ISTQB-CTFL考試證照，免費下載ISTQB-CTFL考題

ISTQB的ISTQB-CTFL考試認證一直都是IT人士從不缺席的認證，因為它可以關係著他們以後的命運將如何。ISTQB的ISTQB-CTFL考試培訓資料是每個考生必備的考前學習資料，有了這份資料，考生們就可以義無反顧的去考試，這樣考試的壓力也就不需要那麼大，而Testpdf這個網站裏的培訓資料是考生們最想要的獨一無二的培訓資料，有了TestpdfISTQB的ISTQB-CTFL考試培訓資料，還有什麼過不了。

最新的 Foundation Level ISTQB-CTFL 免費考試真題 (Q388-Q393):

問題 #388

Which of the following BEST explains a drawback of independent testing?

- A. Having the business organization participate as an independent test team can hurt the overall testing effort since business participants are often not trained nor experienced in testing
- B. An independent test team may possess specializations in specific test types such as usability or security which detract from the overall effectiveness of the test team
- C. Due to their differing backgrounds and perspectives, an independent test team may discover defects which the developers did not uncover
- **D. An independent test team may be isolated from the rest of the development and project team**

答案：D

解題說明：

Independent testing offers several advantages, such as unbiased testing and detection of different defects. However, a drawback is that an independent test team may be isolated from the development team and project team. This can lead to communication gaps, reduced collaboration, and a lack of understanding of the project context.

According to the ISTQB Certified Tester Foundation Level (CTFL) syllabus v4.0, an independent test team may not have the same level of understanding of the system as the development team, leading to potential issues in communication and integration (ISTQB not-for-profit association).

問題 #389

During system testing phase of a word processor, a tester finds that on opening a file from a particular set of files, which are part of a critical workflow, the word processor crashes. Which of the following is the next step the tester should take prior to recording the deviation?

- A. Report the incident as is without any further action
- **B. Try to recreate the incident before reporting**
- C. Send an email to the developer and not report the bug
- D. Try to identify the code fragment causing the problem

答案: B

解題說明:

An incident is any event that occurs during testing that requires investigation. An incident report is a document that records the details of an incident. The next step the tester should take prior to recording the deviation is to try to recreate the incident before reporting. This can help confirm that the incident is reproducible and not caused by a random or external factor. This can also help gather more information about the incident, such as the steps to reproduce it, the expected and actual results, the severity and priority of the incident, or any screenshots or logs that can illustrate the incident. Trying to identify the code fragment causing the problem is not the next step the tester should take prior to recording the deviation, as this is a debugging activity that is usually performed by developers after receiving the incident report. Sending an email to the developer and not reporting the bug is not the next step the tester should take prior to recording the deviation, as this is an informal and unstructured way of communicating incidents that can lead to confusion, inconsistency or loss of information. Reporting the incident as is without any further action is not the next step the tester should take prior to recording the deviation, as this can result in incomplete or inaccurate incident reports that can hamper the investigation and resolution of incidents. 問題 #390

Which ONE of the following elements is TYPICALLY part of a test plan?

- A. A detailed report on the test results after the test project is completed.
- B. A detailed analysis of the defects found and their causes.
- **C. The budget and schedule for the test project.**
- D. A list of test logs from the test execution.

答案: C

解題說明:

Comprehensive and Detailed In-Depth Explanation: A test plan is a management document that outlines the scope, objectives, schedule, resources, and risks of the testing process. The budget and schedule (A) are essential components as they help plan resources and timeline constraints.

* (B) is incorrect because defect analysis is part of the test summary report, not the test plan.

* (C) is incorrect because final reports summarize execution, while the test plan is created before testing starts.

* (D) is incorrect because test logs are execution artifacts rather than planning elements.

A test plan guides testing activities and ensures alignment with project objectives.

問題 #391

Which of the following statements describes regression testing?

- I. Retesting of a fixed defect
- II. Testing of an already tested program
- III. Testing of new functionality in a program
- IV. Regression testing applies only to functional testing
- V. Tests that do not have to be repeatable, because they are only used once

- A. II, IV, V
- B. I, IV
- **C. II**
- D. I, III, IV

答案：C

解題說明：

Regression testing is the re-running of functional and non-functional tests to ensure that previously developed and tested software still performs as expected after a change¹ It does not involve retesting of a fixed defect, testing of new functionality, or applying only to functional testing. Tests that are used for regression testing should be repeatable, because they are used to verify the stability of the software after each change² References = ISTQB Certified Tester Foundation Level (CTFL) v4.0 Syllabus, Chapter 4, Section 4.2.2, Page 291; ISTQB Glossary of Testing Terms v4.0, Page 292

問題 #392

Manager responsibilities in formal review includes all except one of the following:

- A. Decide on the execution of reviews
- B. Planning the review
- **C. Determines if the review objectives have been met**
- D. Allocate time for review

答案：C

解題說明：

A formal review is a type of review that follows a defined process with formal entry and exit criteria and roles and responsibilities for participants. A formal review can have various roles involved, such as manager, moderator, author, reviewer and scribe. The manager responsibilities in formal review include all except one of the following:

* Planning the review (correct responsibility)
 * Determines if the review objectives have been met (incorrect responsibility)
 * Decide on the execution of reviews (correct responsibility)
 * Allocate time for review (correct responsibility) The responsibility of determining if the review objectives have been met belongs to the moderator role, not to the manager role. Verified References:
