

Practice 2V0-17.25 Engine & 2V0-17.25 Test Collection Pdf

Pass VMware 2V0-17.25 Exam | Latest 2V0-17.25 Dumps & Practice Exams - Cert007

Issues

Host in Isolation Response	Host in Isolation Response
Host in Failover State	Host in Failover State
Host in Unreachable State	Host in Unreachable State

Troubleshooting Steps

Examine NIC teaming and load balancing configuration

Verify the port group settings and VLAN configuration

Check physical network cables and switch port status

6. DRAG DROP

Put the following steps in the correct order to update the driver/firmware in vSAN.

Verify that the new driver and firmware versions are active and the host is functioning correctly.	Step 1
Download the latest driver and firmware from the hardware vendor's website.	Step 2
Apply the firmware update to the host using the vendor's update tool.	Step 3
Plan for a maintenance window to perform the update.	Step 4
Check the current driver and firmware versions using the vSphere Client.	Step 5
Reboot the host to complete the update process.	Step 6
Update the driver using the vSphere Lifecycle Manager (vLCM)	Step 7

Answer:

5 / 11

2026 Latest Test4Sure 2V0-17.25 PDF Dumps and 2V0-17.25 Exam Engine Free Share: <https://drive.google.com/open?id=1klpF5ujthrwM4EKRZQH2MQ66rXKqcWT6>

To keep up with the newest regulations of the 2V0-17.25 exam, our experts keep their eyes focusing on it. Our 2V0-17.25 exam torrent are updating according to the precise of the real exam. Our 2V0-17.25 test prep to help you to conquer all difficulties you may encounter. Once you choose our 2V0-17.25 Quiz torrent, we will send the new updates for one year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.

Topic 2	<ul style="list-style-type: none"> VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 3	<ul style="list-style-type: none"> Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 4	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

VMware 2V0-17.25 Questions: Fosters Your Exam Passing Skills [2026]

We promise you that if you fail to pass your exam after using 2V0-17.25 exam materials, we will give you refund. We are pass guarantee and money back guarantee. Moreover, 2V0-17.25 training materials cover most of knowledge points for the exam, and you can master the major knowledge points as well as improve your professional ability after practicing. 2V0-17.25 Exam Materials contain both questions and answers, and it's convenient for you to have a quickly check after practicing. We also have online and offline chat service, if you have any questions about 2V0-17.25 exam dumps, you can consult us.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q51-Q56):

NEW QUESTION # 51

An administrator is tasked with deploying a new VMware Cloud Foundation (VCF) instance.

The management domain is designed to be created with three virtual distributed switches (VDS) configured as follows:

- VDS1 - used for management and vMotion traffic
- VDS2 - used for vSAN traffic
- VDS3 - used for NSX Overlay traffic

What action would the administrator take to deploy the designed configuration?

- A. vSphere Distributed Switch Profile 2 must be selected in the VCF Deployment parameter workbook.
- **B. A JSON file must be prepared with the defined configuration and used to run the bring-up process.**
- C. The design must be changed to ensure vSAN and NSX overlay traffic are on the same VDS.
- D. The ESXi hosts have to be configured with twelve physical NICs to ensure redundancy.

Answer: B

NEW QUESTION # 52

An administrator has been tasked with configuring Single Sign-On (SSO) to a VMware Cloud Foundation (VCF) instance to provide Role-Based Access Control for a team of cloud administrators.

Once the initial configuration of VCF SSO has been completed, which three components must the administrator assign service roles in order to allow elevated access to the VCF management components? (Choose three.)

- A. VCF Operations
- B. VMware NSX Manager
- C. VMware ESX
- D. VMware vSAN
- E. VMware vCenter
- F. VCG Installer

Answer: A,B,E

Explanation:

After VCF Single Sign-On is configured, elevated administrative access is granted by assigning service roles on the core management components that enforce RBAC. VMware NSX Manager requires role assignments to manage networking and security services, VMware vCenter requires role assignments for compute and cluster administration, and VCF Operations requires service roles to access and manage monitoring, analytics, and lifecycle-related operational capabilities across the VCF instance.

NEW QUESTION # 53

An administrator is tasked with migrating a set of virtual machines between data centers using HCX.

To minimize downtime and ensure data consistency, which two HCX migration options should be considered? (Choose two.)

- A. HCX Bulk Migration
- B. HCX vMotion
- C. HCX Network Extension
- D. HCX Cold Migration
- E. HCX Replication Assisted vMotion (RAV)

Answer: C

Explanation:

VM storage policies in a VMware vSphere environment are used to define and enforce specific storage requirements for virtual machines, such as performance (e.g., IOPS), availability (e.g., RAID levels), and redundancy. These policies ensure that VMs are placed on storage that meets their particular needs and that storage resources are utilized effectively.

NEW QUESTION # 54

During a routine check, an administrator observes that several VMs are reporting high memory usage in VMware Aria Operations. They need to verify if the high memory usage is due to memory contention. What actions should be taken in VMware Aria Operations to verify this?

- A. Analyze the storage I/O performance.
- B. Check the memory usage and ballooning metrics.
- C. Review the CPU ready time.
- D. Look at the network throughput.

Answer: B

Explanation:

To verify if high memory usage is due to memory contention, the administrator should check the memory usage and ballooning metrics in VMware Aria Operations. Ballooning occurs when the hypervisor reclaims memory from a virtual machine due to memory contention, and monitoring these metrics can help identify whether the VMs are experiencing memory pressure or being forced to swap memory.

NEW QUESTION # 55

An administrator is tasked with ensuring the security of network traffic during the migration of virtual machines (VMs) to prevent any potential interception or tampering of data.

What specific feature or configuration should the administrator enable to safeguard the integrity and confidentiality of the network traffic involved in VM migration?

- A. Virtual Machine Encryption
- B. vSphere Distributed Resource Scheduler

- C. Encrypted vSphere vMotion
- D. vSphere High Availability (HA)

Answer: C

Explanation:

Enabling Encrypted vSphere vMotion encrypts the vMotion network traffic, ensuring the confidentiality and integrity of data as it travels between hosts.

NEW QUESTION # 56

.....

Nowadays in this information-based world the definition of the talents has changed a lot and the talents mean that the personnel boost both the knowledge in 2V0-17.25 area and the practical abilities now. With our 2V0-17.25 exam braindumps, you can get what you want. Our 2V0-17.25 Study Materials are easy to be mastered and boost varied functions. We compile Our 2V0-17.25 preparation questions elaborately and provide the wonderful service to you thus you can get a good learning and preparation for the exam.
