CTS High Quality | CTS Hot Questions

To pass the AVIXA CTS exam on the first try, candidates need Certified Technology Specialist updated practice material. Preparing with real CTS exam questions is one of the finest strategies for cracking the exam in one go. Students who study with AVIXA CTS Real Questions are more prepared for the exam, increasing their chances of succeeding.

AVIXA CTS Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing AV Solutions: This section of the exam measures the skills of AV system integrators and focuses on the implementation of AV solutions. It involves integrating AV systems, verifying their functionality, and managing the integration process, including training, documentation, and ensuring operational readiness.
Topic 2	• Creating AV Solutions: This section of the exam measures the skills of AV system designers and covers the process of creating audiovisual solutions. It includes conducting customer needs analysis, performing site surveys to assess environmental factors like lighting and acoustics, developing project scopes, and designing AV solutions with detailed drawings and materials lists.
Topic 3	• Servicing AV Solutions: This section of the exam measures the skills of AV maintenance managers and focuses on the maintenance and repair of AV solutions. It involves supervising AV operations, conducting preventative maintenance, performing firmware and equipment upgrades, and troubleshooting and repairing AV systems to ensure they remain functional and efficient.
Topic 4	• Supporting AV System Operation: This section of the exam measures the skills of AV support specialists and covers the ongoing support of AV systems. It includes troubleshooting issues, providing remote assistance, supporting live events, and offering in-room operation training to ensure smooth system operation.

AVIXA CTS Exam Certification Details:

Exam Code	CTS
Passing Score	350 / 500

Exam Name	AVIXA Certified Technology Specialist (CTS)
Schedule Exam	Pearson VUE
MemberExam Price	$375(USD)
Duration	150 mins
Sample Questions	AVIXA CTS Sample Questions
Books / Training	Candidate Handbook
Number of Questions	110

100% Pass Quiz 2026 AVIXA - CTS High Quality

Thus, it will allow you to examine the AVIXA CTS Dumps before purchasing it. Prep4sureGuide proudly presents the exceptional AVIXA CTS material that will meet your expectations. Beware that the sections of the exam change from time to time. Therefore, be alert by checking the updates frequently. It will prevent you from wasting time, material expenses, and inner peace.

AVIXA Certified Technology Specialist Sample Questions (Q92-Q97):

NEW QUESTION # 92
Which connector is typically used for ease of termination for various signal types?

- A. ☐
- B. ☐

Answer: B

Explanation:
Connector A is a BNC (Bayonet Neill-Concelman) connector, which is commonly used for a variety of signal types, including video (such as composite and SDI), RF signals, and even some data signals. It is known for its ease of termination, with a simple twist-lock mechanism that ensures secure and quick connections. The BNC connector's versatility and reliability make it popular in professional AV environments.
* Connector B is a VGA (Video Graphics Array) connector, typically used for analog video signals, particularly between computers and monitors. However, VGA connectors are not typically associated with ease of termination due to their multiple pins and more complex soldering requirements compared to the quick-connect design of BNC connectors.
CTS Technology Specialist ReferenceThe CTS curriculum highlights BNC connectors as versatile and easy- to-use, suitable for a range of AV signal types. Their locking mechanism and straightforward assembly process make them a preferred choice for AV professionals needing quick and reliable connections across various applications.

NEW QUESTION # 93
Which one of these features has to be disabled for a network switch in a Dante network?

- A. IGMP (Internet Group Management Protocol)
- B. EEE (Energy Efficient Ethernet)
- C. QoS (Quality of Service)
- D. PoE (Power over Ethernet)

Answer: B

Explanation:
Energy Efficient Ethernet (EEE) must be disabled in a Dante network. EEE can cause latency and jitter issues which are detrimental to audio streams. Dante is designed for low-latency, high-reliability audio networking, and EEE's power-saving mechanisms, which involve putting links to sleep, can interfere with the consistent data transmission required by Dante networks. Disabling EEE ensures stable and uninterrupted network performance for audio applications.

NEW QUESTION # 94
Maintaining AV operations includes which of the following?

- A. conforming to DISCAS
- B. updating control system firmware
- C. measuring system SPL
- D. comparing NAG and PAG calculations

Answer: B

Explanation:
Maintaining AV operations involves ensuring that all system components are up to date and functioning correctly. One critical aspect is updating the control system firmware. Firmware updates often include performance improvements, security patches, and new features that can enhance the reliability and functionality of AV systems.

NEW QUESTION # 95
When planning video content with a client, it is important to get their Pantone data (PMS) to ensure

- A. their confidence monitor size is large enough.
- B. the displayed logo is the proper size and style.
- C. the displayed colors match printed colors.
- D. the displayed type face is the correct size and style.

Answer: C

Explanation:
Pantone data (PMS) is used to ensure color consistency between digital displays and printed materials. This is critical in branding to maintain accurate color representation across different mediums, particularly for logos and brand colors.
CTS Technology Specialist ReferenceCTS guidelines on content creation emphasize color matching as a key consideration for client branding, often involving Pantone color standards to achieve consistency.

NEW QUESTION # 96
Which of the following meters measures the light coming directly from a source?

- A. multi
- B. reflected
- C. SPL
- D. incident

Answer: D

Explanation:
An incident meter measures the light coming directly from a source. This type of meter is used to measure the intensity of light that falls on a subject or area, as opposed to a reflected meter, which measures light that bounces off a surface. Incident light meters provide accurate readings of the lighting conditions, which is essential for calibrating AV systems. According to Axis documentation, using an incident meter is crucial for obtaining precise light measurements in AV setups.

NEW QUESTION # 97
......

In addition to our CTS exam questions, we also offer a AVIXA Practice Test engine. This engine contains real CTS practice questions designed to help you get familiar with the actual Certified Technology Specialist (CTS) pattern. Our Certified Technology Specialist (CTS) exam practice test engine will help you gauge your progress, identify areas of weakness, and master the material.
