We can claim that with our C_WME_2506 practice guide for 20 to 30 hours, you are able to attend the exam with confidence.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q41-Q46):

NEW QUESTION # 41
When are SmartTip validation rules evaluated?

- A. When the user refreshes the page.
- B. When the user enters content into a field and then clicks or tabs outside of the field.
- C. When the user clicks into a field.
- D. When the user enters content into a field.

Answer: B

Explanation:
SmartTips in WalkMe are used to provide guidance or validation for form fields, ensuring users input correct data. Validation SmartTips are configured with rules that check the content of a field against specific criteria (e.g., format, length, or value). These validation rules are evaluated when the user enters content into a field and then moves focus away from it, either by clicking outside the field or tabbing to another element. This behavior ensures that the validation occurs after the user has completed their input, providing immediate feedback without interrupting their workflow.
The other options are incorrect:
* When the user refreshes the page(A) does not trigger validation, as SmartTips are tied to user interactions with specific fields.
* When the user enters content into a field(B) is too early, as validation requires the user to finish inputting and move focus.
* When the user clicks into a field(D) triggers the display of guidance SmartTips, not validation rules.
Extract from Official WalkMe Documentation:
Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5:
SmartTips):
"Validation SmartTips evaluate their rules when the user enters content into a field and then removes focus from that field, either by clicking elsewhere or tabbing out. This ensures that validation feedback is provided after the user has completed their input." The courseAdvancing Your Skills in Building WalkMe Solutionsfurther explains:
"SmartTip validation rules are designed to check field input once the user has finished entering data and moves focus away (e.g., by clicking or tabbing out). This timing balances real-time feedback with non- disruptive user experience."Option C accurately describes when SmartTip validation rules are evaluated.

NEW QUESTION # 42
What is WalkMe known as the leading provider of?

- A. Digital Adoption Platform
- B. Dynamic Assistance Provider
- C. Direct Adoption Program
- D. Digital Application Platform

Answer: A

NEW QUESTION # 43
Which is the most preferred Unique User ID setting and the one you should explore first for UUID setup?

- A. WalkMe ID
- B. Cookie
- C. jQuery
- D. Variable

Answer: D

NEW QUESTION # 44
In the Editor, a Shuttle has a full green circle next to it when looking at the Production environment. How would you describe the status of this Shuttle?

- A. Draft mode in Test
- B. Published to Production but has been modified

- C. Published to Production
- D. Archived in Production

Answer: C

Explanation:
In the WalkMe Editor, a full green circle next to a content item, such as a Shuttle, in the Production environment indicates that the item is Published to Production and is live for end users. This status confirms that the Shuttle has been successfully deployed without subsequent modifications or archiving.
The other options are incorrect:
* Draft mode in Test (A) would show a different icon (e.g., gray or yellow) in the Test environment.
* Archived in Production (B) would show an archived status, not a green circle.
* Published but modified (C) would display a modified indicator, not a full green circle.
Extract from Official WalkMe Documentation:
According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.10: Publishing and Status):
"A full green circle in the Production environment indicates that the content item, such as a Shuttle, is published and active for end users." The course Getting Started with Building WalkMe Solutions states:
"Check the status icon in the Editor: a full green circle in Production means the content is live and published without pending changes." Option D correctly describes the Shuttle's status.

Course: Getting Started with Building WalkMe Solutions, Module 12: Managing Content Status.

NEW QUESTION # 45
Why is it recommended to disable the multi-language Manual Toggle when using the multi-language Auto- Toggle?

- A. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings
- B. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly
- C. To ensure that the Manual Toggle is only available for administrators
- D. Because Manual Toggle consumes more resources than Auto-Toggle

Answer: A

NEW QUESTION # 46
......

We guarantee that if you study our C_WME_2506 guide materials with dedication and enthusiasm step by step, you will desperately pass the exam without doubt. As the authoritative provider of study materials, we are always in pursuit of high pass rate of C_WME_2506 practice test compared with our counterparts to gain more attention from potential customers. Otherwise if you fail to pass the exam unfortunately with our C_WME_2506 Study Materials, we will full refund the products cost to you soon.
