NS0-901 Latest Exam Vce | Valid Braindumps NS0-901 Ebook

If you want to get a good job, and if you are not satisfied with your present situation, if you long to have a higher station in life. We

think it is high time for you to try your best to gain the NS0-901 certification. You do not need to think it is too late for you to study. As the saying goes, success and opportunity are only given to those people who are well-prepared! If you really long to own the NS0-901 Certification, it is necessary for you to act now. We are willing to help you gain the NS0-901 certification.

Network Appliance NetApp Certified AI Expert Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86

An organization is planning to deploy a large AI infrastructure but wants to avoid a large, upfront capital expenditure. They prefer an operational expenditure (OpEx) model where they pay for storage and compute resources as they are consumed. They also need the flexibility to scale resources up or down based on project demands.

Which NetApp consumption model is specifically designed to meet these financial and operational requirements?

- A. NetApp Keystone, which provides a subscription-based, pay-as-you-go service for on-premises and cloud storage.
- B. A standard capital purchase of AFF and ASA systems.
- C. A perpetual licensing model for all ONTAP software features.
- D. NetApp Cloud Volumes ONTAP PAYGO licensing only.

Answer: A

NEW QUESTION # 87

Which of the following describes the impact of generative AI in content creation?

- A. Generative AI analyzes data without generating content.
- B. Generative AI predicts customer preferences without creating new content.
- C. Generative AI can create new content such as text, images, and videos.
- D. Generative AI only processes pre-existing content.

Answer: C

NEW QUESTION # 88

Which of the following best describes the difference between data lakes, data warehouses, and lakehouses?

- A. Data lakes store metadata, data warehouses store transaction data, and lakehouses store archival data.
- B. Data lakes store data in cloud storage, data warehouses store it in traditional databases, and lakehouses store it in external drives.
- C. Data lakes store structured data, data warehouses store unstructured data, and lakehouses store only real-time data.
- D. Data lakes store raw, unstructured data, data warehouses store structured data, and lakehouses combine the features of both.

Answer: D

NEW QUESTION # 89

A network administrator, attempting to harden the security of the data center, modifies a firewall access control list (ACL). Immediately afterward, the "Advisor Assistant" application pods can no longer mount their required NFS volumes from the AFF A-Series. The MLOps team confirms the pods are stuck in a 'ContainerCreating' state with a 'MountVolume.SetUp failed... connection timed out' error. The administrator provides the new, active firewall rule:

```
RULE | ACTION | PROTOCOL | SOURCE_IP_RANGE | DEST_IP_RANGE | DEST_PORT --|--|  
|--|--51 | ALLOW | TCP | 10.20.5.0/24 | 10.20.10.0/24 | 2049
```

What is the most likely reason for the mount failures?

- A. The 'SOURCE_IP_RANGE' is incorrect and does not include the Kubernetes pod IP addresses.
- B. The firewall rule is blocking the NFSv4 protocol, which requires TCP port 2050.
- C. The firewall rule is blocking the NFS lock manager (NLM) protocol, which is required for file locking.
- D. The firewall rule is blocking the Portmapper/RPCbind service (TCP/UDP port 111), which is necessary for the initial NFS mount negotiation.

Answer: D

NEW QUESTION # 90

The "Advisor Assistant" application, running as a pod in Kubernetes, suddenly cannot access its data on the AFF A-Series. The application logs show "connection timed out" errors. The network team provides a firewall log snippet for the traffic between the application pod and the storage system's NFS data LIF.

```
TIME | SRC_IP | DST_IP | PROTO | DST_PORT | ACTION
```

```
-|--||--|
```

```
2025-07-11T16:01:10Z | 10.20.5.101 (Pod) | 10.20.10.55 (LIF) | TCP | 111 | BLOCKED
```

```
2025-07-11T16:01:12Z | 10.20.5.101 (Pod) | 10.20.10.55 (LIF) | TCP | 2049 | BLOCKED
```

What is the most likely cause of the connectivity failure?

- A. The ONTAP system's data LIF is offline.
- **B. A network firewall between the pod's subnet and the storage subnet is blocking the required NFS ports.**
- C. The AFF A-Series does not support the NFS protocol.
- D. The application pod has incorrect mount options configured.

Answer: B

NEW QUESTION # 91

.....

The web-based NS0-901 mock test is compatible with Chrome, Firefox, Internet Explorer, MS Edge, Opera, Safari, and others. This version of the Network Appliance NS0-901 practice exam requires an active internet connection. It does not require any additional plugins or software installation to operate. Furthermore, Android, iOS, Windows, Mac, and Linux support the Network Appliance NS0-901 web-based practice exam. Features of the EXAM CODE desktop practice exam software are web-based as well.
