Cisco Securing Networks with Cisco Firepower Sample Questions (Q77-Q82):

NEW QUESTION # 77

A network administrator is reviewing a packet capture. The packet capture from inside of Cisco Secure Firewall Threat Defense shows the inbound TCP traffic. However, the outbound TCP traffic is not seen in the packet capture from outside Secure Firewall Threat Defense. Which configuration change resolves the issue?

- A. Packet capture must include UDP traffic.
- **B. Route to the destination must be added.**
- C. Inside interface must be assigned a lower security level.
- D. Inside interface must be assigned a higher security level.

Answer: B

NEW QUESTION # 78

An engineer must implement static route tracking on a Cisco Secure Firewall Threat Defense appliance. Static route and IP SLA operation has already been configured. Static route must be removed from the routing table if the tracked object is unreachable. Which action must the engineer take next to meet the requirement?

- A. Enable an ICMP redirect message on the interface connected to the backup path.
- B. Enable the IP SLA Responder on the backup path interface.
- **C. Assign a tracking object to the static route and the IP SLA operation.**
- D. Implement a secondary route that has a higher precedence.

Answer: C

Explanation:

Linking the IP SLA operation and its tracking object to the static route causes the route to be withdrawn automatically when the SLA probe fails.

NEW QUESTION # 79

Which command is run on an FTD unit to associate the unit to an FMC manager that is at IP address 10.0.0.10, and that has the registration key Cisco123?

- A. configure manager add Cisco123 10.0.0.10
- B. configure manager local Cisco123 10.0.0.10
- C. configure manager local 10.0.0.10 Cisco123
- **D. configure manager add 10.0.0.10 Cisco123**

Answer: D
