### **SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q35-Q40):**

#### **NEW QUESTION # 35**

Organizational structures can be maintained directly in SAP TM. Determine whether this statement is true or false.

- A. false
- B. true

**Answer: B**

#### **NEW QUESTION # 36**

Transportation requirement types can be determined in SAP TM based on conditions, determine whether this statement is true or false

- A. false
- B. true

**Answer: B**

#### **NEW QUESTION # 37**

In which SAP Fiori apps can you define whether business shares are considered in the carrier selection process? Note: There are 2 correct answers to this question.

- A. Edit Freight Agreement
- B. Create Business Share
- C. Define Transportation Lane
- D. Edit Carrier Selection Settings

**Answer: B,D**

Explanation:

**NEW QUESTION # 38**

Which documents are created in materials management when you transfer a freight settlement document from transportation management to materials management when cost distribution is NOT enabled? Note: There are 2 correct answers to this question.

- A. Purchase order
- B. Service entry sheet
- C. Carrier invoice
- D. Settlement management document

**Answer: A,B**

Explanation:

When a freight settlement document (FSD) is transferred from SAP S/4HANA Transportation Management to Materials Management (MM) without cost distribution enabled, the system creates specific documents to handle the financial settlement. According to the SAP documentation:

- \* Service entry sheet (B) is created in MM to record the services performed by the carrier, based on the FSD details.
- \* Purchase order (C) is generated to formalize the procurement of transportation services, linked to the FSD.

The other options are incorrect:

- \* Carrier invoice (A) is not created automatically in MM; it may be received from the carrier but is not a system-generated document.
- \* Settlement management document (D) is used in SAP S/4HANA for contract-based settlement but is not directly created from the FSD in this scenario.
