If you want to pass a high percentage of the Oracle 1Z0-1042-25 Exam, you should consider studying for the actual exam. These practice tests are designed to help you prepare for the exam and ensure you know the syllabus content. It will also help you improve your time management skills, as these tests are designed like an actual exam. Moreover, they will help you learn to answer all questions in the time allowed.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 2	<ul style="list-style-type: none">Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.
Topic 3	<ul style="list-style-type: none">Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Topic 4	<ul style="list-style-type: none">Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.

Topic 5	<ul style="list-style-type: none"> • Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.

1Z0-1042-25 Actual Test & 1Z0-1042-25 Exam Certification

We respect privacy of buyers, and if you buying 1Z0-1042-25 exam materials from us, we will ensure you that your personal information such as name and email address will be protected well and we won't send junk mail to you. We can tell you that once you finish buying the 1Z0-1042-25 exam dumps, your personal information will be concealed. Moreover 1Z0-1042-25 Exam Dumps are famous for high quality, and you can pass the exam just one time. Free demo will offer to you, so that you can have a try before buying. If you indeed have other questions, just contact us.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q74-Q79):

NEW QUESTION # 74

In Oracle Integration Cloud (OIC), you are working on an integration that uses a REST trigger, which will require authentication. You need to ensure that only authorized clients can access the integration. Which configuration should you apply?

- A. Set up an IP whitelist in the OIC instance, allowing only specific IP addresses to access the integration.
- B. Encrypt the payload using a custom encryption algorithm and provide the decryption key to authorized clients.
- **C. Configure the REST Adapter with a Basic Authentication or OAuth 2.0 security policy and provide the required credentials.**
- D. Enable Cross-Origin Resource Sharing (CORS) and set an API key in the REST Adapter configuration.

Answer: C

Explanation:

Configuring Basic Authentication or OAuth 2.0 is the most appropriate and secure method to authenticate clients accessing your OIC integration via a REST trigger.

NEW QUESTION # 75

When creating integrations in Oracle Integration Cloud (OIC), a visual mapper enables you to map element nodes between applications by dragging source element nodes onto target element nodes.

Which statement is NOT true about the OIC Data Mapper functionality?

- A. The data structure for the target service is always displayed on the right side in the Designer view.
- B. When you navigate to the mapper and select a target element, Expression Builder launches in a user-friendly mode by default.
- C. All transformation mappings use eXtensible Stylesheet Language (XSL).
- D. In the Designer view, the Sources section contains data structures of all available data objects, which includes integration metadata, tracking variables, global variables, and integration property values.
- **E. All Source and Target data objects are represented internally as JSON structures.**

Answer: E

Explanation:

Not all Source and Target data objects are represented as JSON structures in OIC; XML and other data formats are also supported. The rest of the statements are true regarding the OIC data mapper functionality.

NEW QUESTION # 76

You have an Oracle Integration Cloud (OIC) synchronous integration flow that updates external systems with several invocations. However, several of your OIC integration clients are reporting that they are experiencing timeouts waiting for the response confirmation from this processing. Which is a legitimate strategy to mitigate this issue?

- A. Change the implementation logic to invoke multiple fine-grained external API calls within a single loop.
- **B. Change the design implementation strategy to an asynchronous flow that provides a separate notification to clients when the processing is complete.**
- C. Increase the blocking timeout within the OIC integration settings to allow for extended time.

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

Timeouts in synchronous flows:

Option A: Increasing timeouts might help but doesn't address efficiency and risks longer delays.

Option B: Fine-grained calls in a loop could worsen performance, increasing latency.

Option C: Switching to an asynchronous flow decouples client waits from processing, using callbacks or notifications- a proven mitigation strategy.

C aligns with best practices for responsiveness.

NEW QUESTION # 77

There are use cases in which you need to perform an advanced XSLT task that you cannot perform in the Oracle Integration Cloud (OIC) data mapper. To perform the advanced mapping tasks, you decide to use an external XSLT mapper and then import the .xsl file back to your integration. What is NOT a valid consideration when handling this use case?

- A. Once the advanced mapping is complete, you must import the entire integration that contains the updated .xsl files.
- B. You must export the entire integration that contains one or more .xsl files.
- **C. The exported archive must be imported into an Oracle Service Bus project in JDeveloper.**
- D. The exported archive file can include a map file that is largely complete in content or a map file that is empty of content.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

Advanced XSLT in OIC requires external tools. Let's analyze:

A: True-exported maps can be complete or empty templates.

B: False-not required; XSLT can be edited in any editor and reimported directly.

C: True-entire integration must be reimported with updated XSLT.

NEW QUESTION # 78

You are configuring an ERP Cloud Adapter connection invoke action within an Oracle Integration Cloud (OIC) integration. How many child resources can you select?

- A. 0
- B. 1
- C. 2
- **D. Unlimited**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Child Resources:

A: True-no fixed limit.

NEW QUESTION # 79

.....

For the convenience of the Exams candidates, the difficult portions of the syllabus have been explained with the help of experts to be simplified. One remarkable feature of 1Z0-1042-25 actual dumps questions and answers is their similarity with the real exam scenario. They not only give you understanding of the 1Z0-1042-25 Exams but also impart you an opportunity to master it. To enhance further your exam ability and strengthen your learning, you can benefit yourself getting practice Oracle real dumps.
