PL-900 exam is also suitable for individuals who are responsible for creating and managing business solutions in their organizations. Candidates who pass the exam will demonstrate their ability to understand the Power Platform's core capabilities, use cases, and implementation best practices.

Microsoft Power Platform Fundamentals Sample Questions (Q367-Q372):

NEW QUESTION # 367

A rapidly growing company wants to empower users to build apps, automate business processes, and analyze data without requiring IT expertise or development skills and without increasing IT expenses and dependencies.

You need to recommend tools so that users can accomplish specific tasks.

Which tools should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Microsoft Flow

Microsoft Flow, now called Power Automate, is cloud-based software that allows employees to create and automate workflows and tasks across multiple applications and services without help from developers.

Box 2: Power Apps

PowerApps is a suite of apps, services, connectors and data platform that provides a rapid application development environment to build custom apps for your business needs.

Box 3: Power BI

Power BI is a business analytics solution that lets you visualize your data and share insights across your organization, or embed them in your app or website. Connect to hundreds of data sources and bring your data to life with live dashboards and reports.

NEW QUESTION # 368

A company is implementing Power BI to track sales.

Each of the company's regions has specific quarterly and yearly sales goals.

You need to build a Power BI dashboard for various reporting requirements.

Which chart types should you use? To answer, drag the appropriate chart types to the correct requirements.

Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: KPIs

A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

Box 2: Line chart

Line charts emphasize the overall shape of an entire series of values, usually over time.

Box 3: Donut

Doughnut charts are similar to pie charts. They show the relationship of parts to a whole. The only difference is that the center is blank and allows space for a label or icon.

NEW QUESTION # 369

This question requires that you evaluate the underlined text to determine if it is correct.

You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. three

- C. one
- D. four

Answer: B

Explanation:

Section: Describe the business value of Power Platform

Explanation:

Restore a canvas app to a previous version in PowerApps.

1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.
4. In the confirmation dialog box, click or tap Restore.

A new version is added to your list.

NEW QUESTION # 370

You are authoring a Power Virtual Agents bot for a company that sells flowers and shrubs.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Yes

Chatbots built with Power Virtual Agents will understand and display content that's locally relevant to the user. Localized handling and formatting are based on the user's browser locale setting, and include the following elements within a chat conversation:

Date and time

Numbers

ZIP or postal code

Currency

Speed

Box 2: Yes

Custom entities:

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

For instance, let's say you want to build a bot for an outdoor store. In this case, you'll need to teach the bot to acknowledge the "outdoor gears product" category in a dialog.

NEW QUESTION # 371

A company stores its customer warranty information in Microsoft Dataverse.

Authenticated and authorized customers must be able to access their own warranty information without requiring a user-assigned Microsoft Power Platform license.

You need to share warranty information with these customers.

What should you use?

- A. Model-driven app
- B. Canvas app
- C. Power Pages site
- D. Power BI report

Answer: C
