

# **Analytics-Admn-201 Trainingsunterlagen & Analytics-Admn-201 German**

Laden Sie die neuesten DeutschPrüfung Analytics-Admn-201 PDF-Versionen von Prüfungsfragen kostenlos von Google Drive herunter: <https://drive.google.com/open?id=1alprV9anvVECDZw3IV6pFOQjooQbJRFx>

Die Schulungsunterlagen zur Salesforce Analytics-Admn-201 Prüfung von DeutschPrüfung sind eine Sammlung der Erfahrungen von denjenigen, die im IT-Bereich schon zertifiziert sind und ein Ergebnis der Innovation. Unsere Berufsgruppe von IT-Eliten bietet den breiten Kandidaten ständig die neuesten Schulungsunterlagen zur Salesforce Analytics-Admn-201 Zertifizierungsprüfung, deren Korrektheit zweifellos ist. Unser Ziel liegt darin, dass die Kandidaten in kürzester Zeit die Salesforce Analytics-Admn-201 Zertifizierungsprüfung beim ersten Versuch bestehen können.

Was Wir Ihnen bieten sind, die neuesten und die umfassendsten Test-Bank von Salesforce Analytics-Admn-201, die risikolose Kaufgarantie und die rechtzeitige Aktualisierung der Salesforce Analytics-Admn-201. Sie werden sich beim Kauf unbesorgt fühlen, indem Sie die Demo unserer Software kostenlos zu probieren. Die einjährige kostenfreie Aktualisierung der Salesforce Analytics-Admn-201 erleichtern Ihre Sorgen bei der Prüfungsvorbereitung. Was wir am meisten garantieren ist, dass unsere Software vielen Prüfungsteilnehmern bei der Zertifizierung der Salesforce Analytics-Admn-201 geholfen hat.

## **Kostenlose gültige Prüfung Salesforce Analytics-Admn-201 Sammlung - Examcollection**

Wenn Sie die DeutschPrüfung Website klicken, wundern Sie sich vielleicht, dass viele Leute jedentag DeutschPrüfung besuchen. Das ist ganz normal. Wir bieten den Kandidaten zahlreiche Schulungsunterlagen, mit denen sie die Salesforce Analytics-Admn-201 Prüfung bestehen können. Das heißt, dass die Schulungsunterlagen wirklich wirksam sind. Wenn Sie die Salesforce Analytics-Admn-201 Fragenkatalog kaufen wollen, verpassen Sie DeutschPrüfung nicht. Und Sie werden sicher mit unseren Produkten zufrieden.

## **Salesforce Certified Tableau Server Administrator Analytics-Admn-201 Prüfungsfragen mit Lösungen (Q29-Q34):**

### 29. Frage

What two events must occur for Tableau Server to recompute queries for a workbook cache after a scheduled refresh? (Choose two.)

- A. The workbook has been viewed recently
- B. The All Users group has a permission rule allowing access to the workbook
- C. The workbook was published in the last month
- D. The workbook has upcoming scheduled refresh tasks

**Antwort: A,D**

Begründung:

Tableau Server uses caching to speed up workbook loading by storing query results. After a scheduled extract refresh updates the data, the cache may need recomputing-let's dive into the mechanics:

\* Caching Basics:

\* VizQL Cache: Stores rendered views and query results for faster access.

\* Refresh Trigger: A scheduled refresh updates the underlying extract (.hyper), but the cache isn't automatically invalidated-it's demand-driven.

\* Recompute Conditions: Tableau recomputes the cache when the workbook is accessed (viewed) and its data has changed (e.g., via refresh).

\* Evaluation:

\* Option B (The workbook has upcoming scheduled refresh tasks): Correct.

\* Why: An upcoming refresh task indicates the workbook relies on an extract with a schedule. After the refresh runs, the data changes, priming the cache for recomputation on next view. Without a schedule, no refresh occurs, so this is a prerequisite.

\* Detail: Schedules are set in Schedules > Tasks-e.g., "Daily at 2 AM."

\* Option D (The workbook has been viewed recently): Correct.

\* Why: Viewing triggers cache recomputation if the data has changed (e.g., post-refresh).

Tableau uses a "lazy caching" model-cache updates only when a user loads the workbook, ensuring fresh results.

\* Detail: "Recently" isn't strictly defined but implies post-refresh access.

\* Option A (Published in the last month): Incorrect.

\* Why: Publish date is irrelevant-cache recomputation ties to data changes and access, not publication timing.

\* Option C (All Users group has permission rule allowing access): Incorrect.

\* Why: Permissions enable viewing, but recomputation requires actual access (viewing) and a refresh event, not just potential access.

Why This Matters: Caching balances performance and freshness-understanding triggers prevents stale data surprises.

Reference: Tableau Server Documentation - "Caching and Performance" ([https://help.tableau.com/current/server/en-us/perf\\_cache.htm](https://help.tableau.com/current/server/en-us/perf_cache.htm)).

### 30. Frage

What type of information is stored in the tsm maintenance backup -f<filename>.tsbak command?

- A. Topology data
- B. Repository data
- C. Notification settings
- D. SMTP server settings

**Antwort: B**

Begründung:

The tsm maintenance backup command creates a backup file (with a .tsbak extension) that captures critical data needed to restore Tableau Server in case of failure or migration. This backup primarily includes:

Repository data: This encompasses the PostgreSQL database, which stores metadata such as workbooks, data sources, user information, permissions, schedules, and subscriptions.

Configuration data: This includes server settings like authentication methods, port configurations, and service layouts, but it does not include topology data as a separate entity (topology is part of the configuration).

The command does not back up the following:

Extract files (stored in the File Store), which must be backed up separately if needed.

Log files, which are archived using tsm maintenance ziplogs.

Option A (Notification settings) is incorrect because while notification settings are part of the configuration data stored in the repository, they are not the primary focus of the backup. The broader category is "repository data."

Option B (SMTP server settings) is also incorrect for the same reason-SMTP settings are configuration data within the repository, but the backup is not

limited to just these settings.

Option D (Topology data) is incorrect because topology data (e.g., how services are distributed across nodes) is part of the configuration included in the backup, but it's not stored as a standalone item. The .tsbak file is centered on the repository database. Reference: Tableau Server Documentation - "Back Up Tableau Server Data" ([https://help.tableau.com/current/server/en-us/backup\\_restore.htm](https://help.tableau.com/current/server/en-us/backup_restore.htm)).

### 31. Frage

Which two types of content can you include in comments on a visualization? (Choose two.)

- A. Interactive snapshots of a view
- B. @mentions
- C. Images (jpg, png)
- D. Text

**Antwort: B,D**

Begründung:

Comments on Tableau Server visualizations facilitate collaboration. Let's explore what's supported:

\* Comments Feature: Enabled per site (Settings > General > Allow Comments). Users with "Add Comment" permission can post on views.

\* Option B (Text): Correct.

\* Details: The primary content type-users type free-form text in the comment box.

\* Use: Notes, questions, or feedback (e.g., "Sales spiked here-why?").

\* Option C (@mentions): Correct.

\* Details: Typing @username notifies the mentioned user via email or the UI (if notifications are enabled).

\* Use: Directs comments to specific people (e.g., "@John, check this trend").

\* Option A (Interactive snapshots of a view): Incorrect.

\* Details: Snapshots (static images) aren't supported in comments-users must take screenshots externally and can't embed them interactively.

\* Option D (Images - jpg, png): Incorrect.

\* Details: No attachment or image embedding in comments-text and mentions only. Workaround:

Link to an image hosted elsewhere.

Why This Matters: Comments enhance teamwork, but their simplicity (text + mentions) keeps the interface lightweight and focused.

Reference: Tableau Server Documentation - "Comment on a View" (<https://help.tableau.com/current/server/en-us/comment.htm>).

### 32. Frage

A user named John publishes a workbook named Sales Quota to a project named Sales. The All Users group has the View and Download Workbook/Save As capabilities only to the Sales project. A user named Sandy has the Explorer (can publish) site role, on the Sales Quota workbook. No other users or groups have permissions to the Sales project. The Sales project is set to Managed by the owner. What are the effective rights for Sandy?

- A. All of the capabilities associated with the Editor rule
- B. No access
- C. The same rights as John
- D. View and Download Workbook/Save As

**Antwort: D**

### 33. Frage

Which three methods should an administrator use to create a Tableau Server group or project? (Choose three.)

- A. Tableau Server browser interface
- B. tabcmd
- C. tsm customize
- D. REST API

## Antwort: A,B,D

### Begründung:

Tableau Server provides multiple methods to create groups (collections of users) and projects (content containers), catering to UI, CLI, and programmatic needs. Let's dissect each option with depth:

\* Option B (Tableau Server browser interface): Correct.

\* Groups: Go to Users > Groups > Add Group, name it, and optionally sync with Active Directory.

\* Projects: Go to Content > Projects > New Project, set name, description, and permissions.

\* Details: The web UI is intuitive, requiring server/site administrator rights. It's ideal for manual, ad-hoc creation with immediate visibility.

\* Permissions: For projects, you can set default permissions or lock them here.

\* Option C (tabcmd): Correct.

\* Groups: `tabcmd creategroup "GroupName"` creates a local group. Add users with `tabcmd addusers "GroupName" --users "user1,user2"`.

\* Projects: `tabcmd createproject -n "ProjectName" -d "Description"` creates a project.

\* Details: `tabcmd` is a command-line tool for batch operations or scripting (e.g., automating group/project setup). It requires a server admin login (`tabcmd` login).

\* Limitation: No AD sync via `tabcmd`-that's UI or REST API territory.

\* Option D (REST API): Correct.

\* Groups: Use the `POST /api/api-version/sites/site-id/groups` endpoint with a payload (e.g., `{"group": {"name": "GroupName"}}`). Supports AD import too.

\* Projects: Use `POST /api/api-version/sites/site-id/projects` (e.g., `{"project": {"name": "ProjectName", "description": "Desc"}}`).

\* Details: The REST API is programmatic, ideal for integration with external systems or bulk automation. Requires authentication via a token and server/site admin rights.

\* Power: Offers full control, including nested projects and custom permissions.

\* Option A (tsm customize): Incorrect.

\* Purpose: `tsm customize` modifies TSM UI branding (e.g., logos, colors) via commands like `tsm customize --logo "path/to/logo.png"`.

\* Why Wrong: It's unrelated to creating groups or projects-it's for cosmetic server configuration, not content/user management.

Why This Matters: Offering UI, CLI, and API options ensures flexibility-manual for small tasks, automation for scale-critical in enterprise deployments.

Reference: Tableau Server Documentation - "Manage Groups" ([https://help.tableau.com/current/server/en-us/groups\\_create.htm](https://help.tableau.com/current/server/en-us/groups_create.htm)), "Manage Projects" ([https://help.tableau.com/current/server/en-us/projects\\_create.htm](https://help.tableau.com/current/server/en-us/projects_create.htm)), "tabcmd Commands" ([https://help.tableau.com/current/server/en-us/tabcmd\\_cmd.htm](https://help.tableau.com/current/server/en-us/tabcmd_cmd.htm)), "REST API Reference" ([https://help.tableau.com/current/api/rest\\_api/en-us/REST/rest\\_api\\_ref.htm](https://help.tableau.com/current/api/rest_api/en-us/REST/rest_api_ref.htm)).

## 34. Frage

.....

Auf unterschiedliche Art und Weise kann man verschiedene Zwecke erfüllen. Was wichtig ist, dass man welchen Weg einschlägt. Viele Leute beteiligen sich an der Salesforce Analytics-Admn-201 Zertifizierungsprüfung, um seine Lebens- und Arbeitsumstände zu verbessern. Wie alle wissen, dass es nicht so leicht ist, die Salesforce Analytics-Admn-201 (Salesforce Certified Tableau Server Administrator) Zertifizierungsprüfung zu bestehen. Für die Prüfung verwendet man viel Energie und Zeit. Traurigerweise haben sie die Salesforce Analytics-Admn-201 Prüfung noch nicht bestanden.
