

FCSS_EFW_AD-7.4 Exam Simulations the Best Accurate Questions Pool Only at Prep4King

P.S. Free 2026 Fortinet FCSS_EFW_AD-7.4 dumps are available on Google Drive shared by Prep4King: <https://drive.google.com/open?id=1Wpmybhh5aXR6CVgmQJXUo831bXhje0WJ>

The web-based FCSS_EFW_AD-7.4 mock test is compatible with Chrome, Firefox, Internet Explorer, MS Edge, Opera, Safari, and others. This version of the Fortinet FCSS_EFW_AD-7.4 practice exam requires an active internet connection. It does not require any additional plugins or software installation to operate. Furthermore, Android, iOS, Windows, Mac, and Linux support the Fortinet FCSS_EFW_AD-7.4 web-based practice exam. Features of the EXAM CODE desktop practice exam software are web-based as well.

As a member of the people working in the FCSS_EFW_AD-7.4 industry, do you have a headache for passing some Fortinet certification exams? Generally, FCSS_EFW_AD-7.4 certification exams are used to test the examinee's related FCSS_EFW_AD-7.4 professional knowledge and experience and it is not easy pass these exams. For the examinees who are the first time to participate FCSS_EFW_AD-7.4 certification exam, choosing a good pertinent training program is very necessary. Prep4King can offer a specific training program for many examinees participating in Fortinet certification exams. Our training program includes simulation test before the formal examination, specific training course and the current exam which has 95% similarity with the real exam. Please add Prep4King to your shopping cart quickly.

Prep4King FCSS - Enterprise Firewall 7.4 Administrator (FCSS_EFW_AD-7.4) practice test software is another great way to reduce your stress level when preparing for the Fortinet Exam Questions. With our software, you can practice your excellence and improve your competence on the Fortinet FCSS_EFW_AD-7.4 Exam Dumps. Each Fortinet FCSS_EFW_AD-7.4 practice exam, composed of numerous skills, can be measured by the same model used by real examiners.

Fortinet FCSS - Enterprise Firewall 7.4 Administrator Sample Questions (Q63-Q68):

NEW QUESTION # 63

A FortiGate is rebooting unexpectedly without any apparent reason. What troubleshooting tools could an administrator use to get more information about the problem? (Choose two.)

- A. Policy monitor.
- B. Crashlogs.
- C. Logs.

- D. Firewall monitor.

Answer: B,C

NEW QUESTION # 64

Refer to the exhibit, which contains the partial output of an OSPF command.

```
FortiGate # get router info ospf status
Routing Process "ospf 0" with ID 0.0.0.5
Process uptime is 0 minute
Process bound to VRF default
Conforms to RFC2328, and RFC1583Compatibility flag is enabled
Supports only single TOS(TOS0) routes
Supports opaque LSA
Do not support Restarting
This router is an ASBR
```

An administrator is checking the OSPF status of a FortiGate device and receives the output shown in the exhibit.

Which statement on this FortiGate device is correct?

- A. The FortiGate device is a backup designated router.
- **B. The FortiGate device can inject external routing information.**
- C. The FortiGate device is in the area 0.0.0.5.
- D. The FortiGate device does not support OSPF ECMP.

Answer: B

Explanation:

From the OSPF status output, the key information is:

"This router is an ASBR" # This means the FortiGate is acting as an Autonomous System Boundary Router (ASBR).
An ASBR is responsible for injecting external routing information into OSPF from another routing protocol (such as BGP, static routes, or connected networks).

NEW QUESTION # 65

Refer to the exhibit, which contains the partial output of an OSPF command.

```
FortiGate # get router info ospf status
Routing Process "ospf 0" with ID 0.0.0.5
Process uptime is 0 minute
Process bound to VRF default
Conforms to RFC2328, and RFC1583Compatibility flag is enabled
Supports only single TOS(TOS0) routes
Supports opaque LSA
Do not support Restarting
This router is an ASBR
```

An administrator is checking the OSPF status of a FortiGate device and receives the output shown in the exhibit.

Which statement on this FortiGate device is correct?

- A. The FortiGate device is a backup designated router.
- **B. The FortiGate device can inject external routing information.**
- C. The FortiGate device is in the area 0.0.0.5.

- D. The FortiGate device does not support OSPF ECMP.

Answer: B

Explanation:

From the OSPF status output, the key information is:

"This router is an ASBR" - This means the FortiGate is acting as an Autonomous System Boundary Router (ASBR). An ASBR is responsible for injecting external routing information into OSPF from another routing protocol (such as BGP, static routes, or connected networks).

NEW QUESTION # 66

A FortiGate's port1 is connected to a private network. Its port2 is connected to the Internet. Explicit web proxy is enabled in port1 and only explicit web proxy users can access the Internet. Web cache is NOT enabled. An internal web proxy user is downloading a file from the Internet via HTTP.

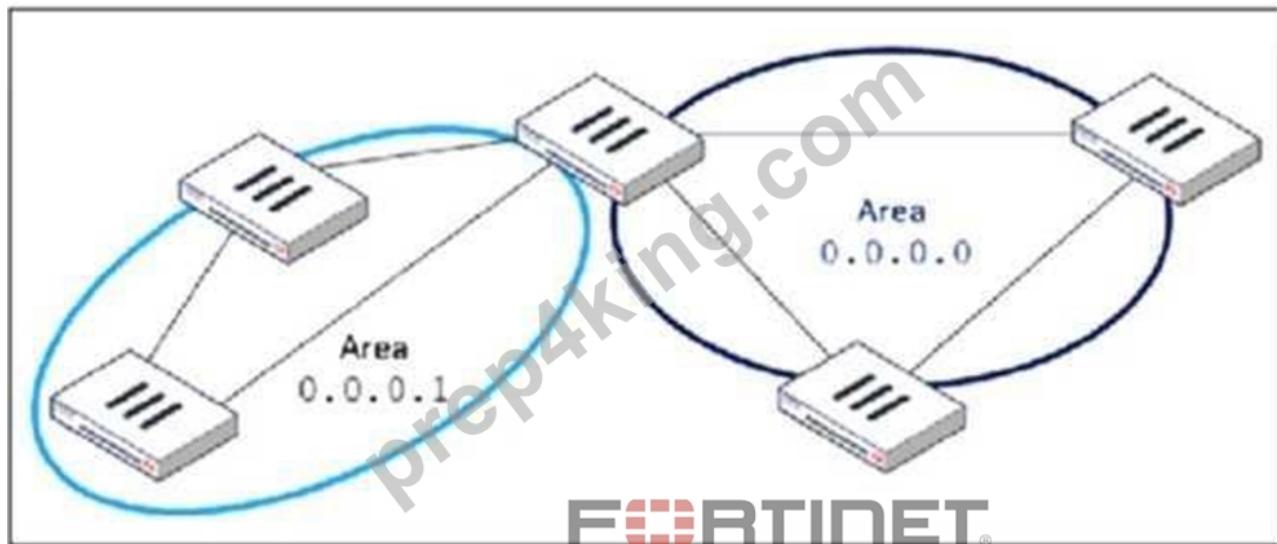

Which statements are true regarding the two entries in the FortiGate session table related with this traffic? (Choose two.)

- A. One session has the proxy flag on, the other one does not.
- B. The destination IP addresses of both sessions are IP addresses assigned to FortiGate's interfaces.
- C. One of the sessions has the IP address of port2 as the source IP address.
- D. Both session have the local flag on.

Answer: C,D

NEW QUESTION # 67

Refer to the exhibit, which shows an OSPF network.

Which configuration must the administrator apply to optimize the OSPF database?

- A. Set the area 0.0.0.1 to the type NSSA in the area border FortiGate.
- B. Set an access list in the AS boundary FortiGate.
- C. Set a route map in the AS boundary FortiGate.
- D. Set the area 0.0.0.1 to the type STUB in the area border FortiGate.

Answer: D

Explanation:

The OSPF database optimization is necessary to reduce unnecessary routing information and improve network performance. In the given topology, Area 0.0.0.1 is a non-backbone area connected to Area 0.0.0.0 (the backbone area) through an Area Border Router (ABR).

To optimize OSPF in this scenario, configuring Area 0.0.0.1 as a Stub Area will:

Reduce the size of the OSPF database by preventing external routes (from outside OSPF) from being injected into Area 0.0.0.1.

Allow only intra-area and inter-area routes, meaning routers in Area 0.0.0.1 will rely on a default route for external destinations.

Improve convergence time and reduce router processing load since fewer LSAs (Link-State Advertisements) are exchanged.

NEW QUESTION # 68

.....

The FCSS_EFW_AD-7.4 exam materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the FCSS_EFW_AD-7.4 training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our FCSS_EFW_AD-7.4 study engine.
