## 3V0-22.25 Latest Dumps: Advanced VMware Cloud Foundation 9.0 Operation & Advanced VMware Cloud Foundation 9.0 Operation Exam Cram

Please believe that our Itbraindumps team have the same will that we are eager to help you pass 3V0-22.25 exam. Maybe you are still worrying about how to prepare for the exam, but now we will help you gain confidence. By constantly improving our dumps, our strong technical team can finally take proud to tell you that our 3V0-22.25 exam materials will give you unexpected surprises. You can download our free demo to try, and see which version of 3V0-22.25 Exam Materials are most suitable for you; then you can enjoy your improvement in IT skills that our products bring to you; and the sense of achievement from passing the 3V0-22.25 certification exam.

## VMware Advanced VMware Cloud Foundation 9.0 Operation Sample Questions (Q246-Q251):

### NEW QUESTION # 246

An operator is configuring a new "vSAN" integration. However, they cannot find a specific "vSAN Adapter" in the "Repository" or "Add Account" list.

Why is the vSAN Adapter missing from the selection list?

- A. The operator must download the "vSAN Management Pack" from the VMware Marketplace first.
- **B. The vSAN Adapter is not a standalone object; it is embedded within the vCenter Server Adapter. Configuring the vCenter integration automatically enables vSAN monitoring if vSAN is detected.**
- C. The license key does not support vSAN.
- D. vSAN monitoring is deprecated in VCF Operations.

**Answer: B**

### NEW QUESTION # 247

A user views a dashboard containing a "Event List" (Table) widget. They want to see the "Source IP" column in the table, but currently, only "Timestamp" and "Text" are shown.

How can the user add this column to the widget view?

- A. Double-click the timestamp.
- **B. In the widget editor (or Interactive Analytics view), expand the "Fields" pane on the left (or use the Field visibility selector above the table), locate "source\_ip", and ensure it is checked/added to the table columns view. Then save the widget.**
- C. Use a regex to rewrite the text.
- D. It is not possible; table widgets are fixed.

**Answer: B**

### NEW QUESTION # 248

An Automation Central job is configured to "Delete Powered Off VMs" with a criteria of "Powered Off > 14 Days". A user manually powers off a VM on Monday. On Tuesday (1 day later), the user complains that the VM was deleted by the automation.

What is the most likely explanation for this behavior?

- A. The VM was actually powered off 2 weeks ago, briefly powered on, and then off again; the counter didn't reset.
- B. Automation Central ignored the criteria.
- **C. The Automation Central job was misconfigured with the wrong scope or criteria (e.g., "Powered Off > 0 Days").**
- D. The VM had a "Snapshot" that was older than 14 days, and the administrator mistakenly configured the job to "Delete Snapshots" instead of "Delete VMs", or configured a separate "Snapshot Cleanup" job that inadvertently deleted the VM state. (Or, most simply: The criteria logic uses the "Total Powered Off Time" metric which might accumulate if not reset properly, but C is the most direct config error).

**Answer: C**

### NEW QUESTION # 249

An operator clicks the "Optimize Now" button to manually trigger a workload rebalance. The task fails immediately with an error indicating "Action Execution is disabled".

Where must the operator go to fix this permission issue?

- A. The vSphere Client -> Permissions tab.
- B. The Automation Central job scheduler.
- **C. The Integrations (or Data Sources) page. The operator must edit the vCenter Adapter Instance and toggle the "Advanced Settings -> Enable Actions" setting to True.**
- D. The Global Settings -> Automation.

**Answer: C**

### NEW QUESTION # 250

An administrator is faced with 50,000 log entries generated during a 5-minute application crash window. Searching line-by-line is impossible.

Which VCF Operations for Logs feature allows the administrator to collapse these 50,000 lines into a small list of Unique Patterns, instantly revealing the single "Unhandled Exception" anomaly hidden among the noise?

- A. The "Event Types" (or Intelligent Grouping) tab. This feature uses machine learning to cluster similar log messages (ignoring variable parts like timestamps or IP addresses) into canonical patterns, presenting the volume of each pattern to highlight outliers.
- B. The "Export to Excel" function.
- C. The "Syslog Forwarding" rule.
- D. The "Text" filter.

**Answer: A**

### NEW QUESTION # 251

.....

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our 3V0-22.25 study materials will radically change this.
