시험준비에 가장 좋은 OGBA-101최신 업데이트 시험대비자료 최신버전 덤프데모 문제

성공을 위해 길을 찾고 실패를 위해 구실을 찾지 않는다는 말이 있습니다. The Open Group인증 OGBA-101시험이 영

어로 출제되어 시험패스가 너무 어렵다 혹은 회사다니느라 공부할 시간이 없다는 등등은 모두 공부하기 싫은 구실에 불과합니다. PassTIP의 The Open Group 인증 OGBA-101덤프만 마련하면 실패를 성공으로 바꿀수 있는 기적을 체험할수 있습니다.

The Open Group OGBA-101 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Enterprise Architecture and the TOGAF Standard: In this topic of the OGBA-101 exam, TOGAF business architects learn about the contents of the TOGAF framework, the TOGAF Architecture Development Method (ADM), and the TOGAF Library.
주제 2	<ul style="list-style-type: none"> Key Terminologies: The focal point of this TOGAF Business Architecture Foundation exam topic is about key terminologies of the Business Architecture.
주제 3	<ul style="list-style-type: none"> Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.
주제 4	<ul style="list-style-type: none"> Development of a Business Architecture: This topic explains how a Business Architecture is developed with the TOGAF ADM.
주제 5	<ul style="list-style-type: none"> TOGAF ADM: This topic of the OGBA-101 exam gives TOGAF business architects an introduction to the TOGAF ADM, its objectives, and usage.
주제 6	<ul style="list-style-type: none"> TOGAF Business Scenario method: The focal point of this OGBA-101 exam topic is the application of the TOGAF Business Scenario method.

최신 TOGAF Business Architecture Foundation OGBA-101 무료샘플문제 (Q91-Q96):

질문 # 91

Which of the following is guidance for creating value streams?

- A. Clearly define the triggering stakeholder.
- B. Identify the top-level value streams from components of capabilities.
- C. Create an initial set of value streams that provide a one-to-one mapping to existing capabilities.
- D. Include operational levels of detail.

정답: A

설명:

Value streams represent the series of steps an organization takes to deliver value to a customer or stakeholder. A key principle in defining value streams is clarity about who initiates the value stream and what triggers it. This is essential for several reasons:

* Understanding customer needs: Identifying the triggering stakeholder helps to understand their specific needs and expectations, which drives the design and optimization of the value stream.

* Defining scope and boundaries: Knowing the trigger helps to define the starting and ending points of the value stream, ensuring that it encompasses all the necessary activities to deliver the desired value.

* Measuring effectiveness: With a clear trigger, it becomes possible to measure the effectiveness of the value stream by tracking how well it meets the needs of the triggering stakeholder.

질문 # 92

Which of the following best describes a business capability?

- A. It delineates what a business does without an explanation of how, why, or where the capability is used.
- B. It is an articulation of the relationships between business entities that make up the enterprise.
- C. It is a qualitative statement of intent that should be met by the enterprise architecture capability developing the business architecture.

- D. It is a detailed description of the architectural approach to realize a particular solution.

정답: A

설명:

In TOGAF, a business capability represents a high-level abstraction of what a business does, independent of how, why, or where the capability is used. Here's a detailed explanation:

Definition of Business Capability:

Business Capability: A business capability describes the capacity or ability of a business to act or achieve a specific outcome. It is an abstraction of the business functions, representing what the business does.

Key Characteristics:

What, Not How: A business capability focuses on what the business does, without delving into the specifics of how, why, or where it is implemented or utilized. This abstraction helps in maintaining a clear and consistent understanding across the organization.

Independence: Business capabilities are designed to be independent of the organizational structure, processes, or systems that support them. This ensures that they remain stable even as the organization evolves.

TOGAF Reference:

Phase B: Business Architecture: In this phase, business capabilities are identified and mapped to understand the core functions of the business. This helps in aligning the architecture with business strategy and objectives.

Capability-Based Planning: TOGAF emphasizes capability-based planning, where business capabilities are used as the foundation for planning and decision-making.

Importance:

Strategic Alignment: Business capabilities provide a stable and consistent view of what the business does, which is crucial for aligning the architecture with strategic goals.

Foundation for Analysis: By focusing on what the business does, capabilities serve as a foundation for various analyses, including gap analysis, impact analysis, and capability maturity assessments.

In summary, a business capability delineates what a business does without an explanation of how, why, or where the capability is used, providing a stable and consistent foundation for strategic planning and architecture development.

질문 # 93

Refer to the table below:

Which ADM Phase(s) does this describe?

- A. Phase B, C and D
- B. Phase E
- C. Preliminary Phase
- D. Phase B

정답: A

설명:

The table describes the steps involved in Phase B (Business Architecture), Phase C (Information Systems Architectures), and Phase D (Technology Architecture) of the TOGAF ADM5. These phases are responsible for developing the target architectures for each domain and identifying the gaps between the baseline and target architectures. The table shows the outputs and outcomes of each phase, as well as the essential knowledge required for each phase.

The table describes the iterative cycle of defining requirements, identifying gaps, and creating solutions that occurs throughout the architecture development phases of the TOGAF ADM. This cycle is most prominent in:

Phase B (Business Architecture):

Develop the Business Architecture, identifying gaps between the baseline and desired business capabilities, processes, and information flows.

Define work packages to address these gaps and realize the target business architecture.

Phase C (Information Systems Architectures):

Develop the Data and Application Architectures to support the Business Architecture.

Identify gaps between the baseline and target information systems architectures.

Define work packages to address these gaps and realize the target data and application architectures.

Phase D (Technology Architecture):

Develop the Technology Architecture to support the Data and Application Architectures.

Identify gaps between the baseline and target technology architectures.

Define work packages to address these gaps and realize the target technology architecture.

질문 # 94

Complete the sentence. The TOGAF standard covers the development of four architecture domains. Business. Data. Technology and _____.

- A. Transition
- B. Capability
- C. Application
- D. Segment

정답: C

설명:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology, and Application. The Application Architecture domain defines the applications required to process the data and support the business functions.

The TOGAF standard describes the development of four architecture domains, which are considered its pillars.

These are Business, Data, Technology, and Application. The Application Architecture domain provides a blueprint for the individual application systems to be deployed, their interactions, and their relationships to the core business processes of the organization.

질문 # 95

Which of the following is a benefit of information mapping?

- A. It enables improved business process integration.
- B. It provides a framework for effective business requirements analysis.
- C. It provides a basis to support decision-making throughout the business.
- D. It highlights information requirements not addressed by a business architecture.

정답: C

설명:

One of the benefits of information mapping is that it provides a basis to support decision-making throughout the business.

Information mapping is a technique that can be used to document and visualize the information concepts and their relationships that are relevant for the business. Information mapping can help to identify the information needs, sources, flows, quality, and value of the business, as well as the gaps, issues, and opportunities for improvement. By providing a clear and consistent view of the information landscape, information mapping can enable better informed and more effective decisions at all levels of the business.
