最新的 Salesforce Administrator Slack-Admn-201 免費考試真題 (Q141-Q146):

問題 #141

You're a Workspace Admin cleaning up inactive channels.

You find a channel inactive for nine months with important content and one member remaining.

What should you do?

- A. Notify the one channel member, then rename the channel and add #archived as a prefix.
- **B. Notify the one channel member, then archive the channel.**
- C. Notify the one channel member, then delete the channel.
- D. Notify the one channel member that you are keeping the channel active, but limiting posting permissions to admins only.

答案: B

解題說明:

Slack's guidance for handling inactive channels states:

"Archiving a channel preserves its content and history, allowing it to remain searchable without accepting new posts." Deleting (A) would permanently remove the content. Renaming or limiting posting (C, D) are not standard clean-up procedures for inactive channels.

問題 #142

A few months ago, a team of developers at Blue Inc identified a new issue during testing and created a public channel called #bug-cricket to communicate about the issue.

They may need to reference the history in the future. Of note, there has not been any new activity in #bug-cricket for months, and the bug case has been closed.

What should the team do with #bug-cricket?

- A. Delete the channel; messages from a deleted channel are still available via search.
- B. Convert the channel to private, and then archive it; members of the channel will retain access to the files.
- **C. Archive the public channel; anyone can still browse the conversation history in Slack, and messages will appear in search results.**
- D. Remove all members from the channel, and then archive it; this way, members can find messages via search but will not be able to browse the channel history itself.

答案: C

解題說明:

The best practice for completed projects that may need to be referenced later is:

"Archive the public channel. Archived channels remain searchable and can be browsed for historical reference, but new posts are disabled." Deleting the channel would risk losing accessibility to discussions, and unnecessary privacy changes would confuse users.

問題 #143

The Slack implementation team at Large Inc is confirming all of the settings on their new Enterprise Grid organization and wants to make sure that they have appropriately involved the Security team in any critical security decisions.

Which TWO of the following settings are most critical to discuss with their Security team? (Choose two.)

- A. Who is allowed to add custom emoji
- **B. Whether to enable admin-approved apps**
- C. Who can create and archive channels
- **D. Who can invite new members**

答案: B,D

解題說明:

Security-critical settings involve decisions that could expose the organization to risk through external access or the addition of third-party apps. Slack documentation specifies:

"App management and member invitation settings are critical security configurations. Restricting who can add apps (admin-approved apps) and who can invite new members ensures better control over external access and data exposure." Custom emoji (B) and channel creation (C) impact user experience but are not considered critical security matters.

問題 #144

You're a Workspace Owner on the Slack Business+ plan.

Your company receives a report indicating the leak of trade secrets and needs to urgently investigate by reviewing Slack content in public channels.

What is the best way to quickly handle this request?

(Select the best answer.)

- A. Contact Slack, and apply to export data from all channels and conversations, including private channels and direct messages (DMs).
- **B. Use the Import/Export Data tool under workspace settings to export the required public channel data.**
- C. Contact Slack, and request access to export the required public channel data.
- D. Use the Discovery APIs to export the required public channel data.

答案： B

解題說明：

Slack's documentation for the Business+ plan specifies:

"Workspace Owners can use the standard Import/Export Data tool to export data from public channels without needing to contact Slack or request additional permissions." Discovery APIs (D) are only available on the Enterprise Grid plan. A and B would only apply for more extensive exports (such as private channels, which would require special approval, typically for compliance or legal reasons).

問題 #145

Your organization's Head of Customer Service wants to better support internal collaboration between service agents working through high-priority customer tickets.

As a Workspace Admin, what recommendation should you provide to help service agents collaborate more efficiently in Slack and reduce meetings?

- **A. Encourage service agents to use Huddles when troubleshooting high-priority customer tickets.**
- B. Enable service agents to post Clips in team channels to provide troubleshooting demos for high-priority customer tickets.
- C. Enable service agents to create a new channel for each high-priority customer ticket and use emoji reactions to expedite responses.
- D. Advise service agents to ask for help in their team channel and troubleshoot high-priority customer tickets in thread.

答案： A

解題說明：

Slack recommends:

"Use Huddles for lightweight, real-time, informal discussions to troubleshoot quickly without needing to schedule formal meetings." This directly helps service agents collaborate live without adding overhead.

Options A and C are good for async work but do not replace real-time collaboration. Threads (D) are useful but are slower than live discussions.
