than a strategic approach to continuous improvement across BAU. Agreeing on SLAs (C) and KPIs (D) define performance and service targets but do not inherently drive feedback or improvement cycles without mechanisms for learning and response.

PRINCE2 Agile highlights the importance of feedback loops as part of the 'progress' and 'quality' practices extended into BAU to sustain value delivery.

### NEW QUESTION # 53

In which step of the approach to issue management are options to resolve an issue evaluated?

- A. Decide
- B. Implement
- C. Recommend

- D. Capture

**Answer: C**

Explanation:

The Recommend step in issue management involves analyzing the issue and evaluating possible options to resolve it. At this stage, the project team or responsible individuals identify potential solutions, weigh their pros and cons, and recommend the best course of action to decision-makers.

Capture is the initial identification and recording of the issue, Decide involves making the final decision on the recommended solution, and Implement is the execution of the chosen resolution. Evaluating options thoroughly during the Recommend phase helps ensure informed decision-making and effective issue resolution.

This structured approach aligns with PRINCE2's focus on proactive issue management, maintaining control and reducing risk impacts.

Reference: PRINCE2 Agile Foundation Version 2, Section 8.4 "Issue Management," and PRINCE2 Agile Study Guide, Chapter 8.

#### NEW QUESTION # 54

In which workshop are the project role descriptions created?

- A. Project canvas workshop
- B. Project kickoff workshop
- **C. Starting-up workshop**
- D. Project initiation workshop

**Answer: C**

Explanation:

The starting-up workshop is the initial workshop where the foundation for the project is established, including the creation and clarification of project role descriptions. Defining roles early ensures clarity of responsibilities, helps establish governance, and sets expectations for the project team.

Kickoff (B) focuses on launching the project, initiation (C) develops detailed plans, and the project canvas (D) is a tool for capturing high-level information but does not define roles explicitly.

Reference: PRINCE2 Agile Foundation Version 2, Section 4.5 "Starting Up a Project," and PRINCE2 Agile Study Guide, Chapter 4.
