We provide 3 versions for you to choose and you only need 20-30 hours to learn our ChromeOS-Administrator training materials and prepare the exam. The passing rate and the hit rate are both high. We provide 24-hours online customer service and free update within one year. And if you have a try on our ChromeOS-Administrator Exam Questions, you will find that there are many advantages of our ChromeOS-Administrator training materials.

Google Professional ChromeOS Administrator Exam Sample Questions (Q117-Q122):

NEW QUESTION # 117

A customer deploys a large number of ChromeOS devices and would like to start the process of turning on Zero-Touch Enrollment (ZTE) to streamline their deployment process. As an administrator, what would be required to enable ZTE?

- A. Create a pre-provisioning token
- B. Identify OU to place devices during enrollment
- C. Create a zero-touch token
- D. Grant partner admin access

Answer: A

Explanation:
To enableZero-Touch Enrollment (ZTE)for ChromeOS devices, an administrator must firstcreate a pre- provisioning token. This token allows devices to automatically enroll when they are first powered on and connected to the internet. The pre-provisioning token links the device to the correct organization and management policies.
Verified Answer from Official Source:
The correct answer is verified from theGoogle Zero-Touch Enrollment Guide, which outlines the process of setting up pre-provisioning tokens for automated enrollment.
"To set up Zero-Touch Enrollment, generate a pre-provisioning token in the Admin console and configure it with the device provider." Creating the token ensures that new devices are automatically configured and enrolled without manual intervention, saving time during mass deployments.
Objectives:
* Automate ChromeOS device enrollment.
* Simplify large-scale deployments.

NEW QUESTION # 118

As a ChromeOS Administrator, you are tasked with blocking incognito mode in the ChromeOS Browser.
How would you prevent users from using incognito mode?

- A. Go to "User & Browser Settings" to restrict sign-in to pattern and "Disallow incognito mode."
- B. From "Device Settings", change Kiosk settings to "Disallow incognito mode."
- C. In "Enrollment Settings", disable verified access and incognito mode for content protection.
- D. Navigate to "Users & Browser Security Settings" and set the "Disallow incognito mode" policy.

Answer: D

Explanation:
To block incognito mode in ChromeOS, administrators need to configure the policy under"Users & Browser Security Settings". The specific policy to disable incognito mode ensures that users can only browse in regular mode, allowing for better tracking and compliance.
Verified Answer from Official Source:
The correct answer is verified from theGoogle Admin Console Policies Guide, which details managing incognito mode via User & Browser settings.
"To disable incognito mode, go to Admin console > Devices > Chrome > Settings > Users & browsers > Security settings, and select 'Disallow incognito mode'." Disabling incognito mode is essential for compliance and security, especially in educational and enterprise environments where browsing history must be retained.
Objectives:
* Manage browser settings for security compliance.
* Disable incognito mode on ChromeOS devices.

NEW QUESTION # 119

You need to create a recovery image on a USB stick. Which two steps should you take?
Choose 2 answers

- A. Go to Chrome Web Store on a Chrome device

- B. Go to Device Settings
- C. Go to Google Play store
- D. Go lo google com/chromebooks
- E. Install Chrome Recovery Utility and download the image for the coned device model to a USB stick

Answer: A,E

Explanation:
To create a recovery image on a USB stick, you need to:
* Access Chrome Web Store: Open the Chrome Web Store on a Chrome device (either a Chromebook or a computer with the Chrome browser installed).
* Install Chromebook Recovery Utility: Search for and install the "Chromebook Recovery Utility" extension.
* Launch the Utility: Open the installed extension.
* Identify Device: Enter the model number of the ChromeOS device for which you want to create the recovery image.
* Insert USB Stick: Insert a USB stick with sufficient storage capacity (at least 4GB).
* Download and Create: Follow the on-screen instructions in the utility to download the correct recovery image and create the bootable USB stick.
This process will prepare a USB stick that can be used to recover or reinstall ChromeOS on a device that is not functioning properly.

NEW QUESTION # 120
Your security department wants to mitigate the risk of data loss in the case of stolen equipment. As a ChromeOS Administrator, you want to ensure that your ChromeOS devices will be able to stay enterprise- managed. What should you do?

- A. Allow users into your organization to enroll new or re-enroll existing devices.
- B. Enable the Autocomplete domain feature.
- C. Force devices to automatically re-enroll after wiping.
- D. Add a disabled device return instruction message.

Answer: C

Explanation:
Enabling Forced Re-enrollment ensures that even if a device is wiped (Powerwashed), it will automatically re- enroll into the management domain once it connects to the internet. This feature is crucial for maintaining control and management over devices, particularly in cases of theft or loss.
Verified Answer from Official Source:
The correct answer is verified from the Google ChromeOS Management Best Practices, where it states that forced re-enrollment helps maintain device management post-wipe.
"When forced re-enrollment is enabled, devices that are wiped are automatically re-enrolled into your domain when connected to the internet." This setting ensures that the device will always be managed by the organization, regardless of whether it has been wiped, thus mitigating data loss risks.
Objectives:
* Manage device security and data integrity.
* Implement forced re-enrollment for ChromeOS devices.

NEW QUESTION # 121
A global organization is deploying ChromeOS devices to all of their users. Corporate policy requires all web traffic to be filtered using an existing enterprise solution such that employees cannot access 1 million unauthorized websites. What should you configure to meet this requirement?

- A. A "Network access control deny" policy to blocklist the URLs
- B. A firewall rule to blocklist the URLs
- C. A user policy enforcing the use of a web proxy
- D. A user policy to blocklist the URLs

Answer: C

Explanation:

The most effective way to ensure that all web traffic is filtered is toenforce the use of a web proxyvia user policy. By configuring the ChromeOS devices to use aproxy server, all internet traffic will be routed through the proxy, where filtering rules are applied.

Verified Answer from Official Source:

The correct answer is verified from theGoogle ChromeOS Network Management Guide, which recommends using a web proxy to manage and filter web traffic efficiently.

"To enforce web filtering policies, configure a web proxy through user policies. This ensures that all internet traffic passes through the filtering system." Web proxies allow IT administrators to manage and restrict access to websites centrally, providing consistent and scalable content filtering across the organization.

Objectives:

* Implement web filtering using a proxy.
* Enforce secure internet access policies.

NEW QUESTION # 122

......
