## Adobe Commerce AD0-E725 certkingdom exam torrent & AD0-E725 practice dumps

We have always set great store by superior after sale service, since we all tend to take responsibility for our customers who decide to choose our AD0-E725 training materials. We pride ourselves on our industry-leading standards of customer care. Our worldwide after sale staffs will provide the most considerate after-sale service for you in twenty four hours a day, seven days a week, that is to say, no matter you are or whenever it is, as long as you have any question about our AD0-E725 Exam Torrent or about the exam or even about the related certification, you can feel free to contact our after sale service staffs who will always waiting for you on the internet.

## Adobe AD0-E725 Exam Syllabus Topics:

---

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I</li> <li>O events and webhooks to create automated and connected business processes.</li> </ul>

## Adobe Commerce Developer Expert Sample Questions (Q31-Q36):

### NEW QUESTION # 31

A customer wants their Adobe Commerce Cloud platform to be upgraded to the latest available official version. They would like to assess the compatibility of their current version compared to the upgraded version.

How should the Developer gather this information and compile an upgrade plan for the customer?

- A. Run the command `bin/magento upgrade:compatibility:report` to export the needed information.
- B. Run the Site-Wide Analysis Tool (SWAT) which provides detailed information on the system.
- C. Familiarize themselves with the minimum system requirements of Adobe Commerce.

**Answer: A**

### NEW QUESTION # 32

An Adobe Commerce Developer is tasked to frequently send data to a third-party API. The API utilizes a JSON Web Token (JWT) that expires every hour. The developer decides to store the JWT in a custom cache.

Which step should the Developer take to implement this new custom cache type correctly?

- A. Define the custom cache type in `cache.xml` with a unique name and instance.
- B. Define the custom cache type in the `di.xml`, ensuring the cache model implements `CacheInterface`.
- C. Define the custom cache type directly in `system.xml` at the website level.

**Answer: A**

Explanation:

To create a custom cache type in Adobe Commerce:

Define the cache type in `etc/cache.xml` with a unique ID and class instance.

This ensures Magento recognizes the cache type and allows managing it with cache commands.

Option A is incorrect; DI configuration is not where cache types are defined.

Option C is wrong; `system.xml` defines admin configurations, not cache types.

Reference:

Adobe Commerce DevDocs - Custom cache types

### NEW QUESTION # 33

A client requests changes to their Pro Staging and Production environments. They supply a Developer with different domains for new websites to be created with the goal of expanding operations to multiple countries, doubling the current number of SKUs, and adding more customer groups.

Which two issues should the Developer anticipate based on the requested changes? (Choose two.)

- A. Recreate hierarchy navigation for every new website.
- **B. Catalog data expands as the number of websites and stores are increased.**
- C. Multiple websites may require duplicating custom functionality for each store, which increases code redundancy.
- **D. Additional stores can lead to a longer indexing process and slower response times for noncached catalog pages.**

**Answer: B,D**

Explanation:

When new websites and stores are added in Adobe Commerce:

The catalog data expands because product, price, inventory, and configuration data must be stored per website/store (B).

Indexing becomes more complex as indexers must recalculate data per website/store, which can increase indexing times and slow down noncached catalog pages (C).

A is incorrect because navigation hierarchy is managed via categories, not recreated per website automatically.

D is incorrect because Magento code is shared across stores; functionality is not duplicated per store.

Reference:

Adobe Commerce Architecture Guide - Multi-store setups

#### NEW QUESTION # 34

A customer wants to create a set of CMS blocks to be used on their website but does not wish to create these manually. An Adobe Commerce Developer is tasked to install the CMS blocks programmatically.

How should the Developer achieve this?

- A. Implement the `InstallSchemaInterface`, then use the block repository in the `execute()` function to create the blocks.
- **B. Implement the `DataPatchInterface`, then use the block repository in the `apply()` function to create the blocks.**
- C. Implement the `SchemaSetupInterface`, then use the block repository in the `apply()` function to create the blocks.

**Answer: B**

#### NEW QUESTION # 35

A Developer working on an Adobe Commerce Cloud project encounters an issue with the database service that requires investigation. To troubleshoot the issue, the Developer decides to securely access the cloud services from the local machine to directly interact with the services and run diagnostic commands.

Which command step is required to achieve this?

- **A. Use the `magento-cloud tunnel:open` command to access the cloud services.**
- B. Use the `magento-cloud service:connect` command to access the cloud services.
- C. Use the `php bin/magento cloud:tunnel:connect` command to access the cloud services.

**Answer: A**

Explanation:

To securely access services (such as MySQL, Redis, Elasticsearch) running in Adobe Commerce Cloud, developers must use the tunnel feature. The correct command is:

`magento-cloud tunnel:open`

This opens a secure tunnel from the local machine to the remote cloud environment services.

A is incorrect; there is no `cloud:tunnel:connect` Magento command.

B is incorrect; `service:connect` is not a valid Cloud CLI command.

C is correct.

Reference:

Adobe Commerce Cloud CLI - Tunnel to services

## NEW QUESTION # 36

.....

In today's fast-paced world, having access to Adobe Commerce Developer Expert (AD0-E725) study material on the go is important. VCETorrent Adobe Commerce Developer Expert (AD0-E725) PDF questions are compatible with all smart devices, allowing you to study and prepare for the AD0-E725 Exam whenever and wherever you choose. Since you can access real Adobe AD0-E725 dumps in PDF from your smartphone or tablet, you can easily fit AD0-E725 exam preparation into your busy schedule.
