- A. User Acceptance Testing (UAT) Script
- B. Project Plan
- C. Technical Design Document (TDD)
- D. Business Requirements Document (BRD)

NEW QUESTION # 73
Which of the following factors can negatively impact email deliverability?

- A. Repeatedly sending emails to inactive or unengaged recipients
- B. Sending emails to a double opt-in list
- C. Properly authenticating the sender's email domain
- D. Consistently providing valuable and relevant content

Answer: A

Explanation:
Sending emails to recipients who have shown no engagement or have become inactive can harm email deliverability. Internet service providers (ISPs) and email filters take recipient engagement into account when determining whether to deliver emails to the inbox or spam folder. Continuously sending emails to unengaged recipients increases the likelihood of being marked as spam, leading to lower deliverability rates.

- A. Improved efficiency and time savings.
- B. Reduced ability to track and measure campaign performance.

- A. Upload them into the new instance and configure the Email Groups feature to handle them.
- B. Upload them into the new instance and configure a separate program to handle them.
- C. Ignore them and let the system handle them automatically.
- D. Manually delete them from the existing instance and upload them into the new instance.

Answer: B

By doing so, you can have a clean start in the new instance and accurately manage the communication preferences of your contacts.
