## Clearer Talend-Core-Developer Explanation - 100% Professional Questions Pool

Our Talend-Core-Developer exam torrent is highly regarded in the market of this field and come with high recommendation. Choosing our Talend-Core-Developer exam guide will be a very promising start for you to begin your exam preparation because our Talend-Core-Developer practice materials with high repute. We remunerate exam candidates who fail the Talend-Core-Developer Exam Torrent after choosing our Talend-Core-Developer study tools, which kind of situation is rare but we still support your dream and help you avoid any kind of loss. Just try it do it, and we will be your strong backup.

## Talend Core Certified Developer Exam Sample Questions (Q47-Q52):

### NEW QUESTION # 47

Which methods can you use to specify the schema in a tFileInputDelimited component? Choose 3 answers.

- A. Drag a File delimited metadata item from the Repository onto the design workspace.
- B. Add the component, open the Component view, select the Built-in schema type, then click the Edit schema button.
- C. Add the component, then drag and drop a generic schema metadata item onto the component.
- D. Drag a generic schema metadata item onto the Designer.
- E. Add the schema to the component using the Schema Editor.

**Answer: A,B,C**

Explanation:

In Talend Studio, there are multiple methods to specify the schema for a tFileInputDelimited component. The three primary

approaches include:

A: Add the component, open the Component view, select the Built-in schema type, then click the Edit schema button.

\* Process:

\* Add the Component:

\* Drag and drop the tFileInputDelimited component onto the design workspace.

\* Access Component View:

\* Click on the component to open its Basic settings in the Component view.

\* Select Built-in Schema Type:

\* Under the 'Schema' section, choose 'Built-In' from the 'Property Type' dropdown menu.

\* Edit Schema:

\* Click the 'Edit schema' button to define the schema structure by adding columns and specifying their data types.

#### NEW QUESTION # 48

Which statements are true about the execution logs of a task running on a Remote Engine? Choose 2 answers.

- A. Logs can be downloaded from Talend Management Console.
- B. Logs are stored in an H2 database hosted on the server where the Remote Engine is running.
- C. Logs are stored in Parquet format on the server where the Remote Engine is running.
- D. Logs are stored in the file system of the server where the Remote Engine is running.

**Answer: A,D**

Explanation:

Comprehensive and Detailed Explanation:

When a task executes on a Talend Remote Engine, the execution logs are handled as follows:

\* Logs are stored in the file system of the server where the Remote Engine is running (Option A):

\* The Remote Engine writes execution logs to its local file system, typically in plain text or log formats. These logs provide detailed information about the task's execution and are essential for troubleshooting and monitoring.

\* Logs can be downloaded from Talend Management Console (Option C):

\* Talend Management Console (TMC) aggregates execution logs from Remote Engines, allowing users to access and download them directly through the TMC interface. This centralized access simplifies monitoring and debugging across multiple environments. Why not other options?

\* Option B: While some components of Talend may use H2 databases for internal purposes, execution logs are not typically stored in an H2 database on the Remote Engine server.

\* Option D: Execution logs are generally stored in plain text or standard log formats, not in Parquet format. Parquet is a columnar storage file format commonly used for efficient data processing, not for logging purposes.

#### NEW QUESTION # 49

Which action should you perform to calculate the overall Trust Score for multiple customer datasets?

- A. Mark the datasets in the dataset list, and the score updates in the detailed view.
- B. Use the search bar to filter the customer datasets, and the score will automatically update.
- C. Review the rating of selected datasets in the group tab.
- D. Use the search bar to filter the customer datasets and manually calculate the score.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

To calculate the overall Trust Score for multiple customer datasets:

\* Use the search bar to filter the customer datasets, and the score will automatically update (Option B):

\* Filtering datasets using the search functionality aggregates the Trust Scores of the selected datasets, providing an overall score for the group.

Why not other options?

\* Option A: Reviewing individual ratings does not provide an aggregated Trust Score.

\* Option C: Marking datasets does not trigger an automatic update of the aggregated score.

\* Option D: Manual calculation is unnecessary as the system provides automatic aggregation upon filtering.

### NEW QUESTION # 50

Where can you specify the remote JobServer to execute a Job?

- A. Job settings section of the Project Settings windows
- B. Run/Debug section in the Preference window
- **C. Target Exec tab in the Run view**
- D. Extra tab in the Job view

**Answer: C**

Explanation:

To specify the remote JobServer to execute a job, you need to use the Target Exec tab in the Run view of Talend Studio. The Run view allows you to configure and execute your job from Talend Studio. The Target Exec tab allows you to select whether you want to run your job locally or remotely on a JobServer. A JobServer is a server application that allows you to execute jobs remotely from Talend Studio or Talend Administration Center. To run your job on a remote JobServer, you need to select Remote Jobserver option from the drop-down menu and select or add a JobServer connection from the list.

You do not need to use Job settings section of Project Settings window, Extra tab in Job view, or Run/Debug section in Preferences window. These windows are not used to specify remote JobServer execution. The Job settings section of Project Settings window is used to configure general settings for your jobs, such as versioning, statistics, logs, etc. The Extra tab in Job view is used to configure extra features for your job, such as implicit context load, tStatCatcher, tLogCatcher, etc. The Run/Debug section in Preferences window is used to configure run/debug settings for your Talend Studio, such as JVM arguments, execution mode, etc. References: Talend Open Studio: Open-source ETL and Free Data Integration | Talend, [Run view - 7.3], [Project Settings - 7.3], [Job view - 7.3], [Preferences - 7.3]

### NEW QUESTION # 51

You built multiple Jobs in Studio, each uses its own tDBInput component to connect to a common database server, but they all use different credentials. How should you configure the tDBInput components?

- A. Set the Property type to Repository and use a common DB connection metadata.
- B. Set the Database field to Metadata.
- C. Set the Property type to Repository and replace the credentials in each component.
- **D. Set the Property type to Built-in and set all the relevant properties manually.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

When multiple Jobs require connections to the same database server but with different credentials, the recommended approach is:

\* Set the Property Type to Built-in and Set All the Relevant Properties Manually (Option C):

\* In each tDBInput component, set the 'Property Type' to 'Built-in.'

\* Manually enter the connection details, including the specific username and password required for that particular Job.

This approach ensures that each Job uses its own set of credentials, maintaining the necessary security and access controls.

### NEW QUESTION # 52

.....

You only need 20-30 hours to practice our software materials and then you can attend the exam. It costs you little time and energy. The Talend-Core-Developer exam questions are easy to be mastered and simplified the content of important information. The Talend Core Certified Developer Exam test guide conveys more important information with amount of answers and questions, thus the learning for the examinee is easy and highly efficient. The language which is easy to be understood and simple, Talend-Core-Developer Exam Questions are suitable for any learners no matter he or she is a student or the person who have worked for many years with profound experiences. So it is convenient for the learners to master the Talend-Core-Developer guide torrent and pass the exam in a short time. The amount of the examinee is large.
