많은 분들이 Network Appliance NS0-005 시험을 패스하려고 하는데 시험대비방법을 찾지 못하고 계십니다. Network Appliance NS0-005 덤프를 구매하려면 먼저 Network Appliance NS0-005 샘플문제를 다운받아 덤프 품질을 검증후 주문하시면 믿음이 생길것입니다. Network Appliance NS0-005 시험대비덤프는 IT 업계에 오랜 시간동안 종사한 전문가들의 노하우로 연구해낸 최고의 자료입니다.

Network Appliance NS0-005 시험요강:

주제	소개
주제 1	Intelligent Data Infrastructure: This domain addresses advanced solutions including cyber resiliency, data mobility, hybrid cloud protection, storage architectures, and flexible consumption models for NetApp.
주제 2	Infrastructure: This domain covers foundational concepts including basic infrastructure components, data management principles, virtualization technologies, and AI fundamentals relevant to storage environments.
주제 3	Data Storage Software: This domain focuses on NetApp's core software platforms including SANtricity, ONTAP, and StorageGRID, along with the data management tools used to operate these systems.

NS0-005인기자격증 덤프공부문제최신버전 덤프데모

Demo를 다운받아 Network Appliance NS0-005 덤프의 일부분 문제를 체험해보시고 구매하셔도 됩니다. 저희 Pass4Test에서는 Network Appliance NS0-005 덤프의 일부분 문제를 샘플로 제공해드립니다. 덤프만 열람하시면 Network Appliance NS0-005 시험패스가 가능하기에 저희 자료를 선택한걸 후회하지 않게 할 자신이 있습니다.

최신 NetApp NCTS NS0-005 무료샘플문제 (Q57-Q62):

질문 # 57

The NetApp Cloud Compliance service scans data from which two data sources? (Choose two.)

- A. Amazon S3 Glacier
- B. Azure Ultra Disk
- C. Cloud Volumes ONTAP
- D. Microsoft OneDrive

정답: A,C

질문 # 58

Which feature is characteristic of NetApp's AFF A-Series arrays? (Choose Two)

- A. High throughput for large-scale applications
- B. Built-in data compression tools
- C. Dedicated storage for email servers
- D. Optimized for low-latency applications

정답: A,D

질문 # 59

What are two NetApp on-premises data storage systems that can be discovered and managed in NetApp BlueXP? (Choose two.)

- A. Element clusters
- B. StorageGRID
- C. E-Series
- D. Astra Data Store

정답: B,C

질문 # 60

A storage administrator is configuring a new 4-node AFF A400 ONTAP cluster. The cluster uses SnapMirror replication and provisions FlexCache origin volumes. The aggregates also use NetApp BlueXP tiering to object storage.

What is the minimum number of intercluster LIFs that are required on this cluster?

- A. 0
- B. 1
- C. 2
- D. 3

정답: B

설명:

= Intercluster LIFs are logical interfaces that enable communication between clusters for data replication and caching. The minimum number of intercluster LIFs required on a cluster depends on the number of nodes, the number of IPSpaces, and the network topology.

According to the NetApp documentation, the following are the requirements for intercluster LIFs:

- At least one intercluster LIF must be configured on every node in the local cluster, and on every node in the remote cluster.

Provisioning intercluster LIFs on only some nodes of the cluster is not supported.

- Each intercluster LIF requires an IP address dedicated for intercluster communication. The IP addresses assigned to intercluster LIFs can reside in the same subnet as data LIFs or in a different subnet.

- Every intercluster LIF on every node of the local cluster should be able to connect to every intercluster LIF on every node of the remote cluster. The cluster peering topology should use full-mesh connectivity. Full-mesh connectivity means that all the Intercluster LIFs of one peer cluster can communicate with all of the Intercluster LIFs of the other peer cluster.

Based on these requirements, the minimum number of intercluster LIFs required on a 4-node cluster is 8, assuming that there is only one IPspace and a full-mesh network topology. This means that each node has one intercluster LIF that can connect to the intercluster LIFs of the other nodes in the same cluster and the remote cluster. If there are more IPSpaces or a different network topology, the number of intercluster LIFs may vary.

References = What is an Intercluster network?, Create intercluster LIFs (Beginning with ONTAP 9.3), Create intercluster interfaces on all nodes (ONTAP 9.2 or earlier)

질문 # 61

A customer wants to use FabricPool technology to tier to object storage, using their on-premises NetApp FAS system.

Which feature allows this solution?

- 정답: C**

References = FabricPool - Documentation Product Guides and Resources | NetApp, StorageGRID - Documentation Product Guides and Resources | NetApp, FabricPool best practices - NetApp

질문 # 62

Pass4Test는 몇년간 최고급 덤프품질로 IT인증덤프제공사이트중에서 손꼽히는 자리에 오게 되었습니다. Network Appliance NS0-005 덤프는 많은 덤프들중에서 구매하는 분이 많은 인기덤프입니다. Network Appliance NS0-005시험 준비중이신 분이시라면Network Appliance NS0-005한번 믿고 시험에 도전해보세요. 좋은 성적으로 시험패스하여 자격증 취득할것입니다.
