Top SAP C_SEC_2405 Exam Dumps, Exam C_SEC_2405 Pass4sure

1.Which cloud-based SAP solution helps organizations control their data across various cloud platforms and on-premise data sources?
A. SAP Identity Access Governance
B. SAP Privacy Governance
C. SAP Data Custodian
D. SAP Information Steward
Answer: C

2.Which cybersecurity type does NOT focus on protecting connected devices?
A. Cloud security
B. Application security
C. Network security
D. Iot security
Answer: B

3.What happens to data within SAP Enterprise Threat Detection during the aggregation process? Note: There are 3 correct answers to this question.
A. It is prioritized.
B. It is pseudonymized.
C. It is categorized.
D. It is normalized.
E. It is enriched.
Answer: B D E

4.What are some security safeguards categories? Note: There are 3 correct answers to this question.
A. Physical
B. Access Control
C. Organizational
D. Technical
E. Financial
Answer: A B D

5.Which of the blowing functions within SAP GRC Access Control support access certification and review? Note: There are 2 correct answers to the Question.
A. Role Ream
B. GO
C. Review CI User Reaffirm
D. Role Review
Answer: C D

6.Which solution analyzes an SAP system's administrative areas to safeguard against potential threats?
A. SAP EarlyWatch Alert
B. SAP Enterprise Threat Detection
C. SAP Code Vulnerability Analyzer

Our passing rate is very high to reach 99% and our C_SEC_2405 exam torrent also boost high hit rate. Our C_SEC_2405 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our C_SEC_2405 study questions are linked tightly with the exam papers in the past and conform to the popular trend in the industry. Our product convey you more important information with less amount of the questions and answers. Thus we can be sure that our C_SEC_2405 guide torrent are of high quality and can help you pass the exam with high probability.

We learned that a majority of the candidates for the C_SEC_2405 exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the C_SEC_2405 exam. Taking this into consideration, we have tried to improve the quality of our C_SEC_2405 training materials for all our worth. Now, I am proud to tell you that our C_SEC_2405 Training Materials are definitely the best choice for those who have been yearning for success but without enough time to put into it. There are only key points in our C_SEC_2405 training materials.

Exam C_SEC_2405 Pass4sure, Real C_SEC_2405 Exam Questions

Are you struggling to prepare SAP certification C_SEC_2405 exam? Do you want to achieve the goal of passing SAP certification C_SEC_2405 exam as soon as possible? You can choose the training materials provided by Real4test. If you choose Real4test, passing SAP Certification C_SEC_2405 Exam is no longer a dream.

SAP C_SEC_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 2	• Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 3	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
Topic 4	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

SAP Certified Associate - Security Administrator Sample Questions (Q30-Q35):

NEW QUESTION # 30
Which cryptographic libraries are provided by SAP? Note: There are 2 correct answers to this question.

- A. SAPCRYPTOLIB
- B. SecLib
- C. CommonCryptoLib
- D. Cryptlib

Answer: A,C

Explanation:
SAP provides two cryptographic libraries: CommonCryptoLib and SAPCRYPTOLIB. CommonCryptoLib is a modern, versatile library used across SAP systems for cryptographic operations, such as encryption, digital signatures, and secure communication, supporting protocols like TLS and SNC. It is designed for high performance and compliance with current security standards. SAPCRYPTOLIB, an earlier library, provides similar cryptographic functions, including encryption and authentication, and is used in older SAP systems or specific scenarios requiring legacy support. Both libraries ensure secure data handling and communication within SAP environments. SecLib and Cryptlib are not SAP-provided libraries; they may exist in other contexts but are not part of SAP's cryptographic framework. By offering CommonCryptoLib and SAPCRYPTOLIB, SAP ensures robust security for data protection, supporting compliance with regulatory requirements and safeguarding sensitive information across cloud and on-premise SAP systems, aligning with industry-standard cryptographic practices.

NEW QUESTION # 31
Which of the following services does the Identity Authentication Service provide? Note: There are 2 correct answers to this question.

- A. Central User Repository
- B. Authentication

- C. Policy refinement
- D. Single Sign-On

Answer: B,D

Explanation:
The SAP Identity Authentication Service provides Authentication and Single Sign-On (SSO) services.
Authentication verifies user identities by validating credentials, such as usernames and passwords, or integrating with external identity providers, ensuring secure access to SAP cloud applications. Single Sign-On enables users to access multiple SAP and non-SAP systems with a single set of credentials, streamlining user experience and reducing authentication overhead while maintaining security. These services are core to the Identity Authentication Service's role in SAP's cloud ecosystem, supporting secure and efficient access management. Policy refinement is not a function of this service, as it focuses on policy enforcement rather than creation. A Central User Repository is typically managed by other systems, like SAP Cloud Identity Services, not the Identity Authentication Service. By offering Authentication and SSO, the service ensures robust identity verification and seamless access across cloud-based SAP solutions, aligning with modern security standards and enhancing user productivity.

NEW QUESTION # 32
Which object type is assigned to activated OData services in transaction SU24?

- A. IWSV
- B. HTTP
- C. G4BA
- D. IWSG

Answer: A

Explanation:
* Context:Activated OData services are linked with specific object types for authorization maintenance.
* Solution Explanation:
* IWSV:Assigned to activated OData services in SU24, representing individual service definitions.
SAP Security References:
* SAP SU24 Role Maintenance Guide
* SAP Gateway and OData Authorization Documentation

NEW QUESTION # 33
Which application in SAP S/4HANA Cloud Public Edition allows you to upload employee information independent of the customers' HR system?

- A. Manage Workforce app
- B. Display Technical Users app
- C. Maintain Business User app
- D. Identity and Access Management app

Answer: A

NEW QUESTION # 34
Following an upgrade of your SAP S/4HANA on-premise system to a higher release, you perform a Modification Comparison using SU25.
What does this comparison do?

- A. It compares the Role Maintenance data from the current release with the data for the previous release and allows you to adjust any custom default values in tables USOBX and USOBT.
- B. It compares your changes to the SAP defaults in USOBX_C and USOBT_C with the new SAP defaults in the current release and allows you to make adjustments.
- C. It compares your changes to the SAP defaults in USOBX and USOBT with the new SAP defaults in the current release and allows you to make adjustments.
- D. It compares the Role Maintenance data from the previous release with the data for thecurrent release and writes any new default values in tables USOBX_C and USOBT_C.

Answer: C

Explanation:
* Context:The SU25 transaction is used after an SAP system upgrade to align role and authorization configurations with new release defaults.
* Solution Description:
* SU25 compares existing changes in tablesUSOBXandUSOBT(default authorization checks and field values) against the new defaults in the upgraded release. This allows administrators to adjust roles and authorization settings accordingly.
SAP Security References:
* SAP SU25 Post-Upgrade Guide
* SAP Authorization Management Documentation

NEW QUESTION # 35

......

After years of unremitting efforts, our C_SEC_2405 exam materials and services have received recognition and praises by the vast number of customers. An increasing number of candidates choose our C_SEC_2405study materials as their exam plan utility. There are many advantages for you to look for and admire. The most important and most candidate may concern is the pass rate of our C_SEC_2405 Study Guide. It is unmarched high as 98% to 100%. So choose our C_SEC_2405 practice engine, you are more confident to pass.
