CLT Exam Price - CLT Exam Material

The modern job market is becoming more competitive with every passing moment. You have to be ready for it and learn in-demand skills with the Certified Logistics Technician (CLT) 4.0 Exam CLT certification exam. If you are not doing this you are going to end up in a normal company with low pay. Be smart in your decision and get registered for the Certified Logistics Technician (CLT) 4.0 CLT certification exam and put all your efforts, commitment and dedication to crack the Certified Logistics Technician (CLT) 4.0 CLT exam. Once you pass the Certified Logistics Technician (CLT) 4.0 CLT certification exam you will get personal and professional benefits throughout your career. Do you have the plan to accept this challenge and enroll in the CLT Certification Exam? Looking for a simple, quick, and smart way to pass the Certified Logistics Technician (CLT) 4.0 CLT exam? If your answer is yes then you do not need to get worried about it. Just visit Dupleader and explore the top features of MSSC CLT PDF Questions and practice tests. The Dupleader is quite confident that you will crack the CLT exam shortly.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q56-Q61):

NEW QUESTION # 56

The common tool to perform a cycle count using the UPC label or similar labels is

- A. physical inventory tags
- **B. handheld bar code scanner**
- C. wedge counter
- D. material handling equipment-mounted data terminal

Answer: B

Explanation:

The handheld bar code scanner is the standard device used in cycle counting and verification processes. CLT "Inventory Control" identifies cycle counting as a periodic counting method used to maintain continuous inventory accuracy. Bar code scanners allow operators to quickly identify and record item numbers, quantities, and locations by scanning Universal Product Code (UPC) or SKU labels. Data is transmitted to the WMS for reconciliation against system records. This method reduces human error, minimizes disruption, and provides real-time updates compared to traditional physical inventory counts. CLT highlights the efficiency, precision, and auditability of barcode-assisted counts as a best practice for modern warehouse operations.

NEW QUESTION # 57

Which of the following products require special handling and storage?

- A. canned food goods
- B. shoes
- **C. refrigerated products**
- D. paper products

Answer: C

Explanation:

Refrigerated products require specialized handling and storage due to temperature sensitivity and spoilage risk. The CLT "Safe Handling and Storage" section classifies temperature-controlled goods, including perishable foods and pharmaceuticals, as requiring cold chain management. This involves continuous monitoring, insulated containers, and precise environmental controls to maintain product quality and safety. Canned goods, paper, and footwear do not require such conditions. CLT emphasizes that handling refrigerated materials demands adherence to Food Safety Modernization Act (FSMA) and Good Distribution Practice (GDP) standards. Proper temperature verification, documentation, and equipment calibration are essential for compliance. Failure to maintain specified conditions can result in contamination, product loss, or legal violations, making refrigerated storage one of the most regulated areas in logistics.

NEW QUESTION # 58

Which of the following measures provides information about the amount of time it takes a carrier to move products from one point to another?

- A. Delayed in traffic time
- **B. In-transit time variability**
- C. Detention time
- D. Vehicle load/unload time

Answer: B

Explanation:

In-transit time variability measures how consistent a carrier is in meeting scheduled transit times between origin and destination. CLT identifies it as a key logistics performance indicator affecting customer service and reliability. Lower variability means shipments arrive predictably, supporting better inventory management and production scheduling. Conversely, high variability increases the need for safety stock and buffer time. It differs from detention (delay at loading/unloading) and simple traffic delays by focusing on total door-to-door transit performance. Organizations often use historical averages and standard deviation analysis to quantify this measure. Maintaining minimal variability reflects strong carrier management, route optimization, and effective scheduling—all vital in lean logistics environments where precision timing reduces total supply chain cost.

NEW QUESTION # 59

A dispatch list usually contains all of the following EXCEPT

- A. items going into each trailer
- B. trailer loading schedule
- **C. trailer manifest**
- D. special shipment out of the norm

Answer: C

Explanation:

A dispatch list is a planning and control document used in warehouse and transportation scheduling. It typically identifies trailers to be loaded, their time slots, destinations, and any special handling requirements. The CLT "Dispatch and Tracking" module explains that it functions as a daily operational schedule to coordinate dock activities and outbound sequencing. While the trailer manifest provides detailed package-level shipment data, it is a separate document created later in the shipping process. Therefore, "trailer manifest" is not part of the dispatch list. The list focuses on workflow organization-ensuring personnel know which loads are ready, which are pending, and what exceptions must be handled. CLT emphasizes accurate communication of dispatch data to avoid congestion, missed carrier cut-offs, and inefficient loading.

NEW QUESTION # 60

What information would be unnecessary in a packing slip sent with the customer's shipment?

- A. the origination of the shipment
- **B. internal stock adjustments**
- C. the contents of the shipment
- D. any items placed on backorder

Answer: B

Explanation:

A packing slip accompanies outbound shipments and provides a detailed list of what is included in the shipment, its origin, and any backordered items. According to the CLT "Packaging and Shipment" standards, its purpose is to confirm what was shipped and assist the customer in verifying receipt. Internal stock adjustments, however, are warehouse control data related to inventory accounting and are not relevant or appropriate for inclusion on external documents. Including such internal data could cause confusion or reveal proprietary operational details. The CLT emphasizes clear, customer-facing communication-packing slips should reflect only what directly relates to the customer's order fulfillment, ensuring transparency and professionalism in documentation.

NEW QUESTION # 61

.....

Stop wasting time on meaningless things. There are a lot wonderful things waiting for you to do. You still have the opportunities to become successful and wealthy. The CLT study materials is a kind of intelligent learning assistant, which is capable of aiding you pass the CLT Exam easily. As long as you have the passion to become matter and take a challenge, you will find that our CLT practice engine can lead you to a bighter future.
