Microsoft Identity and Access Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50

You need to resolve the recent security incident issues.

What should you configure for each incident? To answer, drag the appropriate policy types to the correct issues. Each policy type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 51

You have an Azure Active Directory (Azure AD) tenant named contoso.com that has Azure AD Identity Protection enabled.

You need to implement a sign-in risk remediation policy without blocking user access.

What should you do first?

- A. Enforce Azure AD Password Protection.
- B. Configure access reviews in Azure AD.
- **C. Implement multi-factor authentication (MFA) for all users.**
- D. Configure self-service password reset (SSPR) for all users.

Answer: C

Explanation:

To implement a sign-in risk remediation policy.

When a sign in risk policy triggers:

Azure AD MFA can be triggered, allowing to user to prove it's them by using one of their registered authentication methods, resetting the sign in risk.

NEW QUESTION # 52

SIMULATION

Task 4

You need to ensure that all users can consent to apps that require permission to read their user profile. Users must be prevented from consenting to apps that require any other permissions.

Answer:

Explanation:

See the Explanation for the complete step by step solution

Explanation:

To ensure that all users can consent to apps that require permission to read their user profile and prevent them from consenting to apps that require any other permissions, you can configure the user consent settings in the Microsoft Entra admin center. Here's how you can do it:

Sign in as a Global Administrator:

Access the Microsoft Entra admin center with Global Administrator privileges.

Navigate to user consent settings:

Go to Identity > Applications > Enterprise applications > Consent and permissions > User consent settings 1.

Configure the consent settings:

Under User consent for applications, select the option that allows users to consent to apps that only require permission to read their user profile.

Ensure that all other permissions are set to require administrator consent, thus preventing users from consenting to apps that require

additional permissions1.

Save the settings:

After configuring the consent settings, select Save to apply the changes.

NEW QUESTION # 53

You have a Microsoft 365 tenant named contoso.com.

Guest user access is enabled.

Users are invited to collaborate with contoso.com as shown in the following table.

From the External collaboration settings in the Azure Active Directory admin center, you configure the Collaboration restrictions settings as shown in the following exhibit.

From a Microsoft SharePoint Online site, a user invites user3@adatum.com to the site.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 54

You have an on-premises datacenter that contains the hosts shown in the following table.

You have an Azure Active Directory (Azure AD) tenant that syncs to the Active Directory forest. Multi-factor authentication (MFA) is enforced for Azure AD.

You need to ensure that you can publish App1 to Azure AD users.

What should you configure on Server and Firewall1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
