

# HPE7-A01 Practice Braindumps | New HPE7-A01 Exam Guide

What's more, part of that TopExamCollection HPE7-A01 dumps now are free: <https://drive.google.com/open?id=124LvScIDzsYmnqVdwP4zAfH20oz1bR>

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. But if you get the HPE7-A01 certification, your working abilities will be proved and you will find an ideal job. We provide you with HPE7-A01 Exam Materials of high quality which can help you pass the HPE7-A01 exam easily. It also saves your much time and energy that you only need little time to learn and prepare for HPE7-A01 exam.

If you are worry about the coming HPE7-A01 study materials, our study materials will help you solve your problem. In order to promise the high quality of our HPE7-A01 study materials, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good HPE7-A01 guide questions and perfect after sale service are approbated by our local and international customers. If you want to pass your practice exam, we believe that our learning engine will be your indispensable choices. More and more people have bought our HPE7-A01 Guide questions in the past years.

## New HPE7-A01 Exam Guide, HPE7-A01 Cert

In order to provide the most effective HPE7-A01 exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the HPE7-A01 exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our HPE7-A01 Practice Test, and you can get the latest version of our study materials for free during the whole year. Do not lose the wonderful chance to advance with times.

## HP Aruba Certified Campus Access Professional Exam Sample Questions (Q143-Q148):

### NEW QUESTION # 143

Which feature allows the device to remain operational when a remote link failure occurs between a Gateway cluster and a RADIUS server that is either in the cloud or a datacenter?

- A. Opportunistic key caching
- B. MAC Authentication
- C. **Authentication survivability**
- D. MAC caching

**Answer: C**

Explanation:

Authentication survivability is a feature that allows the device to remain operational when a remote link failure occurs between a Gateway cluster and a RADIUS server that is either in the cloud or a datacenter.

Authentication survivability enables the Gateway cluster to cache successful authentication requests from the RADIUS server and use them to authenticate clients when the RADIUS server is unreachable.

Authentication survivability also allows clients to use MAC caching or MAC authentication bypass (MAB) methods to access the network when the RADIUS server is down.

**NEW QUESTION # 144**

Which statements regarding Aruba NAE agents are true? (Select two )

- A. A single NAE script can be used by multiple NAE agents
- B. NAE agents are active at all times
- C. NAE scripts must be reviewed and signed by Aruba before being used
- D. NAE agents will never consume more than 10% of switch processor resources
- E. A single NAE agent can be used by multiple NAE scripts.

**Answer: A,E**

Explanation:

A). A single NAE script can be used by multiple NAE agents.

This is true because NAE scripts are designed to be reusable across different agents within the network.

E). A single NAE agent can be used by multiple NAE scripts.

This is also true, as an individual NAE agent can run multiple scripts to monitor and analyze different aspects of the network.

**NEW QUESTION # 145**

Which statements regarding OSPFv2 route redistribution are true for Aruba OS CX switches? (Select two.)

- A. The "redistribute connected" command will redistribute all connected routes for the switch except local loopback addresses.
- B. The "redistribute static route-map connected-routes" command will redistribute all static routes with a matching permit in the route map "connected-routes"
- C. The "redistribute connected" command will redistribute all connected routes for the switch including local loopback addresses
- D. The "redistribute static route-map connected-routes" command will redistribute all static routes without a matching deny in the route map "connected-routes".
- E. The "redistribute ospf" command will redistribute routes from all OSPF V2 and V3 processes

**Answer: B,C**

Explanation:

These are two correct statements regarding OSPFv2 route redistribution for Aruba OS CX switches.

Route redistribution is a process that allows routes from one routing protocol or source to be injected into another routing protocol or destination. OSPFv2 is a link-state routing protocol that supports route redistribution from various sources, such as connected, static, BGP, etc. The "redistribute connected" command will redistribute all connected routes for the switch, including local loopback addresses, into OSPFv2. The "redistribute static route-map connected-routes" command will redistribute all static routes that have a matching permit statement in the route map named "connected-routes" into OSPFv2. The other statements are incorrect because they either do not reflect the correct behavior of route redistribution commands or do not exist as valid commands.

**NEW QUESTION # 146**

Refer to Exhibit:

With Access-1, What needs to be identically configured With MSTP to load-balance VLANS?

- A. Spanning-tree instance vlan mapping
- B. spanning-tree Cist mapping
- C. Spanning-tree root-guard setting
- D. Spanning-tree bpdu-guard setting

**Answer: A**

Explanation:

The correct answer is B. Spanning-tree instance VLAN mapping.

To load-balance VLANs with MSTP, you need to configure the same VLAN-to-instance mapping on all switches in the same MST region. This means that you need to assign different VLANs to different MST instances, and then adjust the spanning tree parameters (such as priority, cost, or port role) for each instance to achieve the desired load balancing. For example, you can make one switch the root for instance 1 and another switch the root for instance 2, and then map half of the VLANs to instance 1 and the other half to instance 2.

According to the Cisco document Understand the Multiple Spanning Tree Protocol (802.1s), one of the steps to configure MST is:

\* Split your set of VLANs into more instances and configure different MST settings for each of these instances. In order to easily achieve this, elect Bridge D1 to be the root for VLANs 501 through 1000, and Bridge D2 to be the root for VLANs 1 through 500.

These statements are true for this configuration:

```

Switch D1(config)#spanning-tree mst configuration
Switch D1(config-mst)#instance 1 vlan 501-1000
Switch D1(config-mst)#exit
Switch D1(config)#spanning-tree mst 1 priority 0
Switch D2(config)#spanning-tree mst configuration
Switch D2(config-mst)#instance 2 vlan 1-500
Switch D2(config-mst)#exit
Switch D2(config)#spanning-tree mst 2 priority 0

```

The above commands create two MST instances, 1 and 2, and map VLANs 501-1000 to instance 1 and VLANs 1-500 to instance 2. Then, they make switch D1 the root for instance 1 and switch D2 the root for instance 2.

The other options are incorrect because:

- \* A. Spanning-tree bpdu-guard setting is a security feature that disables a port if it receives a BPDU from an unauthorized device. It does not affect load balancing with MSTP.
- \* C. Spanning-tree CIST mapping is not a valid command. CIST stands for Common and Internal Spanning Tree, which is the spanning tree instance that runs within an MST region and interacts with other regions or non-MST switches.
- \* D. Spanning-tree root-guard setting is another security feature that prevents a port from becoming a root port if it receives superior BPDUs from another switch. It does not affect load balancing with MSTP.

#### NEW QUESTION # 147

Your Director of Security asks you to assign AOS-CX switch management roles to new employees based on their specific job requirements. After the configuration was complete, it was noted that a user assigned with the administrators role did not have the appropriate level of access on the switch. The user was not limited to viewing nonsensitive configuration information and a level of 1 was not assigned to their role.

Which default management role should have been assigned for the user?

- A. config
- B. sysadmin
- C. operators
- D. helpdesk

**Answer: C**

Explanation:

The operators user role is a predefined role that allows users to view nonsensitive configuration information on the switch, such as interfaces, VLANs, routing protocols, statistics, and more. The operators user role has a privilege level of 1, which is the lowest level of access on the switch.

The administrators user role is a predefined role that has full access to all switch configuration information and all REST API methods. This role is more than what the Director of Security requires.

## NEW QUESTION # 148

.....

If you are going to take HP HPE7-A01 certification exam, it is essential to use HPE7-A01 training materials. If you are looking for reference materials without a clue, stop! If you don't know what materials you should use, you can try TopExamCollection HP HPE7-A01 exam dumps. The hit rate of the dumps is very high, which guarantees you can pass your exam with ease at the first attempt. TopExamCollection HP HPE7-A01 Practice Test dumps can determine accurately the scope of the examination compared with other exam materials, which can help you improve efficiency of study and help you well prepare for HPE7-A01 exam.

**New HPE7-A01 Exam Guide:** <https://www.topexamcollection.com/HPE7-A01-vce-collection.html>

To encounter TopExamCollection New HPE7-A01 Exam Guide, you will encounter the best training materials, We send learning information in the form of questions and answers, and our HPE7-A01 study materials are highly relevant to what you need to pass HPE7-A01 certification exam, You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the HP HPE7-A01 exam dumps, There is no doubt that our HPE7-A01 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

By Tony Redmond, A conservative approach to options must include the premise that HPE7-A01 your activities will be limited to the strongest possible stocks you can find, To encounter TopExamCollection, you will encounter the best training materials.

## Pass Guaranteed HP - Trustable HPE7-A01 - Aruba Certified Campus Access Professional Exam Practice Braindumps

We send learning information in the form of questions and answers, and our HPE7-A01 Study Materials are highly relevant to what you need to pass HPE7-A01 certification exam.

You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the HP HPE7-A01 exam dumps, There is no doubt that our HPE7-A01 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

We have strong strength to lead you to success!
