The clients can firstly be familiar with our products in detail and then make their decisions to buy it or not.

CompTIA SecAI+ Certification Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which of the following attacks would be the best to automate with AI during dynamic application software testing (DAST)?

- A. Distributed denial-of-service (DDoS)
- **B. Payload creation**
- C. Threat modeling
- D. Data poisoning

Answer: B

Explanation:

During DAST, automating the generation of diverse, targeted attack payloads lets testers probe runtime inputs (e.g., XSS, SQLi, command injection) more thoroughly and discover vulnerabilities that manual or static tests might miss.

NEW QUESTION # 67

An AI architect reviews AI utilization and wants to improve the user experience. Which of the following should the architect review within the logs?

- A. Model accuracy
- B. Rate monitoring
- C. Access controls
- D. Data storage

Answer: A

Explanation:

To improve user experience, the architect should review model accuracy in the logs. High accuracy ensures users receive relevant, reliable responses, directly impacting satisfaction and effectiveness of the AI system.

NEW QUESTION # 68

An attacker successfully completes a denial-of-service (DoS) attack through the context window of an AI system. Thousands of characters are obfuscated and hidden behind an emoji. Which of the following techniques best mitigates this type of attack?

- A. Pattern recognition
- B. Prompt filter
- C. Fraud detection
- D. Large language model (LLM)-as-a-judge

Answer: B

Explanation:

A DoS attack through the context window relies on overwhelming the model with excessive or obfuscated input. Prompt filtering prevents such malicious or oversized inputs from being processed, ensuring that the model only receives safe, properly structured data within acceptable limits.

NEW QUESTION # 69

Which of the following requires developers to harden infrastructure to protect AI systems?

- A. Acceptable use policies
- B. Development guidelines
- C. Intake processes
- D. Configuration standards

Answer: D

Explanation:

Configuration standards define how infrastructure and systems must be securely set up and maintained. By following these standards, developers harden the environment that supports AI systems, reducing risks from misconfigurations and vulnerabilities.

NEW QUESTION # 70

Which of the following improves the observability and auditing of an AI system?

- A. Using manual detection
- B. Using anomaly detections
- C. Implementing machine learning operations (MLOps)
- D. Redeploying the model

Answer: C

Explanation:

MLOps provides structured monitoring, logging, and version control for AI models. This improves observability and ensures detailed

auditing of model behavior, data pipelines, and changes throughout the AI lifecycle.

NEW QUESTION # 71

.....

As you know, we are now facing very great competitive pressure. We need to have more strength to get what we want, and CY0-001 exam dumps may give you these things. After you use our study materials, you can get CY0-001 certification, which will better show your ability, among many competitors, you will be very prominent. The 99% pass rate is the proud result of our study materials. If you join, you will become one of the 99%. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain CY0-001 Certification. In CY0-001 exam dumps, you can do it.
