Realistic Salesforce New Plat-Admn-202 Exam Sample With Interarctive Test Engine & 100% Pass-Rate Latest Plat-Admn-202 Practice Materials

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our Plat-Admn-202 real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the Plat-Admn-202 Prep Guide in 5-10 minutes, so you can get our Plat-Admn-202 exam questions at first time. And then you can start your study after downloading the Plat-Admn-202 exam questions in the email attachments.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 2	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.

Topic 3	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 4	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 5	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

Salesforce Plat-Admn-202 Exam Questions Available At 25% Discount With Free Demo

The Salesforce Certified Platform App Builder (Plat-Admn-202) practice test software keeps track of each previous attempt and highlights the improvements with each attempt. The Salesforce Certified Platform App Builder (Plat-Admn-202) mock exam setup can be configured to a particular style and arrive at unique questions. PracticeTorrent Salesforce Plat-Admn-202 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The Salesforce Plat-Admn-202 Exam Dumps are similar to real exam questions. Our Salesforce Plat-Admn-202 practice test software is suitable for computer users with a Windows operating system.

Salesforce Certified Platform App Builder Sample Questions (Q98-Q103):

NEW QUESTION # 98
An app builder is creating a custom object called Testimonial__c and wants to connect Testimonial__c records with both the submitter's Contact record and Account record. If the Account is deleted, the Testimonial__c should also be deleted. If the Contact is deleted, but the Account remains, the Testimonial__c should remain.
How should this be accomplished?

- A. Make Testimonial__c a junction object between Account and Contact using master-detail relationships.
- B. Create a lookup relationship from Testimonial__c to Account and a master-detail relationship from Testimonial__c to Contact.
- C. Make both the Contact and Account fields required on the Testimonial__c object and create lookup relationships from Testimonial__c to Contact and to Account.
- D. Create a master-detail relationship from Testimonial__c to Account and a lookup relationship from Testimonial__c to Contact.

Answer: D

Explanation:
To connect Testimonial__c records with both the submitter's Contact record and Account record, an app builder should create a master-detail relationship from Testimonial__c to Account and a lookup relationship from Testimonial__c to Contact. A master-detail relationship creates a parent-child relationship between two objects and allows for roll-up summary fields, sharing settings, and

cascading actions. A lookup relationship creates a loose association between two objects and allows users to relate records from one object to another. Source

NEW QUESTION # 99
Universal Containers has a single Contact Lightning record page. A component takes up a lot of room on the page and is NOT needed by users with a Marketing profile.
What should the app builder use to solve this Issue?

- A. AppExchange
- B. Component visibility filter
- C. Field-level security
- D. Detail page layouts

Answer: B

Explanation:
The feature that the app builder should use to solve this issue is component visibility filter. A component visibility filter is a setting that can be applied to a Lightning component on a record page to control when the component is hidden or displayed based on certain conditions. The app builder can use a component visibility filter to hide the component from users with a Marketing profile. Option A is incorrect because detail page layouts are not related to Lightning components, but rather the fields and related lists that appear on record detail pages. Option C is incorrect because field-level security is not related to Lightning components, but rather the access level of fields for different profiles or permission sets. Option D is incorrect because AppExchange is not related to Lightning components, but rather an online marketplace where users can find and install apps and components.

NEW QUESTION # 100
An app builder wants to add the option to 'Send New Email' from Leads, Contacts and Accounts for users on mobile.
What is the benefit of using global actions to accomplish this?

- A. The global action's layout automatically clones the default page layout.
- B. Global actions are record-specific and are available when searching that particular
- C. Salesforce Lightning Component Library houses existing global actions prebuild for use.
- D. Global actions can be accessed anywhere actions are pages, feed and Chatter groups,

Answer: D

Explanation:
Global actions can be accessed anywhere actions are pages, feed and Chatter groups. This is correct because global actions are not tied to a specific object, and they can be added to any page that supports actions, such as record pages, home pages, feed pages, and Chatter groups.

NEW QUESTION # 101
DreamHouse Realty wants to make sure an Opportunity has a field Expected_Close_Date_c populated before it is allowed to enter the qualified stage.
How should an app builder solution this request?

- A. Record Type
- B. Activity History
- C. Page Layout
- D. Validation Rule

Answer: D

Explanation:
A validation rule is a formula that evaluates the data in one or more fields and returns a value of "True" or "False". Validation rules verify that the data a user enters in a record meets the standards you specify before the user can save the record. In this case, a validation rule can be used to check if the Expected_Close_Date_c field is populated before the Opportunity stage is set to qualified

NEW QUESTION # 102

The services manager wants to make sure the team enters case priority consistently.
What feature can an app builder use to accomplish this?

- A. Next Best Action
- B. Path
- C. Flow
- D. In-App Guidance

Answer: B

Explanation:
The best feature to use to ensure consistent case priority entry is Path. Path allows users to see key fields and guidance for each stage of a process, such as a case lifecycle. Path can also enforce data quality by making certain fields required at each stage. See [this article] for more information on Path.

NEW QUESTION # 103

......

Individuals who pass the Salesforce Certified Platform App Builder (Plat-Admn-202) certification exam demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. PracticeTorrent is aware that preparing with outdated Salesforce Certified Platform App Builder (Plat-Admn-202) study material results in a loss of time and money.
