- A. Login History
- B. Grant Account Login Access
- C. Connected App Usage
- D. Setup Audit Trail

Answer: D

Explanation:
The Setup Audit Trail is a tool that allows you to view and download a log of changes made in your org's Setup area. The log shows up to 20 fields of information for each change, such as who made it, when it was made, what type of change it was, and what values were changed. You can use the Setup Audit Trail to track configuration changes directly in production and identify any unauthorized or problematic changes. One of the changes that the Setup Audit Trail tracks is when a user grants login access to another user. This

means that you can use the Setup Audit Trail to see if any other administrators or delegated administrators are using the Log In As a User feature.
