## Google Associate-Cloud-Engineer Exam Experience: Google Associate Cloud Engineer Exam - ExamBoosts Updated Download

Consider sitting for an Google Associate Cloud Engineer Exam exam and discovering that the practice materials you've been using are incorrect and useless. The technical staff at ExamBoosts has gone through the Google certification process and knows the need to be realistic and exact. Hundreds of professionals worldwide examine and test every Google Associate-Cloud-Engineer Practice Exam regularly. These practice tools are developed by professionals who work in fields impacting Google Google Associate Cloud Engineer Exam, giving them a foundation of knowledge and actual competence. Our Google Associate-Cloud-Engineer exam questions are created and curated by industry specialists.

## Google Associate Cloud Engineer Exam Sample Questions (Q80-Q85):

### NEW QUESTION # 80

You are developing a new web application that will be deployed on Google Cloud Platform. As part of your release cycle, you want to test updates to your application on a small portion of real user traffic. The majority of the users should still be directed towards a stable version of your application. What should you do?

- A. Deploy the application on App Engine For each update, create a new service Configure traffic splitting to send a small percentage of traffic to the new service.
- B. Deploy the application on Kubernetes Engine For a new release, update the deployment to use the new version
- C. Deploy the application on Kubernetes Engine For a new release, create a new deployment for the new version Update the service to use the new deployment.

- D. Deploy my application on App Engine. For each update, create a new version of the same service. Configure traffic splitting to send a small percentage of traffic to the new version.

**Answer: D**

### NEW QUESTION # 81

Several employees at your company have been creating projects with Cloud Platform and paying for it with their personal credit cards, which the company reimburses. The company wants to centralize all these projects under a single, new billing account. What should you do?

- A. Contact [cloud-billing@google.com](mailto:cloud-billing@google.com) with your bank account details and request a corporate billing account for your company.
- B. Create a ticket with Google Support and wait for their call to share your credit card details over the phone.
- C. In the Google Platform Console, go to the Resource Manager and move all projects to the root Organization.
- D. In the Google Cloud Platform Console, create a new billing account and set up a payment method.

**Answer: D**

### NEW QUESTION # 82

You have successfully created a development environment in a project for an application. This application uses Compute Engine and Cloud SQL. Now, you need to create a production environment for this application. The security team has forbidden the existence of network routes between these 2 environments, and asks you to follow Google-recommended practices. What should you do?

- A. Create a new project, enable the Compute Engine and Cloud SQL APIs in that project, and replicate the setup you have created in the development environment.
- B. Create a new production subnet in the existing VPC and a new production Cloud SQL instance in your existing project, and deploy your application using those resources.
- C. Create a new project, modify your existing VPC to be a Shared VPC, share that VPC with your new project, and replicate the setup you have in the development environment in that new project, in the Shared VPC.
- D. Ask the security team to grant you the Project Editor role in an existing production project used by another division of your company. Once they grant you that role, replicate the setup you have in the development environment in that project.

**Answer: C**

### NEW QUESTION # 83

Your coworker has helped you set up several configurations for gcloud. You've noticed that you're running commands against the wrong project. Being new to the company, you haven't yet memorized any of the projects. With the fewest steps possible, what's the fastest way to switch to the correct configuration?

- A. Run gcloud config list followed by gcloud config activate.
- B. Re-authenticate with the gcloud auth login command and select the correct configurations on login.
- C. Run gcloud config configurations list followed by gcloud config configurations activate.
- D. Run gcloud configurations list followed by gcloud configurations activate .

**Answer: C**

Explanation:

as gcloud config configurations list can help check for the existing configurations and activate can help switch to the configuration. gcloud config configurations list lists existing named configurations

gcloud config configurations activate activates an existing named configuration. Obtains access credentials for your user account via a web-based authorization flow. When this command completes successfully, it sets the active account in the current configuration to the account specified. If no configuration exists, it creates a configuration named default.

## NEW QUESTION # 84

Your company has a Google Cloud Platform project that uses BigQuery for data warehousing. Your data science team changes frequently and has few members. You need to allow members of this team to perform queries. You want to follow Google-recommended practices. What should you do?

- A. 1. Create a dedicated Google group in Cloud Identity.2. Add each data scientist's user account to the group.3. Assign the BigQuery dataViewer user role to the group.
- B. 1. Create a dedicated Google group in Cloud Identity.2. Add each data scientist's user account to the group.3. Assign the BigQuery jobUser role to the group.
- C. 1. Create an IAM entry for each data scientist's user account.2. Assign the BigQuery jobUser role to the group.
- D. 1. Create an IAM entry for each data scientist's user account.2. Assign the BigQuery dataViewer user role to the group.

**Answer: B**

Explanation:

Explanation

Read the dataset's metadata and to list tables in the dataset. Read data and metadata from the dataset's tables.

When applied at the project or organization level, this role can also enumerate all datasets in the project.

Additional roles, however, are necessary to allow the running of jobs.

BigQuery Data Viewer

(roles/bigquery.dataViewer)

When applied to a table or view, this role provides permissions to:

Read data and metadata from the table or view.

This role cannot be applied to individual models or routines.

When applied to a dataset, this role provides permissions to:

Read the dataset's metadata and list tables in the dataset.

Read data and metadata from the dataset's tables.

When applied at the project or organization level, this role can also enumerate all datasets in the project.

Additional roles, however, are necessary to allow the running of jobs.

Lowest-level resources where you can grant this role:

Table

View

BigQuery Job User

(roles/bigquery.jobUser)

Provides permissions to run jobs, including queries, within the project.

Lowest-level resources where you can grant this role:

Project

to run jobs <https://cloud.google.com/bigquery/docs/access-control#bigquery.jobUser> databaseUser needs additional role permission to run jobs <https://cloud.google.com/spanner/docs/iam#spanner.databaseUser>
