

Quiz Cisco - 300-540 - Designing and Implementing Cisco Service Provider Cloud Network Infrastructure–High Pass-Rate New Braindumps Book

DOWNLOAD the newest BraindumpsPrep 300-540 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=16ogkpSMI-LdFotmRvxNISuO5tjzPDnMU>

With the development of artificial intelligence, we have encountered more challenges on development of the 300-540 exam materials. Only by improving our own soft power can we ensure we are not eliminated by the market. Select our 300-540 study questions to improve your work efficiency. As long as you study with our 300-540 training guide, then you will get the most related and specialized information on the subject to help you solve the questions on your daily work.

Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.
Topic 2	<ul style="list-style-type: none"> • Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR • MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.
Topic 3	<ul style="list-style-type: none"> • Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.

Topic 4	<ul style="list-style-type: none"> • High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.
Topic 5	<ul style="list-style-type: none"> • Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.

Pass Guaranteed 300-540 - Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Useful New Braindumps Book

Our test engine has been introduced for the preparation of 300-540 practice test and bring great convenience for most IT workers. It will make you feel the atmosphere of the 300-540 actual test and remark the mistakes when you practice the exam questions. We strongly recommend that you should prepare your 300-540 Exam PDF with our test engine before taking real exam.

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q135-Q140):

NEW QUESTION # 135

DNS security is essential for preventing:

- A. Power outages
- B. Hardware failures
- C. DNS poisoning and DDoS attacks
- D. Physical access breaches

Answer: C

NEW QUESTION # 136

The use of Yang models in network configuration is to:

- A. Replace XML-based data models
- B. Increase the complexity of network scripts
- C. Simplify the parsing of binary data
- D. Provide a standardized data modeling language

Answer: D

NEW QUESTION # 137

Which protocol is used for device authentication, authorization, and accounting?

- A. MACSEC

- B. ACL
- C. uRPF
- **D. TACACS**

Answer: D

NEW QUESTION # 138

RTBH is effective in mitigating what kind of traffic?

- A. Incoming legitimate requests
- B. Outgoing traffic
- C. Legitimate traffic
- **D. Malicious traffic**

Answer: D

NEW QUESTION # 139

What is Virtualized Architecture primarily used for in the context of IT infrastructure?

- **A. Reducing the need for physical hardware**
- B. Increasing physical hardware costs
- C. Simplifying legal compliance
- D. Decreasing system security

Answer: A

NEW QUESTION # 140

.....

Our agreeable staffs are obliging to offer help 24/7 without self-seeking intention and present our after-seals services in a most favorable light. We have patient colleagues offering help and solve your problems and questions of our materials all the way. Besides, we remunerate exam candidates who fail the 300-540 Exam Torrent after choosing our 300-540 study tools, which kind of situation is rare but we still support your dream and help you avoid any kind of loss. Just try it do it, and we will be your strong backup.
