最新C_WME_2506考古題，C_WME_2506認證考試

手上能拿到一些實用的認證證書，無疑為自己的就業開拓了一番新的領土和創造了一些機會。C_WME_2506 是全球最大的網絡設備公司 SAP 公司的認可的初級技術認證，在整個 SAP 認證體系中處於售前規劃方向的基礎證書，有了C_WME_2506 認證你的平均年薪將不低於10萬人民幣。雖然獲取 C_WME_2506 認證需要投入額外的時間與金錢，但事實證明IT認證的投入產出是值得的，對於未來的職業發展非常有利。

最新的 SAP Certified Associate C_WME_2506 免費考試真題 (Q14-Q19):

問題 #14

Why is it recommended to disable the multi-language Manual Toggle when using the multi-language Auto- Toggle?

- A. To ensure that the Manual Toggle is only available for administrators
- B. Because Manual Toggle consumes more resources than Auto-Toggle
- C. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings
- D. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly

答案: C

解題說明:

WalkMe's multi-language feature allows content to be displayed in different languages, with two toggle options: Auto-Toggle, which automatically selects the language based on user settings (e.g., browser or account preferences), and Manual Toggle, which lets users manually choose their language. When both toggles are enabled, a user's manual language selection can override the Auto-

Toggle's automatic detection, leading to conflicts and inconsistent user experiences. Disabling the Manual Toggle ensures that the Auto- Toggle functions as intended, delivering content in the user's preferred language without interference.

The other options are incorrect:

- * Option A is wrong because the Manual Toggle is not restricted to administrators; it's available to end users.
- * Option B is misleading, as there's no evidence that Manual Toggle consumes significantly more resources.
- * Option D is incorrect, as neither toggle typically causes unexpected page refreshes.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.8: Multi-Language Support):

"When using Auto-Toggle for multi-language content, it is recommended to disable the Manual Toggle to avoid conflicts. Manual selections by users can override Auto-Toggle settings, leading to inconsistent language display." The course Advancing Your Skills in Building WalkMe Solutions states:

"To ensure a seamless multi-language experience, disable the Manual Toggle when Auto-Toggle is active.

This prevents user overrides that could disrupt the automatic language detection process." Option C correctly explains the recommendation to disable the Manual Toggle to prevent conflicts.

問題 #15

Your company has a reporting page with features that have always been available. They recently added the ability for users to create their own reports. Not everyone uses the reporting tools, but they want to announce the new report creation feature for those who do use it. They will use a ShoutOut for this and only want to show it to users who use the tool.

Under the ShoutOut's engagement tab, which auto-play option would be best?

- A. Play once a day
- B. Auto-play
- C. Off (activate via a Launcher)
- **D. Play according to a rule**

答案： D

問題 #16

What is the primary purpose of Digital Adoption?

- **A. To ensure employees and customers use digital platforms and capabilities effectively**
- B. To reduce IT support teams by automating all processes
- C. To eliminate the need for employee training on new software
- D. To increase the number of applications used in an organization

答案： A

問題 #17

Which of the following is a capability of WalkMe's Smart Walk-Thrus?

- A. Preventing users from interacting with pop-ups
- **B. Providing step-by-step on-screen guidance in real time**
- C. Blocking users from making changes to the software
- D. Removing unused applications from the tech stack

答案： B

解題說明：

WalkMe's Smart Walk-Thrus are designed to deliver step-by-step on-screen guidance in real time, guiding users through processes within an application. This capability uses interactive balloons and triggers to provide contextual instructions, enhancing user adoption and reducing errors without altering the underlying software.

The other options are incorrect:

- * Preventing pop-up interactions(B) is not a primary Smart Walk-Thru function, though Launchers can block elements.
- * Removing unused applications(C) is unrelated to Smart Walk-Thrus; it may relate to Discovery's License Optimization.
- * Blocking software changes(D) is not a WalkMe feature, as it focuses on guidance, not restrictions.

Extract from Official WalkMe Documentation:

According to the SAP WalkMe Digital Adoption Consultant Study Guide (Section 1.1: WalkMe Fundamentals):

"Smart Walk-Thrus provide real-time, step-by-step on-screen guidance, helping users navigate processes and complete tasks efficiently within applications." The course WalkMe Fundamentals states:

"A core capability of Smart Walk-Thrus is delivering interactive, real-time guidance directly on the screen, simplifying complex processes for users." Option A accurately describes a Smart Walk-Thru capability.

問題 #18

What is the primary difference between Global Level Design and Local Level Design in WalkMe?

- A. Global Level Design only affects ShoutOuts, while Local Level Design affects SmartTips and Launchers.
- B. Global Level Design requires CSS knowledge, while Local Level Design does not for certain elements.
- C. Global Level Design is only available for administrators, while Local Level Design is available for all users.
- **D. Global Level Design applies to all WalkMe content, while Local Level Design applies to specific items and can override global settings.**

答案: D

問題 #19

.....
