Because if you can get a certification, it will be help you a lot, for instance, it will help you get a more job and a better title in your company than before, and the SC-300 Certification will help you get a higher salary. We believe that our company has the ability to help you successfully pass your exam and get a SC-300 certification by our SC-300 exam torrent.

Earning the Microsoft SC-300 Certification is a valuable credential for IT professionals who want to advance their career in cloud-based identity and access management. Microsoft Identity and Access Administrator certification demonstrates that the candidate has the skills and knowledge necessary to design, implement, and manage identity and access solutions in Microsoft Azure. Additionally, Microsoft Certified Identity and Access Administrators are in high demand as organizations increasingly rely on cloud-based identity and access solutions to secure their digital assets.

Microsoft Identity and Access Administrator Sample Questions (Q297-Q302):

NEW QUESTION # 297
You have a Microsoft 365 tenant.
All users have mobile phones and laptops.
The users frequently work from remote locations that do not have Wi-Fi access or mobile phone connectivity. While working from the remote locations, the users connect their laptop to a wired network that has internet access.
You plan to implement multi-factor authentication (MFA).
Which MFA authentication method can the users use from the remote location?

- A. Windows Hello for Business
- B. SMS
- C. a notification through the Microsoft Authenticator app
- D. an app password

Answer: A

Explanation:
In Windows 10, Windows Hello for Business replaces passwords with strong two-factor authentication on PCs and mobile devices. This authentication consists of a new type of user credential that is tied to a device and uses a biometric or PIN.
After an initial two-step verification of the user during enrollment, Windows Hello is set up on the user's device and Windows asks the user to set a gesture, which can be a biometric, such as a fingerprint, or a PIN. The user provides the gesture to verify their identity. Windows then uses Windows Hello to authenticate users.

NEW QUESTION # 298
You have an Azure subscription named Sub1 that uses Microsoft Entra Permissions Management. Sub1 contains a user named User1. User1 is granted multiple permissions across Sub1.
You need to replace all the permissions granted to User1 with read-only permissions. The solution must minimize administrative effort.
What should you do on the Remediation tab in Permissions Management?

- A. From the Roles/Policies subtab. create a role.
- B. From the My Requests subtab, create a new request.
- C. From the Role/Policy Template subtab. create a template.
- D. From the Permissions subtab, use a quick action.

Answer: D

NEW QUESTION # 299
Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Type	In organizational unit (OU)	Description
User1	User	OU1	User1 is a member of Group1.
User2	User	OU1	User2 is not a member of any groups.
Group1	Security group	OU2	User1 and Group2 are members of Group1.
Group2	Security group	OU1	Group2 is a member of Group1.

You install Microsoft Entra Connect. You configure the Domain and OU filtering settings as shown in the Domain and OU Filtering exhibit. (Click the Domain and OU Filtering tab.)

You configure the Filter users and devices settings as shown in the Filter Users and Devices exhibit. (Click the Filter Users and Devices tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 300

You have an Azure subscription named Sub1 that contains three users named User1. User2, and User3. Sub1 has a storage account named storage1 that contains the resources shown in the following table.

Sub1 contains the users shown in the following table.

Which users can read File1, and which users can read File2? To answer, select the appropriate options in the answer are a. NOTE; Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 301

You have a custom cloud app named App1 that is registered in Azure Active Directory (Azure AD).
App1 is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE:Each correct selection is worth one point.

Answer:

Explanation:
Explanation:
< [answer choice] can access App1 from the homepage URL: # Only users listed on the Users and groups blade App1 will appear in the Microsoft Office 365 app launcher for [answer choice]: # Only users listed on the Users and groups blade

According to Microsoft's official documentation and the SC-300: Microsoft Identity and Access Administrator study guide, when you register and configure an enterprise application in Azure Active Directory, two specific settings directly influence user visibility and access:
* User assignment required?
* If this option is set to Yes, Azure AD requires users to be explicitly assigned to the app before they can sign in.
* Only users or groups listed on the Users and groups blade (app assignments) will have access.
* This means that even if the application is visible in Azure AD, users not assigned to it cannot authenticate or launch it.
* Visible to users?
* If set to Yes, the app appears in the Microsoft 365 app launcher (also known as the My Apps portal).
* However, when "User assignment required" is Yes, the visibility is limited only to those who are assigned to the app.
From the exhibit:
* "User assignment required?" = Yes
* "Visible to users?" = Yes
This configuration implies:
* Only assigned users (those listed on the Users and groups blade) can sign in to App1 via the homepage URL.
* App1 will appear in the Microsoft 365 app launcher (My Apps portal) only for those same assigned users.
As per Microsoft Learn documentation ("Manage enterprise apps in Azure AD"):
"When User assignment required is set to Yes, only users assigned to the application can access it. If Visible to users is also Yes, the application will appear in My Apps for those assigned users."
