* A. 1 custom image component, 2 rich text components
* B. 1 custom image component, 1 simple text component
* C. 1 custom image component, 1 rich text component

NEW QUESTION # 71

You are configuring a story report. You add the image widget to the top-left corner of the canvas. You then upload the SAP SuccessFactors logo in the Builder, and select the logo image so it displays on the canvas.
When you preview the report in View Mode, the logo appears centered on the canvas. What action do you take so the Logo appears in the top-left corner when viewing the report in View Mode?

- A. In Designer Mode, add another widget under the image.
- B. In Styling for the image, set the Image Properties to Pan.
- C. In Styling for the page, set the Page Size to Fixed.
- D. In Builder for the image, set the image to Dynamic.

Answer: C

Explanation:
* Issue Description:
* When the logo appears centered in View Mode instead of the top-left corner, it is because the page size is set to a responsive layout.
* Solution:
* Go to Styling for the page in the report configuration.
* Change the Page Size from responsive to Fixed.
* This ensures that elements like the logo remain positioned as designed, including in the top-left corner.

NEW QUESTION # 72
You are building a performance report with the Story report type. In reviewing the Performance Management schema, you notice that the 2019 Performance Review Table is listed in the Available Data section. You begin the query by adding the Basic User Information table from the User schema. You notice that the 2019 Performance Review Table is NO longer listed in the Available Data section. Why is the 2019 Performance Review table NOT in the list?

- A. You do NOT have RBP permission to the fields of the table.
- B. The table does NOT have a Report Object Configuration Entity record.
- C. Only related or joined tables appear as available.
- D. You do NOT have the data access permission to the schema.

Answer: C

Explanation:
* Schema and Table Relationships
* In SAP SuccessFactors Story Reporting, tables are only displayed in the Available Data section if they have a direct relationship or join with the selected starting table (in this case, Basic User Information).
* Why the 2019 Performance Review Table is Missing
* Since the Basic User Information table is selected, only tables directly related to it will appear.
The 2019 Performance Review Table is likely not joined directly to the User schema.
* Why Other Options are Incorrect
* B (No Report Object Configuration Entity record): The table is present in the schema, so it must have a valid ROCE record.
* C (No RBP permission): This would prevent any access to the table but does not explain its absence from the Available Data section.
* D (No data access permission): This would restrict data access, not the visibility of the table.

* This helps in tailoring the report to regional or user-specific requirements.
* Picklist Fields (D):
