100% Pass 2026 1Y0-205: Citrix Virtual Apps and Desktops Administration

Updated Reliable Test Pass4sure

Our 1Y0-205 exam braindumps can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality exam materials may bring discredit on the company. So we only create the best quality of our 1Y0-205 Study Materials to help our worthy customers pass the exam by the first attempt. Tens of thousands of our customers have passed their exam. And you will be the next one if you buy our 1Y0-205 practice engine.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which Citrix Director view will allow a Citrix Administrator to view data on the current CPU, as well as memory and disk latency for a machine running the Virtual Delivery Agent (VDA)?

- A. Resource Utilization
- B. Capacity Management
- C. Machine Utilization
- D. Load Evaluator Index

Answer: A

Explanation:

The Resource Utilization view in Citrix Director provides real-time data on CPU, memory usage, and disk latency for VDA machines. This allows administrators to monitor system performance and identify resource bottlenecks affecting user sessions.

NEW QUESTION # 22

Scenario: A Citrix Administrator configures the 'Auto connect client drives' user settings to map client drives within the HDX session for all published desktops. The setting is configured in a Baseline Group Policy Object (GPO) and linked to an Organizational Unit (OU) that contains all of the published desktops. When a user launches the desktop, client drives are NOT mapped. What is a possible reason?

- A. gpupdate /force needs to be executed on all of the machines.
- B. Loopback processing is NOT enabled.
- C. The GPO needs to be linked to the User OU.
- D. Desktops need to be restarted for the policy to be applied.

Answer: B

Explanation:

User settings in a GPO linked to a machine OU only apply if loopback processing is enabled.

Since the "Auto connect client drives" setting is a user policy but applied at the desktop OU level, loopback processing must be enabled for the policy to take effect within the HDX sessions.

NEW QUESTION # 23

Which three authentication features require Citrix XML Service trust to be enabled within a Citrix Virtual Apps and Desktops infrastructure? (Choose three.)

- A. Smart card
- B. Pass-through from NetScaler Gateway
- C. HTTP Basic
- D. Smart Access
- E. Pass-through

Answer: B,C,E

Explanation:

Citrix XML Service trust must be enabled when authentication credentials need to be passed securely from StoreFront to the

Delivery Controller. This applies to HTTP Basic authentication, pass-through from NetScaler Gateway, and pass-through authentication, all of which rely on trusted XML communication.

NEW QUESTION # 24

After creating a new machine catalog using the Machine Creation Services (MCS) wizard in Citrix Studio, a Citrix Administrator determines that Windows activation fails for all new machines in that catalog.

Which two conditions can cause this to happen? (Choose two.)

- A. The version of Windows installed is Windows Server 2012 R2.
- B. The Microsoft License Server is unreachable.
- C. The version of Windows installed uses Multiple Activation Key (MAK) licensing.
- D. The base image rearm count has been exceeded.

Answer: C,D

Explanation:

Rearm count exceeded: If the base image has been sysprepped too many times, the rearm count may be exhausted, preventing Windows activation on cloned machines.

MAK licensing: MCS-provisioned machines are treated as newly deployed instances. MAK licensing is not suitable for this scenario because each clone would require its own activation, leading to failures.

NEW QUESTION # 25

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- B. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- C. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.
- D. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.

Answer: C

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

NEW QUESTION # 26

.....

We have first-rate information protection system, if you purchasing 1Y0-205 exam materials from us, we can ensure you that the safety of your email box. We respect your privacy and will never send junk email to you. 1Y0-205 exam dumps of us are also high-quality, and will help you pass the exam and get the certificate successfully. What's more, we have professional online chat service stuff, if you have any questions about the 1Y0-205 Exam Materials, just have a conversation with them. We will give you reply as quickly as possible.
