Many customers may be doubtful about our price. The truth is our price is relatively cheap among our peer. The inevitable trend is that knowledge is becoming worthy, and it explains why good H12-821_V1.0 resources, services and data worth a good price. We always put our customers in the first place. Thus we offer discounts from time to time, and you can get 50% discount at the second time you buy our H12-821_V1.0 question dumps after a year. Lower price with higher quality, that's the reason why you should choose our H12-821_V1.0 prep guide.

Huawei H12-821_V1.0 (HCIP-Datacom-Core Technology V1.0) Certification Exam is an important certification for IT professionals who are involved in the design, implementation, and maintenance of large-scale datacom networks. HCIP-Datacom-Core Technology V1.0 certification validates the candidate's knowledge and skills in the field of datacom core technology, including network protocols, network devices, network technologies, and network management. HCIP-Datacom-Core Technology V1.0 certification is a valuable asset for IT professionals who are looking to enhance their career in the field of datacom core technology.

Huawei H12-821_V1.0 exam covers a wide range of topics related to data communication, including network design principles, network security, and network troubleshooting. H12-821_V1.0 Exam is designed to test the candidate's ability to design, implement, and troubleshoot data communication networks using Huawei technologies. HCIP-Datacom-Core Technology V1.0 certification exam is suitable for professionals who work with large-scale data communication networks and want to enhance their knowledge and skills in core data communication technologies. Passing the Huawei H12-821_V1.0 exam can open up new career opportunities and lead to higher salaries in the field of data communication.

H12-821_V1.0 Valid Exam Online, H12-821_V1.0 Original Questions

Our company will provide first class service on H12-821_V1.0 exam questions for our customers. As a worldwide leader in offering the best H12-821_V1.0 exam guide, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in H12-821_V1.0 Study Materials application as well as interactive sharing and after-sales service. As long as you need help, we will offer instant support to deal with any of your problems about our H12-821_V1.0 exam questions

Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q953-Q958):

NEW QUESTION # 953

A large shopping mall configures a VLAN pool to prevent network performance deterioration caused by potentially large broadcast domains. A network engineer runs the `display vlan pool name STA` command to check information about the VLAN pool.

The following command output is displayed:

```
<AC> display vlan pool name STA Name: STA Total: 2
```

```
Assignment: hash Threshold Notify Count: 3
```

```
Threshold Notify time(min): 3 VLAN ID: 2 4
```

Which of the following statements are true?

- A. The VLANs with the IDs of 2 and 4 are added to the VLAN pool.
- B. The name of the VLAN pool is STA.
- C. The VLAN pool uses the even VLAN assignment algorithm.
- D. The total number of VLAN pools is 2.

Answer: A,B

Explanation:

The command output confirms that the VLANs with IDs 2 and 4 are part of the VLAN pool named "STA." The VLAN pool concept is used to allocate VLANs dynamically to devices or subnets, which reduces broadcast domain size and improves network efficiency. The total number of VLAN pools is unrelated to this output, and the assignment algorithm (hash or even) is not explicitly mentioned in the output. Huawei VLAN pool management references align with this analysis.

NEW QUESTION # 954

Which of the following statements regarding OSPF route summarization is false?

- A. Any router in OSPF can summarize routes.
- B. Route summarization is the process of summarizing routes with the same prefix into one route and then advertising only the summarized route to other areas.
- C. OSPF supports two route summarization modes: ABR summarization and ASBR summarization.
- D. Route summarization can reduce routing information, decrease the routing table size, and improve router performance.

Answer: D

NEW QUESTION # 955

SDN controller can intelligently adjust traffic paths according to network status to improve the throughput of the entire network.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 956

Which of the following descriptions about ASPF and Server-map is correct?

- A. The session table is a concrete reflection of the connection status of the two parties in the communication
- B. The Server-map table is generated by the firewall based on the session table
- C. When the firewall receives the message, it will check whether it matches the Server-map table
- D. After the message hits the Server-map table, it needs to be controlled by the security policy

Answer: B

NEW QUESTION # 957

An enterprise administrator configures route summarization on ASBRs to reduce the number of inter-area Type 3 LSAs, which in turn reduces the routing table size and improves device resource utilization.

- A. TRUE

- B. FALSE

Answer: A

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

OSPF Route Summarization:

Route summarization combines multiple specific routes into a single summary route. This reduces the number of LSAs advertised between OSPF areas, especially Type 3 LSAs.

Benefits of Route Summarization:

Reduces the size of the OSPF database and routing table.

Minimizes the processing overhead on routers by decreasing the number of routing entries.

Improves the scalability of the OSPF network.

ASBR Function:

The ASBR advertises external routes into OSPF and can summarize routes at area boundaries or during redistribution.
