

# Test AIGP Assessment & AIGP Exam Papers

DOWNLOAD the newest Easy4Engine AIGP PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1Kkor0EX0xZFensf59F0HzxKj31yFcfdj>

A lot of things can't be tried before buying or the product trial will charge a certain fee, but our AIGP exam questions are very different, you can try it free before you buy it. It's like buying clothes, you only know if it is right for you when you try it on. In the same way, in order to really think about our customers, we offer a free trial version of our AIGP study prep for you, so everyone has the opportunity to experience a free trial version of our AIGP learning materials.

Our experts generalize the knowledge of the exam into our AIGP exam materials showing in three versions. PDF version of AIGP study questions - support customers' printing request, and allow you to have a print and practice in papers. Software version of AIGP learning guide - supporting simulation test system. App/online version of mock quiz - Being suitable to all kinds of equipment or digital devices, and you can review history and performance better. And you can choose the favorite one.

## AIGP Exam Papers & AIGP Latest Braindumps Questions

Countless IAPP Certified Artificial Intelligence Governance Professional AIGP exam candidates have already passed their AIGP certification exam and they all got help from top-notch AIGP pdf questions and practice tests. You should not ignore it and must try real AIGP exam questions today. The Easy4Engine is committed to making the IAPP Certified Artificial Intelligence Governance Professional AIGP exam preparation process simple, quick, and smart in all aspects. To avail this objective the Easy4Engine is offering valid, updated, and real AIGP practice test questions in three easy-to-use and high-in-demand formats. These formats are IAPP PDF Questions files, desktop practice test software, and web-based AIGP Practice Test software. All these three IAPP Certified Artificial Intelligence Governance Professional AIGP exam question formats are designed and verified by experienced and qualified IAPP AIGP certification exam trainers. So you can trust IAPP Certified Artificial Intelligence Governance Professional AIGP practice test questions and start AIGP exam preparation without wasting further time.

## IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q75-Q80):

### NEW QUESTION # 75

Which of the following is a subcategory of AI and machine learning that uses labeled datasets to train algorithms?

- A. Supervised learning
- B. Expert systems.
- C. Generative AI.
- D. Segmentation.

**Answer: A**

**Explanation:**

Supervised learning is a subcategory of AI and machine learning where labeled datasets are used to train algorithms. This process involves feeding the algorithm a dataset where the input-output pairs are known, allowing the algorithm to learn and make predictions or decisions based on new, unseen data. Reference:

AIGP BODY OF KNOWLEDGE, which describes supervised learning as a model trained on labeled data (e.g., text recognition, detecting spam in emails).

**NEW QUESTION # 76**

A French medical research center wishes to develop an AI-based system which will predict the risk of serious diseases based on the patient's genetic data. In order to do so it contracts with a tech company and provides it with patients' data previously obtained by the center during the research. To guarantee compliance when processing special categories of personal data, the medical research center must ensure that:

- A. The tech company is located in the EU and is not cloud-based.
- **B. The patients have given explicit consent to using the data.**
- C. The patients' health and genetic data is anonymized.
- D. The AI-based system is designed for the purposes of preventive medicine.

**Answer: B**

**Explanation:**

Processing special categories of personal data, like health and genetic data, requires explicit consent from patients to ensure compliance with data protection laws.

**NEW QUESTION # 77**

Before training an AI model, which activity best supports governance and risk mitigation?

- **A. Performing an AI impact assessment**
- B. Selecting the largest available dataset
- C. Publishing a transparency notice
- D. Deploying the model in a test environment

**Answer: A**

**NEW QUESTION # 78**

A US hospital plans to develop an AI that will review available patient data in order to propose an initial diagnosis to licensed physicians. The hospital will implement a policy that requires physicians to consider the AI proposal, but conduct their own physical examinations prior to making a final diagnosis.

An important ethical concern with this plan is?

- A. Whether physicians understand how the AI works.
- **B. Whether the AI was trained on a representative dataset.**
- C. Whether the AI will have an error rate comparable to human physicians.
- D. Whether patients will receive an economic benefit from the use of AI.

**Answer: B**

**Explanation:**

The core ethical concern when deploying diagnostic AI in a healthcare setting is ensuring fairness and accuracy across diverse patient populations. If the AI is trained on a dataset that is not representative of the population it will serve, it risks reinforcing health disparities and leading to misdiagnoses.

From the AI Governance in Practice Report 2025:

"Training datasets lacking in diversity can produce outputs that systematically underperform for certain groups... this can lead to inaccurate or biased outcomes in healthcare settings." (p. 41)

"Bias, discrimination and fairness challenge... inadequate or nonrepresentative training data can result in AI systems that propagate historical disparities." (p. 42) While physician oversight may reduce risk, biased data can still shape clinical decision-making.

\* A- Economic benefit is not central to ethical risk here.

\* C- Important but less critical than data representativeness.

\* D- Error rate matters but is addressed via validation; it's not the core ethical issue.

### NEW QUESTION # 79

All of the following are required for high-risk AI systems under the EU AI Act EXCEPT?

- A. Publishing a detailed report on the training data used.
- B. Retaining system-generated logs for at least six months.
- C. Conducting a conformity assessment.
- D. Conducting post-market monitoring.

**Answer: A**

Explanation:

The EU AI Act imposes several mandatory obligations on high-risk AI systems, but publishing a detailed report on training data is not one of them.

From the AI Governance in Practice Report 2025:

"It mandates drawing up technical documentation for high-risk AI systems, and requires high-risk AI systems to come with instructions for use that disclose various information, including characteristics, capabilities and performance limitations." (p. 34)  
"To make high-risk AI systems more traceable, it also requires AI systems to be able to automatically allow for the maintenance of logs throughout the AI life cycle."

"Conducting post-market monitoring" and "conformity assessments" are explicit requirements for high-risk systems. (p. 34-35)  
However, publishing detailed training data is typically required only for general-purpose AI systems with systemic risk, not standard high-risk AI systems.

\* A. Log retention, B. Post-market monitoring, and C. Conformity assessments are all required under the EU AI Act for high-risk systems.

### NEW QUESTION # 80

.....

We are constantly updating our IAPP AIGP practice material to ensure that students receive the latest AIGP questions based on the actual IAPP Certified Artificial Intelligence Governance Professional exam content. Moreover, we also offer up to 1 year of free updates and free demos. Easy4Engine also offers a money-back guarantee (terms and conditions apply) for applicants who fail to pass the AIGP test on the first try.
