DevOps-Foundation Valid Study Guide, Exam DevOps-Foundation Quick Prep

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the

more you gain. When you pass the DevOps-Foundation exam which is well recognized wherever you are in any field, then acquire the DevOps-Foundation certificate, the door of your new career will be open for you and your future is bright and hopeful. Our DevOps-Foundation Guide Torrent will be your best assistant to help you gain your certificate. We believe that you don't encounter failures anytime you want to learn our DevOps-Foundation guide torrent.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q60-Q65):

NEW QUESTION # 60

The goal of which role is the creation of ultra-scalable and highly reliable software systems?

- A. Software engineer
- B. Site resilience engineer
- C. Product Owner
- D. Site reliability engineer

Answer: D

Explanation:
TheSite Reliability Engineer (SRE)role originated at Google and is now widely recognized. SREs apply software engineering principles to IT operations to create systems that arescalable, reliable, and highly available. Their responsibilities include:
* Designing reliability into systems (SLIs, SLOs, SLAs)
* Automating operational tasks to reduce toil
* Building monitoring and alerting systems
* Performing capacity planning and disaster recovery exercises
A(Site resilience engineer) is not a standard industry term.C(Software engineer) focuses on developing applications but not specifically on operational reliability.D(Product Owner) is a role in Agile frameworks that manages product backlog and priorities, not system reliability.
Thus, the correct answer isB - Site Reliability Engineer.

NEW QUESTION # 61

An organization has identified they have a culture of blame where people are fearful of failure and lack the courage to try new things. What can they do to encourage more courageous and experimentational behaviors?

- A. Sharing is inhibited
- B. Build rituals that reward risk taking
- C. Identify and punish the people that make mistakes
- D. Both b and c

Answer: B

Explanation:
Ablame cultureis toxic and inhibits innovation. DevOps encourages a culture where risk-taking and experimentation are rewarded, not punished.
Organizations should "build rituals that reward risk taking"-examples include celebrating "fast failures" and running blameless post-mortems.
Extract-style reference:
"Encourage a culture where failure is seen as a learning opportunity, not a cause for punishment. Rituals that reward risk-taking foster innovation and create psychological safety."
-DevOps Handbook
DevOps Foundation v3.6 (Cultural Principles section) advocates psychological safety, learning from failure, and reward systems that incentivize experimentation.

NEW QUESTION # 62

IT Operations have created a set of centralized platforms and tooling services that any dev team can use to be more productive using

guidance fromThe DevOps Handbook.
Which of the following key characteristics does it have?

- A. All of the above
- B. A shared version control repository with pre-blessed security libraries
- C. Deploys applications into known good environments with production monitoring
- D. A deployment pipeline that automatically runs code quality and security scanning tools

Answer: A

Explanation:
Acentralized platformin DevOps provides standardized, reusable services to development teams, improving productivity and reducing duplication. Characteristics include:
* A: Centralized version control with approved security libraries promotes consistent and secure coding practices.
* B: Automated pipelines that include quality and security scans ensure compliance and quality are built- in, not bolted on.
* C: Deployment to validated environments with monitoring enables quick detection and resolution of issues.
Since all three characteristics (A, B, C) are described in PeopleCert andThe DevOps Handbookas best practices,D-All of the above-is correct.

NEW QUESTION # 63
Which of the following is NOT a reason business is interested in DevOps?

- A. Intelligent data must drive direction quickly
- B. DevOps must automate all the things
- C. IoT is rapidly increasing
- D. Customers value outcomes, not products

Answer: B

Explanation:
Businesses are drawn to DevOps because it improves agility, responsiveness, and quality.
* A: The growth of IoT requires scalable, automated, and reliable delivery processes.
* B: Fast, intelligent decision-making is needed to respond to market changes.
* D: The shift toward valuing customer outcomes over products is central to modern service delivery.
However,Cis a misconception. While automation is a key DevOps practice, the goal isstrategic automation- automating where it adds measurable value, improves quality, or accelerates delivery. "Automate all the things" without consideration can waste resources, increase complexity, and reduce adaptability.

NEW QUESTION # 64
Several members of an IT service provider's development and operations teams recently attended a local DevOps meetup. They came away very excited about applying a DevOps approach to their organization.
Which of the following would be a critical success factor for their DevOps program?

- A. Additional budget for new automation
- B. Reorganization of the IT organization into DevOps Teams
- C. Management commitment to culture change
- D. The design and development of a deployment pipeline for continuous integration and continuous delivery

Answer: C

Explanation:
Successful DevOps transformation hinges onmanagement commitment to cultural change. This includes leadership support for

breaking down silos, encouraging collaboration, fostering psychological safety, and aligning incentives.

While budget, reorganization, and deployment pipelines are important enablers, they cannot deliver sustainable transformation without cultural alignment. Leaders must model desired behaviors, remove systemic blockers, and reinforce the new ways of working.

Without cultural change, DevOps becomes a tooling initiative rather than a true organizational shift.
