With our Platform-App-Builder study questions, you can easily get your expected certification as well as a brighter future.

Salesforce Certified Platform App Builder Sample Questions (Q72-Q77):

NEW QUESTION # 72

The Recruiting team at AW Computing captures the job acceptance and date of hire of a candidate on the Job Application custom object. Once the candidate accepts the recruiter's job offer, the date of hire should be entered and not be changed on subsequent record edit.

Which validation formula should the app builder use?

- A. NOT(ISCLANK(Job_Accepted_c)) && ISCHANGED(Hire_Date_c)
- B. (ISBLANK(Job_Accepted_c) II NOT(ISCANGED(Mire_Daie_c))
- C. NOT{IS&lANK(Job_Accepted_c) II ISCHANGED(Hire_Date_c)
- D. (ISBLANK(Job_Accepted_c) && NOT(ISCHANGED(Hire_Date_c))

Answer: A

NEW QUESTION # 73

After utilizing the Lightning Object Creator to create a new object, its fields, and to insert all of the data, an app builder now needs to set up the Lightning Record Page.

Which component should the app builder have on their Lightning Record Page to see all of the fields from the page layout?

- A. Record Detail
- B. Recommendations
- C. Path
- D. Highlights Panel

Answer: A

Explanation:

For an app builder who needs to ensure all fields from the page layout are visible on a Lightning Record Page after using the Lightning Object Creator, the correct component to use is:

* Record Detail (C). The Record Detail component automatically displays all fields that are included on the assigned page layout for the object. It is designed to reflect the layout configuration and is the simplest way to ensure all fields are presented as configured in the layout editor.

Highlights Panel (A) is used primarily to display key fields at the top of the record page, providing a summary view rather than full field visibility. Recommendations (B) is used for displaying prompts or suggestions and does not display record fields. Path (D) is useful for displaying stages in a process (like sales stages or service processes) and does not show field data directly.

Reference for setting up Lightning Record Pages and using components effectively:

* Lightning Record Pages: https://help.salesforce.com/articleView?id=sf.lightning_page_components.htm&type=5

NEW QUESTION # 74

Cloud Kicks has leads owned by users and queues. The sales manager wants the status to change to working when a user takes ownership.

What does an app builder need to have in the criteria to ensure the process runs without error?

- A. NOT(ISBLANK([Lead].OwnerId))
- B. [Lead].Owner:Queue.OwnerId Is Null = True
- C. BEGINS([Lead].OwnerId, „005")
- D. [Lead].Owner:User.Role Is Null = False

Answer: B

NEW QUESTION # 75

Universal Containers has created the custom objects Candidate and Interview in Salesforce to track candidates and interviews respectively. The company wants to track the total number of interviews a candidate has gone through on the candidate record without writing any code.

Which two actions should an app builder take to accomplish this requirement? (Choose two.)

- A. Use a formula field on the Candidate record to show the total number of interviews.
- B. Use a master-detail relationship between the Candidate and Interview objects.
- C. Use a lookup relationship between the Candidate and Interview objects.
- D. Use a roll-up summary field on the Candidate record to show the total number of interviews.

Answer: B,D

An app builder wants to update a field on the parent record when a child record connected via lookup is deleted. What automation should the app builder use?

- A. Process Builder
- B. Workflow rule
- C. Apex code
- D. Screen flow

Answer: C

NEW QUESTION # 77
