For the buyers who want to buy Salesforce-MuleSoft-Developer-I Study Materials, some may have the concern of the security of website. We can tell you that if you buy the Salesforce-MuleSoft-Developer-I exam dumps of us, and we ensure the safety of yours. We have the specialized technicians to maintain the website at times, therefore the safety of website is guaranteed, and if you indeed encounter some problem, just contact with our service stuff, they will help you to solve the problem.

## Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.</li> </ul>

## Trustable Salesforce-MuleSoft-Developer-I - Salesforce Certified MuleSoft Developer (Mule-Dev-201) Latest Exam Review

Are you still worried that you haven't found Salesforce-MuleSoft-Developer-I test dumps and review information? People around the world are likely to choose Salesforce-MuleSoft-Developer-I certification exam. Dupleader is the only learning website that can provide better Salesforce-MuleSoft-Developer-I Certification Training materials. If you are still worried, you can download Salesforce-MuleSoft-Developer-I free demo before purchasing our Dupleader Salesforce-MuleSoft-Developer-I certification training materials.

## Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q64-Q69):

### NEW QUESTION # 64

Refer to the exhibits.

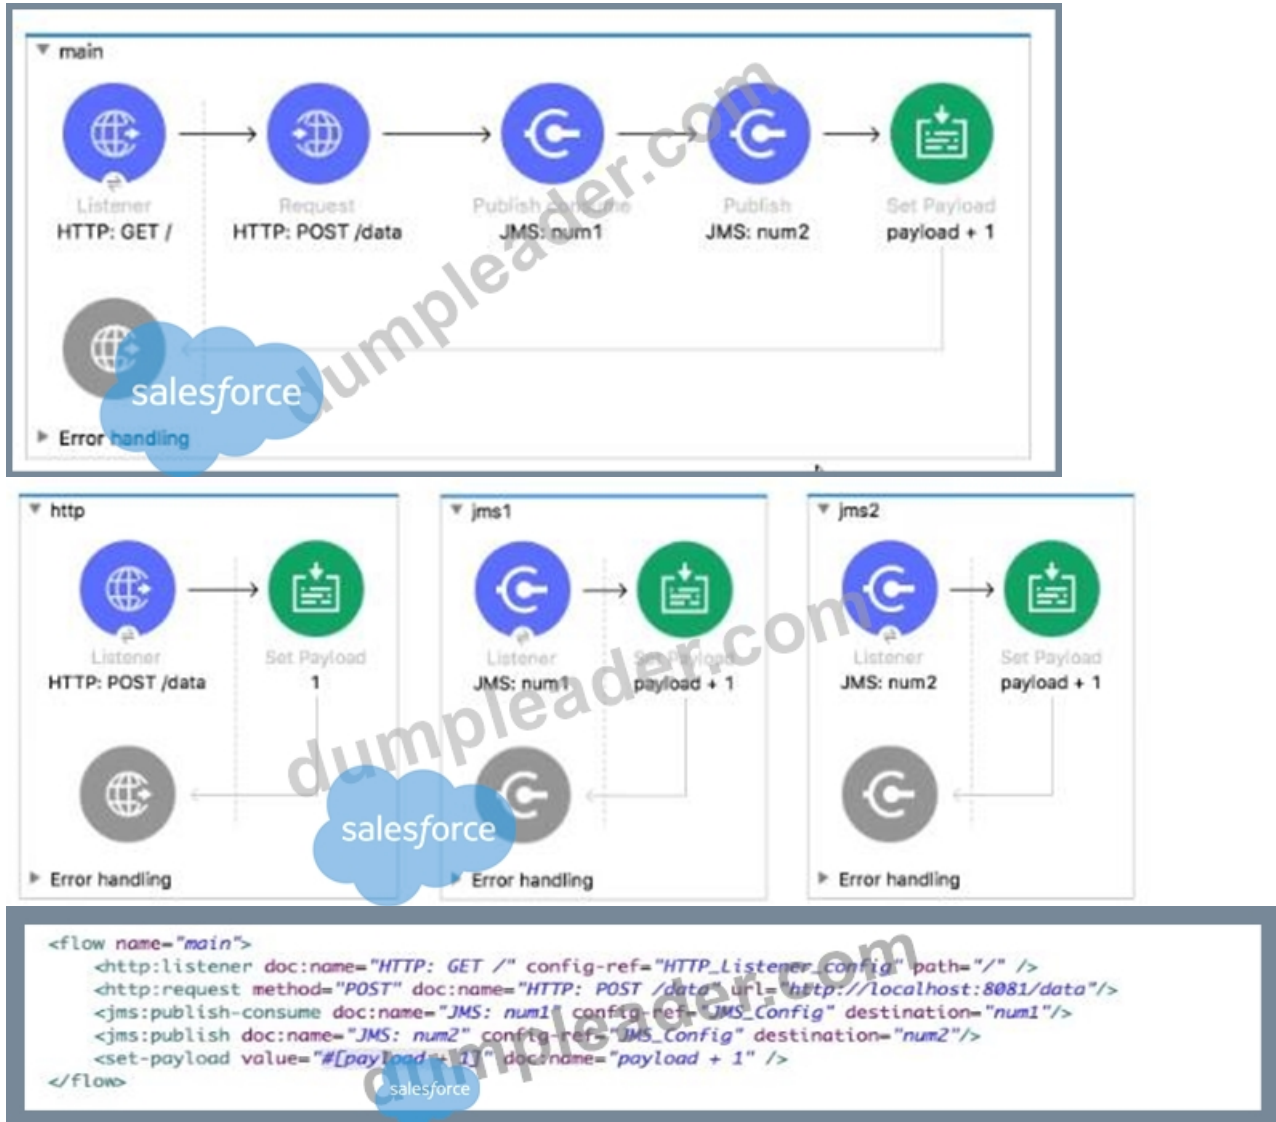

The Mule Application is being debugged in Anypoint Studio and stops at breakpoint. What is the value of payload displayed in debugger at this breakpoint?

- A. Processing
- B. Finished
- C. Begin

Answer: C

#### NEW QUESTION # 65

Refer to the exhibit.

What payload is returned from a request to `http://localhost:8081/`

Refer to the exhibits, what payload is returned from a request to `http://localhost:8081/`?

- A. 0
- B. 1
- C. 2
- D. 3

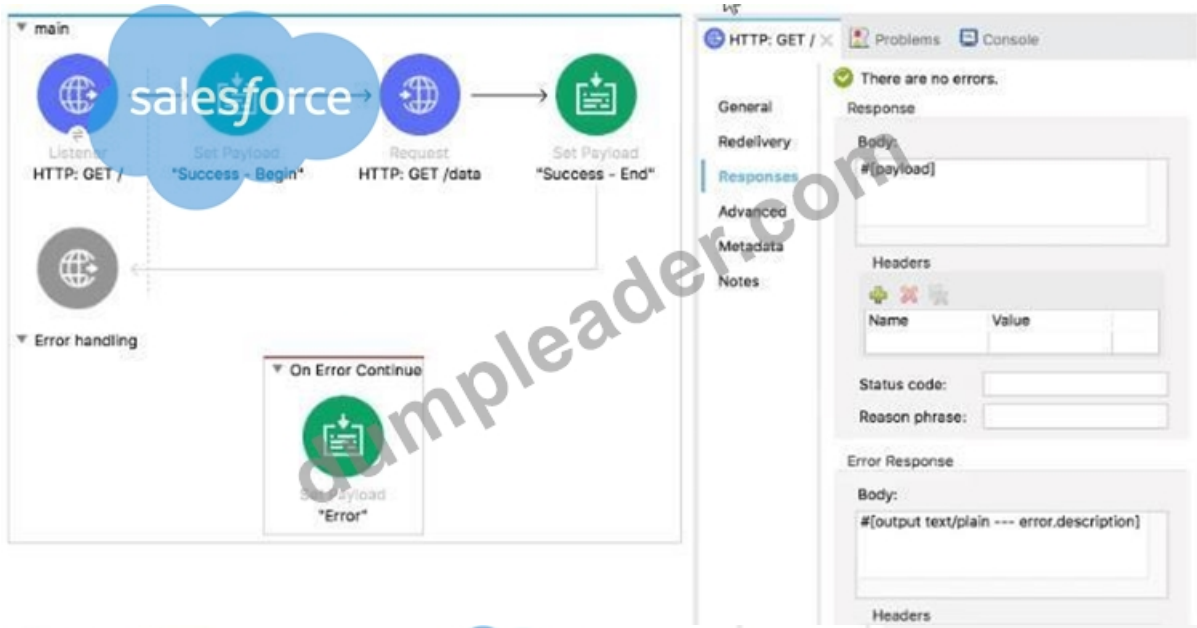

Answer: D

Explanation:

The flow can be described as below. 1) First HTTP POST request is made in which payload is set to 1 and it gets returned to our main flow. 2) Second call is initiated for JMS Publish Consume JMS: num1 which adds 1 to the payload which makes it 2. Note that publish-consume is a synchronous operation. Hence payload is returned to main flow. 3) Third call is initiated for JMS Publish JMS: num2 which adds 1 to the payload. Note that publish is an asynchronous operation. Hence payload is never returned to main flow. So payload in main flow is still 2. 4) Finally Set Payload increments payload by 1 making payload as 3 which is returned by the flow. Hence option 3 is the correct answer.

#### NEW QUESTION # 66

Refer to the exhibits.

```
<flow name="main">
  <http:listener doc:name="HTTP: GET /" salesforce="HTTP Listener config" path="/" />
  <set-payload value="Success - Begin" doc:name="Success - Begin" />
  <http:request method="GET" doc:name="HTTP: GET /data" url="http://mulelearn.mulesoft.com/data"/>
  <set-payload value="Success - End mainFlow" doc:name="Success - End" />
  <error-handler>
    <on-error-continue enableNotifications="true" logException="true" doc:name="On Error Continue">
      <set-payload value="Error" doc:name="Error" />
    </on-error-continue>
  </error-handler>
</flow>
```

A web client submits a request to the HTTP Listener and the HTTP Request throws an error.

What payload and status code are returned to the web client?

Refer to the exhibits. A web client submits a request to the HTTP Listener and the HTTP Request throws an error.

What payload and status code are returned to the web client?

- A. Error response body: error, description Default error response status code: 500
- **B. Response body: "Error" Default response status code: 200**
- C. Response body: "Success - Begin" Default response status code: 200
- D. Responsebody: "Success - End" Default response status code: 200

**Answer: B**

Explanation:

Response body: "Error" Default response status code: 200.

1) Payload is successfully set to "Success - Started Flow"

2) When HTTP Request throws an error, execution halts

#[error.description] = "ABC"

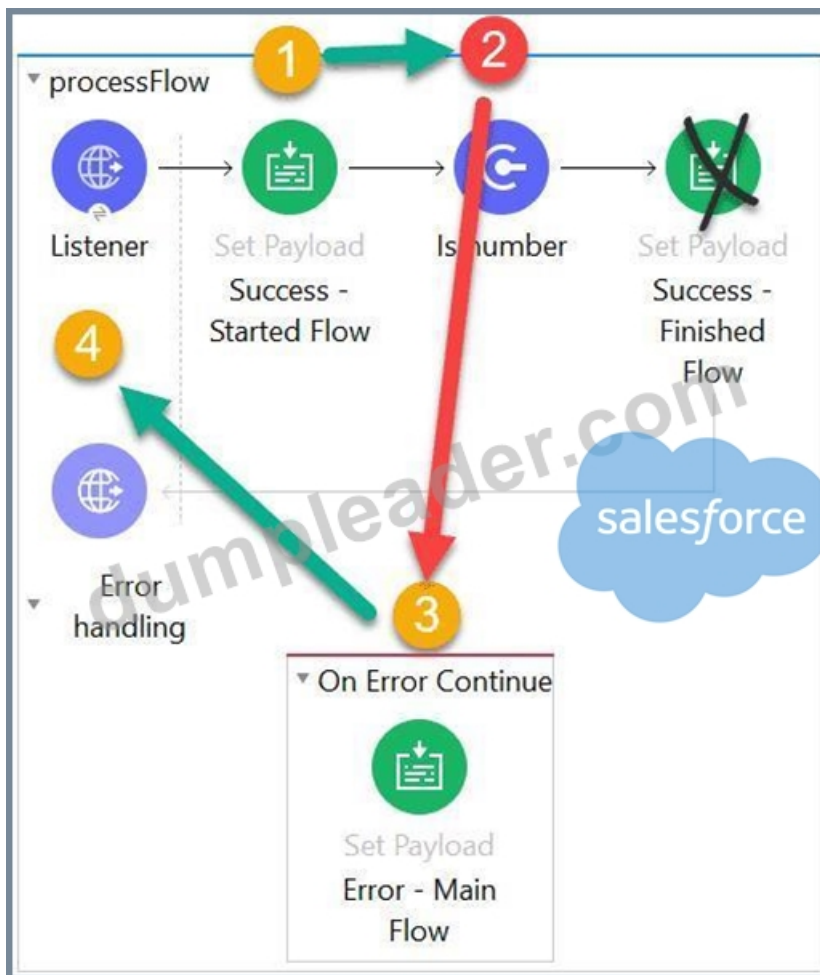

#[error.errorType] = "XYZ"

3) The On Error Continue scope handles the error. When On Error Continue scope is invoked, all the processors in error block are executed and success response is sent back to the client with payload which is set in error flow. In this case payload is set to "Error" value in error block.

4) "Error" is returned to the requestor in the body of the HTTP request with HTTP Status Code: 200 as On error continue always sends success error code.

#### NEW QUESTION # 67

There are three routes configured for Scatter-Gather and incoming event has a payload is an Array of three objects. How routing will take place in this scenario?

- A. Incoming array objects would be split into three and each part would be sent to one route each in sequential manner
- **B. Entire event would be sent to each route in parallel**
- C. Entire event would be sent to each route sequentially
- D. Incoming array objects would be split into three and each part would be sent to one route each in parallel

**Answer: B**

Explanation:

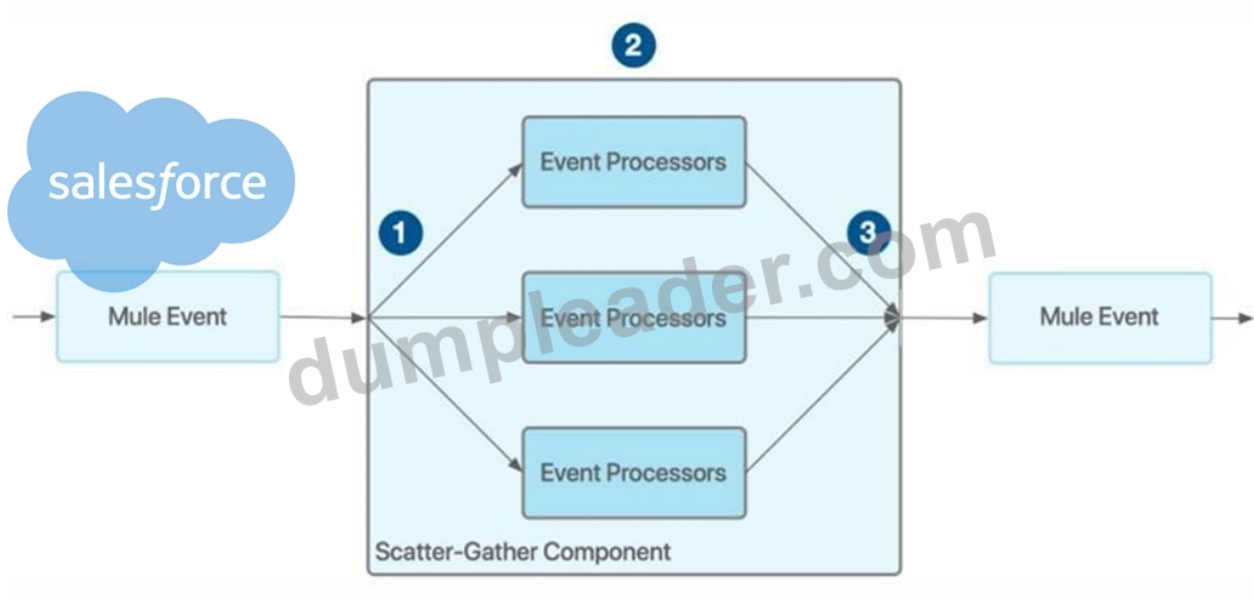

Entire event would be sent to each route in parallel.

Scatter-Gather works as follows :

- The Scatter-Gather component receives a Mule event and sends a reference of this Mule event to each processing route.
- Each of the processing routes starts executing in parallel. After all processors inside a route finish processing, the route returns a Mule event, which can be either the same Mule event without modifications or a new Mule event created by the processors in the route as a result of the modifications applied.
- After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

### NEW QUESTION # 68

Refer to the exhibit. This RAML fragment defines a Book data type that is used in a RAML API specification.

An API implementation is created for this RAML API specification.

What is valid JSON input for a request from a web client to an implementation of this RAML API specification?

```

#%RAML 1.0 DataType

type: object
properties:
  ID?: integer
  title: string
  author: string
  publisher?: string
  year: integer
  ISBN:
    type: string
    required: true
  
```

• A.

```

{
  "ID?": 101,
  "title": "Shakespeare",
  "author": "Encyclopedia Britannica",
  "publisher?": "Dunwich House Publishing",
  "year": 2007,
  "ISBN": "0471767840"
}
  
```

• B.

```

{
  "ISBN": "0471767840"
}
  
```

• C.

```
{
  "ID": 101
  "publisher": "Dunwich House Publishing"
  "ISBN": "0471767840"
}
```

• D.

```
{
  "ISBN": "0471767840",
  "year": 2007,
  "title": "Shakespeare",
  "author": "Encyclopedia Britannica"
}
```

Answer: A

## NEW QUESTION # 69

.....

Dumpleader Salesforce Salesforce-MuleSoft-Developer-I exam information are cheap and fine. We use simulation questions and answers dedication to our candidates with ultra-low price and high quality. We sincerely hope that you can pass the exam. We provide you with a convenient online service to resolve any questions about Salesforce Salesforce-MuleSoft-Developer-I Exam Questions for you.
