Exam Type Qualification
Format Proctored, closed book exam
Credential Hitachi Vantara Qualified Professional - VSP 5000 Series Installation
Validity 3 years
Delivery Criterion Webassessor System*
Questions 35
Passing Score 65%
Duration 60 minutes
Cost US \$100 or equivalent in local currency (plus local tax, depending on location)
Supporting Material • 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1	System Architecture
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2	System Pre-installation and Installation
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3	System Configuration
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

It is very convenient for you to use the online version of our HQT-4160 real test. If you realize convenience of the online version, it will help you solve many problems. On the one hand, the online version is not limited to any equipment. You are going to find the online version of our HQT-4160 Test Prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our HQT-4160 study materials, you don't need to worry about no WLAN network.

The Hitachi HQT-4160 Exam is intended for IT professionals, system administrators, and technical experts who have experience with Hitachi storage systems and are capable of deploying, configuring, and managing VSP 5000 series. Successful candidates are awarded the Hitachi Vantara Qualified Professional certification, which is recognized globally as a demonstration of expert-level technical proficiency.

Instant HQT-4160 Access & Valid HQT-4160 Exam Labs

It is impossible to pass HQT-4160 exam without efforts and time, but our Exams4Collection team will try our best to reduce your burden when you are preparing for HQT-4160 exam. The normal model test and understandable answer analysis will make you secretly master the exam skills to pass HQT-4160 exam. In order to reduce more stress for you, we promise you if you fail the

exam, what you need to do is to send your scanned unqualified transcripts to our email box. After confirmation, we will immediately refund all the money that you purchased the HQT-4160 Exam Materials. Exams4Collection is worthy your trust.

Hitachi HQT-4160 certification exam is designed for IT professionals who are interested in demonstrating their expertise in the installation of the Hitachi Vantara Qualified Professional - VSP 5000 series. Hitachi Vantara Qualified Professional - VSP 5000 Series Installation certification exam is an industry-standard certification program that aims to help IT professionals to gain the knowledge and skills required for the installation of the Hitachi VSP 5000 series. HQT-4160 Exam covers various topics such as installation planning, hardware installation, software installation, and configuration.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q19-Q24):

NEW QUESTION # 19

A drive in a VSP 5000 series storage system is blocked. The microcode is now searching for a matching spare drive. What are the three requirements for the spare drive? (Choose three.)

- A. It must have the same or a larger capacity.
- B. It must be located in the same DKU.
- C. It must be defined in the SVP Spare Drive Mapping table.
- D. It must have the same rotation speed (RPM).
- E. It must be of the same type (NL-SAS, SSD, FMD etc.).

Answer: A,D,E

Explanation:

It must have the same or a larger capacity.

The spare drive must be equal to or larger in capacity than the failed drive to ensure data can be fully rebuilt.

It must have the same rotation speed (RPM).

Matching rotation speed is required to maintain consistent performance and RAID group behavior.

It must be of the same type (NL-SAS, SSD, FMD etc.).

The spare drive must be the same drive type as the failed drive to ensure compatibility and maintain system reliability.

NEW QUESTION # 20

What are essential steps in the VSP 5000 parts-replacement process? (Choose Two)

- A. Documenting the process
- B. Verifying part numbers
- C. Testing the new parts
- D. Configuring network settings

Answer: B,C

Explanation:

When performing a parts replacement on the Hitachi VSP 5000 storage system, certain steps are critical to ensure safety, compatibility, and system integrity:

Verifying part numbers (A)

Ensures the replacement part is compatible with the system.

Prevents accidental installation of incorrect components, which could cause failures or downtime.

Testing the new parts (C)

After installation, verify that the component functions correctly.

May involve self-tests or diagnostic checks provided by the system.

Confirms that the system operates as expected before returning to normal service.

NEW QUESTION # 21

What is the primary function of management software in VSP 5000 storage systems?

- A. To enhance the cooling efficiency of the system
- B. To increase the storage capacity automatically
- C. To manage and configure storage resources

- D. To physically secure the storage system

Answer: C

Explanation:

Management software for the Hitachi VSP 5000 is used to administer, monitor, and configure the storage environment.

Common management tools include platforms from Hitachi Vantara such as storage management suites that allow administrators to:

Create and manage storage volumes (LUNs)

Configure RAID groups and storage pools

Assign storage to hosts

Monitor system health and performance

Manage replication and data protection

Perform firmware updates and system configuration

These tools provide a centralized interface to control and optimize the storage system.

NEW QUESTION # 22

Which document is essential to review before starting the pre-installation process for a VSP 5000 storage system?

- A. The latest software compatibility list
- B. The customer service plan
- **C. The installation site requirements**
- D. The annual maintenance contract

Answer: C

Explanation:

Before beginning the pre-installation process for a Hitachi VSP 5000, it is crucial to review the installation site requirements. This ensures that the physical environment is suitable for the system and meets operational standards. Key factors include:

Rack space and floor loading for the storage system

Power requirements (voltage, redundancy, and distribution)

Cooling and airflow specifications

Network connectivity requirements

Environmental considerations such as humidity, temperature, and dust control Reviewing this document helps avoid delays, prevent equipment damage, and ensures a smooth installation.

NEW QUESTION # 23

A customer wants to upgrade a diskless VSP 5100 to a VSP 5500. Which three types of components will be added during the upgrade? (Choose three.)

- A. Hitachi Interconnect Edges (HIEs)
- **B. Channel Boards (CHBs)**
- **C. Controllers (CTLs)**
- **D. Interconnect Switches (ISWs)**
- E. Hitachi Service and Network Box (HSNBX)

Answer: B,C,D

NEW QUESTION # 24
