ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q80-Q85):

NEW QUESTION # 80

In a meeting held with the goal of validating a set of requirements, two participants become involved in an in- depth discussion about the content of a requirement. One of the participants is of the opinion that the requirement must be realized as described, since the success of the product is otherwise jeopardized. The other party dissents and argues that this requirement cannot be realized technically as described. What is the best way for you to react to this situation? (1 Point)

- A. You note both arguments and let the project manager make the decision.
- B. You invite all stakeholders to a workshop and try to reach agreement.
- C. You get together with the affected stakeholders and attempt to reach an agreement on this.
- D. You prefer the second opinion since you believe that the discussion makes no sense if the requirement cannot be realized.

Answer: C

NEW QUESTION # 81

Select the two typically lowest abstraction levels among the following options.

- A. User
- B. Business
- C. System
- D. Component
- E. Stakeholder

Answer: C,D

NEW QUESTION # 82

You would like to design a requirements document in such a way that it is particularly well suited to the project participants who are to continue working with it. Please select from the following statements the two most appropriate assignments of requirement properties to participants. (1 Point)

- A. For maintenance the requirements must be testable.
- B. For the tester the requirements must be practicable.
- C. For the project manager the requirements must be evaluated.
- D. For the developers the requirements must be easily changeable.
- E. For all participants the requirements must be consistent.

Answer: C,E

NEW QUESTION # 83

You are employed as a requirements engineer in a company that develops control software for electric motors.

During your work it becomes increasingly evident that the developers are very well aware of the necessary requirements, even though the requirements are not documented in their entirety. Nevertheless, you decide to document requirements systematically.

Which two of the following arguments justifies this step? (2 Points)

Documenting requirements systematically is important, because...

- A. ... non-documented requirements are difficult to negotiate between the stakeholders.
- B. ... implementation without documented requirements is not possible.
- C. ... documented requirements are also good requirements.
- D. ... the coverage of the requirements by means of test cases cannot be checked.

Answer: A,D

NEW QUESTION # 84

Choose the right sentence regarding the types of views:

- A. All the other options are wrong.
- B. Projective views provide information on a carefully chosen subset of requirements.
- C. A selective view presents a subset of the available data (attributes) for the requirements.
- D. An aggregating view presents summaries, totals, or averages derived from a group of requirements.

Answer: D

NEW QUESTION # 85
